Save The Elwha:

Elwha Lynda Mapes, 2013-03-05 [CLICK HERE](#) to download the first chapter from *Elwha A River Reborn* Provide us with a little information and we'll send your download directly to your inbox A compelling exploration of one of the largest dam removal projects in the world and the efforts to save a stunning Northwest ecosystem Co published with The Seattle Times 125 color photographs including rare historic images Dam removal started in September 2011 while restoration work continues today In the fall of 2011 the Times was on hand when a Montana contractor removed the first pieces from two concrete dams on the Elwha River which cuts through the Olympic range It was the beginning of the largest dam removal project ever undertaken in North America one dam was 200 feet tall and the start of an unprecedented attempt to restore an entire ecosystem More than 70 miles of the Elwha and its tributaries course from the mountain headwaters to clamming beaches on the Strait of Juan de Fuca Through interviews field work archival and historical research and photojournalism The Seattle Times has explored and reported on the dam removal the Elwha ecosystem its industrialization and now its renewal *Elwha A River Reborn* is based on these feature articles Richly illustrated with stunning photographs as well as historic images graphics and a map *Elwha* tells the interwoven stories of this region Meet the Lower Elwha Klallam tribe who anxiously await the return of renowned salmon runs savored over the generations in the stories of their elders Discover the biologists and engineers who are bringing the dams down and laying the plan for renewal including an unprecedented revegetation effort that will eventually cover more than 700 acres of mudflats When the dam started to come down in Fall 2011 anticipated for more than 20 years since Congress passed the Elwha Restoration Act it was the beginning of a 350 million project observed around the world *Elwha A River Reborn* is inspiring and instructive a triumphant story of place people and environment striving to come together Winner of the Nautilus Awards 2014 Better Books for a Better World Silver Award *Save the Elwha* Rick Johnsen, 2003-10-15 *The Wired Northwest* Paul W. Hirt, 2012-10-18 The Pacific Northwest holds an abundance of resources for energy production from hydroelectric power to coal nuclear power wind turbines and even solar panels But hydropower is king Dams on the Columbia Snake Fraser Kootenay and dozens of other rivers provided the foundation for an expanding regionally integrated power system in the U S Northwest and British Columbia A broad historical synthesis chronicling the region's first century of electrification Paul Hirt's new study reveals how the region's citizens struggled to build a power system that was technologically efficient financially profitable and socially and environmentally responsible Hirt shows that every energy source comes with its share of costs and benefits Because Northwest energy development meant river development the electric power industry collided with the salmon fishing industry and the treaty rights of Northwest indigenous peoples from the 1890s to the present Because U S federal agencies like the Army Corps of Engineers and the U S Bureau of Reclamation built many of the large dams in the region a significant portion of the power supply is publicly owned initiating contentious debates over how that power should best

serve the citizens of the region Hirt dissects these ongoing battles evaluating the successes and failures of regional efforts to craft an efficient yet socially just power system Focusing on the dynamics of problem solving governance and the tense relationship between profit seeking and the public interest Hirt s narrative takes in a wide range of players not only on the consumer side where electricity transformed mills mines households commercial districts urban transit factories and farms but also power companies operating at the local and regional level and investment companies that financed and in some cases parasitized the operators His study also straddles the international border It is the first book to compare energy development in the U S Northwest and British Columbia Both engaging and balanced in its treatment of all the actors on this expansive stage *The Wired Northwest* helps us better understand the challenges of the twenty first century as we try to learn from past mistakes and re design an energy grid for a more sustainable future
