Morse, 2018-02-23 Sister Jaguars

Journey is the fiercely honest story of Sister Judy Bisignanoa Dominican nun who after spending sixty eight years looking for God in all the wrong places finally found the peace and divine connection she was looking for in Ecuador's Amazon rainforest. It all starts with a simple invitation to visit the Achuar community in the Amazon jungle. Here in this place with these special people using the plant medicine ayahuasca she was propelled onto a new path. Guided by the indigenous wisdom of Pachamama Mother Earth and the sacred rituals of the Achuar people she confronts and lets go of her turbulent abusive and angry past ultimately discovering that her life's purpose was not to become an American educator author and nun but rather a compassionate human being. In many ways Sister Judy's Journey is the story of one nun's transformational passage from self rejection to self acceptance and from self blame to self love. It is perhaps the journey of each of us as we search for peace in this life and beyond. The Achuar call her Hermana Otorango Sister Jaguar and so will you. *Where Song Began* Tim

Low, 2016-09-27 An authoritative and entertaining exploration of Australia's distinctive birds and their unheralded role in global evolution. Renowned for its gallery of unusual mammals Australia is also a land of extraordinary birds. But unlike the mammals the birds of Australia flew beyond the continent's boundaries and around the globe many millions of years ago. This eye opening book tells the dynamic but little known story of how Australia provided the world with songbirds and parrots among other bird groups why Australian birds wield surprising ecological power how Australia became a major evolutionary center and why scientific biases have hindered recognition of these discoveries. From violent swooping magpies to tool making cockatoos Australia's birds are strikingly different from birds of other lands often more intelligent and aggressive often larger and longer lived. Tim Low a renowned biologist with a rare storytelling gift here presents the amazing evolutionary history of Australia's birds. The story of the birds it turns out is inseparable from the story of the continent itself and also the people who inhabit it. **Environmentalism of the Rich** Peter Dauvergne, 2018-02-09 What it means for

global sustainability when environmentalism is dominated by the concerns of the affluent eco business eco consumption wilderness preservation. Over the last fifty years environmentalism has emerged as a clear counterforce to the environmental destruction caused by industrialization colonialism and globalization. Activists and policymakers have fought hard to make the earth a better place to live. But has the environmental movement actually brought about meaningful progress toward global sustainability? Signs of global unsustainability are everywhere from decreasing biodiversity to scarcity of fresh water to steadily rising greenhouse gas emissions. Meanwhile as Peter Dauvergne points out in this provocative book the environmental movement is increasingly dominated by the environmentalism of the rich diverted into eco business eco consumption wilderness preservation energy efficiency and recycling. While it's good that for example Barbie dolls packaging no longer depletes Indonesian rainforest and that Toyota Highlanders are available as hybrids none of this gets at the source of the current sustainability crisis. More eco products can just mean more corporate profits consumption and waste. Dauvergne examines extraction booms that leave developing countries poor and environmentally devastated with the

ruination of the South Pacific island of Nauru a case in point the struggles against consumption inequities of courageous activists like Bruno Manser who worked with indigenous people to try to save the rainforests of Borneo and the manufacturing of vast markets for nondurable goods for example convincing parents in China that disposable diapers made for healthier and smarter babies Dauvergne reveals why a global political economy of ever more more growth more sales more consumption is swamping environmental gains Environmentalism of the rich does little to bring about the sweeping institutional change necessary to make progress toward global sustainability **Save My Rainforest** Monica Zak,1992 Eight year old Omar Castillo fulfills his dream of visiting the endangered rain forest of southern Mexico and wins an audience with the president of Mexico to express his concern Travel Therapy Karen Schaler,2009-03-24 For some the only way to get over a break up is to keep moving for others the only solace is a spa vacation Tired of the same old routine one woman might opt for a trip where the sole focus is helping others another may decide that the only real escape is a Girlfriend Getaway with her best friends According to three time Emmy Award winning author Karen Schaler the only way to change your attitude is by changing your environment and Travel Therapy is the guide to help you get there With 101 unique destinations Travel Therapy is geared toward helping readers refresh and find themselves whether they re dealing with a breakup or divorce celebrating retirement or looking to shake things up Every chapter includes quizzes travel tips and extensively researched links to the best destination specific websites to help you figure out the perfect destination for you From daring destinations to soothing spa escapes Travel Therapy is your road map to self discovery happiness and success whether it s zip lining in Belize helping orphaned children in Africa or beachcombing the Caribbean Unrooted Erin Zimmerman,2024-04-16 Evolutionary botanist Zimmerman discusses her passion for plants and inveighs against sexism in the sciences in her marvelous debut memoir Throughout Zimmerman s enthusiasm and expertise make the science accessible even to those without a background in the subject The results are as edifying as they are galvanizing Publishers Weekly STARRED Review Erin Zimmerman has exposed a rooted gender failure in science Her book is important not for this alone Her work is essential for understanding the future resilience of all flora on this planet Diana Beresford Kroeger author of To Speak for the Trees An exploration of science motherhood and academia and a stirring account of a woman at a personal and professional crossroads Growing up in rural Ontario Erin Zimmerman became fascinated with plants an obsession that led to a life in academia as a professional botanist But as her career choices narrowed in the face of failing institutions and subtle but ubiquitous sexism Zimmerman began to doubt herself Unrooted Botany Motherhood and the Fight to Save an Old Science is a scientist s memoir a glimpse into the ordinary life of someone in a fascinating field This is a memoir about plants about looking at the world with wonder and about what it means to be a woman in academia an environment that pushes out mothers and those with any outside responsibilities Zimmerman delves into her experiences as a new mom her decision to leave her position in post graduate research and how she found a new way to stay in the field she loves She also explores

botany as a dying science worth fighting for While still an undergrad Zimmerman's university started the process of closing the Botany Department a sign of waning funding for her beloved science Still she argues for its continuation not only because we have at least 100 000 plant species yet to be discovered but because an understanding of botany is crucial in the fight against climate change and biodiversity loss Zimmerman is also a botanical illustrator and will provide 8 original illustrations for the book
