## **Saving Across The World Puzzles And Policies:**

*Saving Across the World* Klaus Schmidt-Hebbel, Luis Servén, 1997-01-01 World Bank Technical Paper No 349 The Bank's approach to water resources development has shifted from one of construction activities to one of improved management quality creating a new generation of water related projects and the need for new evaluation procedures This paper addresses the methodology for economic evaluation of this new group of projects and draws on the experience of the recently approved Mexico Water Resources Management project

**World Saving** Francesco Grigoli, Alexander Herman, Klaus Schmidt-Hebbel, 2014-11-13 This paper presents new evidence on the behavior of saving in the world by extending previous empirical research in five dimensions First it is based on a very large and recent database covering 165 countries from 1981 to 2012 Second it conducts a robustness analysis across different estimation techniques Third the empirical search is expanded by including potential saving determinants identified by theory but not previously considered in the empirical literature Fourth the paper explores differences in saving behavior nesting the 2008-10 crisis period and four different country groups Finally it also searches for commonalities and differences in behavior across national private household and corporate saving rates The results confirm in part existing research shed light on some ambiguous or contradictory findings and highlight the role of neglected determinants Compared to the literature we find a larger number of significant determinants of saving rates using different estimators for different periods and country groups and for different saving aggregates

**Environmental Health** James A. Listorti, Fadi M. Doumani, 2001-01-01 Environmental health remains at the periphery of sustainable development because it is inadequately defined and institutionally fragmented This publication aims to provide ways of addressing this multisectoral problem It is in three parts The first looks at harmonising sectoral priorities and shows that environmental health can target at least as much disease as the health sector The second part provides environmental health assessment guidelines The third part looks at the results of a pilot project to put theory into practice in Ghana

**Policy Evaluation with Computable General Equilibrium Models** Amedeo Fossati, Wolfgang Wiegard, 2003-09-02 Computable General Equilibrium CGE modelling is a relatively new field in economics however it is rapidly becoming one of the most useful tools for policy evaluation This book applies CGE modelling to some of the most urgent international economic policy problems including the Kyoto Protocol pension reform and income taxation and also analyses the methodological issues that arise

**Personal Wealth from a Global Perspective** James B. Davies, 2008-11-13 This book provides the first study of personal wealth from a global viewpoint Previous international studies of wealth have focused on the rich countries Here the transition countries emerging economies and the developing world are examined too The book looks at wealth inequality and asset composition around the world showing how these are affected by history institutions gender and incomes There is a dramatic contrast between rich countries where financial assets are so important and poor countries where farm assets and land still dominate The book shows that wealth inequality within countries is far

higher than that of income and has been rising recently most notably in Russia China and other transition countries Concentration among the rich and super rich has also increased Worldwide the top 2% have about 50% of personal wealth and the top 10% have 85% In contrast the bottom half has just 1% Poor countries are even poorer in wealth than in income terms But these are just the countries where life is most insecure and personal assets are most needed The book concludes that steps must be taken to break down barriers and help the poor and middle class in low income countries build up their personal assets to overcome their wealth disadvantage

**The Elusive Quest for Growth** William R. Easterly, 2002-08-02 Why economists attempts to help poorer countries improve their economic well being have failed Since the end of World War II economists have tried to figure out how poor countries in the tropics could attain standards of living approaching those of countries in Europe and North America Attempted remedies have included providing foreign aid investing in machines fostering education controlling population growth and making aid loans as well as forgiving those loans on condition of reforms None of these solutions has delivered as promised The problem is not the failure of economics William Easterly argues but the failure to apply economic principles to practical policy work In this book Easterly shows how these solutions all violate the basic principle of economics that people private individuals and businesses government officials even aid donors respond to incentives Easterly first discusses the importance of growth He then analyzes the development solutions that have failed Finally he suggests alternative approaches to the problem Written in an accessible at times irreverent style Easterly's book combines modern growth theory with anecdotes from his fieldwork for the World Bank

*Handbook of Financial Decision Making* Gilles Hilary, David McLean, 2023-08-14 This accessible Handbook provides an essential entry point for those with an interest in the increasingly complex subject of financial decision making It sheds light on new paradigms in society and the ways that new tools from private actors have affected financial decision making Covering a broad range of key topics in the area leading researchers summarize the state of the art in their respective areas of expertise delineating their projections for the future

World Bank Research Program World Bank, 1999

**Trade, Global Policy, and the Environment** Per Fredriksson, 1999-01-01 QUOTE We live in an increasingly interconnected world Trade flows worldwide are growing rapidly and global production patterns are shifting as countries follow their comparative advantage in production via trade At the same time however there is growing concern about potential adverse environmental impacts from increasing trade QUOTE John A Dixon Lead Economist The Environment Department World Bank Interest in the trade and environment debate has intensified as a result of international trade agreements and because many proposed solutions to the climate change problem have potential implications for the global trading system Clearly more empirical work is needed to inform the debate guide policymakers toward solutions and help set priorities This volume is an attempt to further our understanding of the empirical links between trade and the environment Thirteen chapters which were presented as papers at a World Bank conference in April 1998 focus on three main themes 1 Effects of trade liberalization and growth on the

environment<sup>2</sup> The QUOTEpollution havenQUOTE hypothesis<sup>3</sup> Economic instruments for resolving global environmental problemsThe papers address a number of different issues within each of the themes offering new data or new questions and approaches They are devoted to deepening our understanding and empirical knowledge of the various effects of trade liberalization Only through a firm understanding of the linkages involved can well founded policy advice be formulated

**Trade and Transport Facilitation** John Raven,2001-01-01 The report focuses on transport facilitation in developing countries in order to help promote trade in exports and economic growth Each country has its own set of special characteristics including significant border entry and import points This report provides an analytical tool for those working in the field complemented by practical suggestions in order to identify facilitation problems and create effective remedial action plans This report is an expanded version of the publication Trade and Transport Facilitation An Audit Methodology ISBN 0821347195 published by the World Bank in 2000

*Chile* Guillermo Perry,Danny M. Leipziger,1999-01-01 The Chilean model has been expostulated for some time in the Latin American and Caribbean region and elsewhere because it appeared that the country despite terrible political and economic turmoil embodied important lessons about economic management Over the last 15 years Chile has been the Latin American country with the most consistent and successful economic record The success of Chile s economic reforms and the subsequent dramatic increase in real income are well known To a large extent Chile s positive fiscal outcomes have been the result of sound policies as well as sound fiscal institutions However there is room for improvement in the education and health sectors and the results for Chile in terms of equality of income are not positive Chile Recent Policy Lessons and Emerging Challenges presents a series of papers analyzing different aspects of Chilean public policy which cover economic and social policies as well as regulatory and governance issues The book is broken down into three parts The first part examines the contribution of macroeconomic policies to superior outcomes the second part analyzes the many advances in the social sector and the remaining troublesome issues and the third part evaluates regulatory reforms and the effects of privatization Since no public policy model is static further reforms are needed to maintain Chile s economic growth as well as to respond effectively to public demands As Chile grapples with its pockets of poverty the balance between social safety nets and the need for greater efficiency in labor markets a rebalancing of regulatory powers and other thorny issues it will need to rely on its institutional experience in public policy and conflict resolution

**Measuring and Apportioning Rents from Hydroelectric Power Developments** Mitchell P. Rothman,2000-01-01 Hydro resources are provided by nature The exploitation of such resources can generate significant economic rent to the owners In the past governments have usually claimed ownership of hydroelectric resources and passed on the rents to their state owned utilities which have used them to expand their systems or provide lower tariffs to their consumers With the restructuring of the electric power sector in many countries a more explicit consideration of hydroelectric rents is required Moreover hydropower resources are often owned by more than one

party or at least require cooperation between parties to develop them In this context the measurement and apportionment of hydropower rents between cooperating parties becomes important This paper addresses some of the issues involved in cooperative development of water resources especially for hydroelectric generation It promotes a better understanding of the sources of the benefits and attempts to derive an analytical basis for discussions between cooperating parties This volume will be of interest to hydropower resource earning countries hydropower developers and Bank staff Old Age Security

Ramgopal Agarwala,1997-01-01 The seventh edition of this annual report reviews the long term prospects for developing countries in light of changes in the global environment and provides a detailed discussion of selected aspects of the global integration process in those countries The first chapter evaluates prospects for the major elements of the external environment affecting developing countries and the medium to long term outlook for developing countries themselves The report forecasts that the external environment for developing countries remains broadly favorable Among the main policy challenges faced by these countries is their ability to adapt to long run shifts in market opportunities and heightened competitive pressures brought on by global trade liberalization now increasingly focused on liberalization of trade in services rising global production and other forms of global integration The chapter considers the implications for the world economy of rapid growth and integration in large developing countries such as China India and Brazil in the period to 2020 The second chapter looks at the move toward greater globalization of production broadly defined as cross border production by multinational enterprises and their networks of affiliates subcontractors and other partners Within this context the chapter addresses the significance of global production in world output in main groups of countries and economic sectors factors driving the trend toward global production including heightened competition worldwide policy liberalization and rapid technological progress the benefits that developing countries can derive from global production such as new technologies and improved efficiency practices and the issues for policymakers seeking to enhance participation in global production and maximize its benefits for host countries **Strategic Management for Government Agencies** Navin Girishankar,Migara

De Silva,1998-01-01 This paper presents a conceptual framework for the strategic management of government agencies in developing and transition economies It delineates a working model of an efficient government agency for which core strategy internal organizational design and external environment are aligned It then demonstrates how the objectives of public sector management are ideally based on assessments of areas of misalignment in government agencies **India's Public**

**Distribution System** Rokkam Radharkrishna,K. Subbarao,1997-01-01 World Bank Technical Paper No 382 This technical paper compares and contrasts the governance and regulation of new style power pools in Australia Canada Norway Sweden and the United Kingdom These trading markets in electricity commodities and services are explored in various ways The authors review the basic governance models compare decisionmakers in the industry examine market surveillance methods used and explore the role of government and the regulator The paper emphasizes the lessons that can be learned from

international experiences      Design of Social Funds Deepa Narayan-Parker,Katrinka Ebbe,1997-01-01 Annotation World Bank Discussion Paper No 375 Social funds have proved to be important instruments for reaching the poor using community based strategies Yet while there have been innovations in the design of these funds the projects are much less participatory and demand oriented than is commonly believed This paper examines the extent to which social fund subprojects are designed to support community participation demand orientation and investment in local organizational capacity to achieve sustainability at the community level      **Farm Debt in the CIS** Csaba Csáki,Zvi Lerman,Serge? Sotnikov,2001-01-01 This study presents the results of the multi country study for farm debt in five Commonwealth of Independent States CIS countries Belarus Kazakhstan Moldova Russia and the Ukraine It offers a comparative analysis of the level and composition of farm debt in these countries and reviews the major reasons for farm debt accumulation in the 1990s      **The World Bank Research Program 1998** World Bank Staff,1998 The four basic objectives of the World Bank s research program are broadening understanding of development assisting in developing research capacity in member countries improving the Bank s capacity in advising members and supporting all aspects of its own operations The report is the annual compendium of current Bank research The abstracts in this volume report on research projects within FY98 describing questions addressed analytical methods used findings to date and policy implications In addition each abstract identifies the expected completion date and the research team as well as any report or publication produced The abstracts cover 193 research projects grouped under nine major headings as follows 1 poverty and social welfare 2 labor markets and education 3 environmentally sustainable development 4 infrastructure and urban development 5 macroeconomics 6 international economics 7 domestic finance and capital markets 8 transition economies and 9 private sector development and public sector management An appendix is included listing reports and publications produced by Bank research with corresponding availability sources Abstracts are indexed by the sponsoring unit      *The Long March* Shahid Javed Burki,Guillermo Perry,1997-01-01 Detailed discussion of reforms necessary to accelerate economic growth and reduce poverty in the region Reforms include equity market development civil service reform in health and education investment labor market liberalization and greater trade openness Handbook of Latin American Studies v 57      World Bank HIV/AIDS Interventions Julia Dayton,1998-01-01 The AIDS epidemic is one of the greatest development challenges of the 20th century Since 1986 the World Bank has supported member countries efforts to fight the epidemic in many ways including committing over US 550 million to HIV AIDS prevention and mitigation efforts This paper the first comprehensive study of all World Bank HIV AIDS related activities assesses the appropriateness of Bank interventions from the perspective of public economies and reviews the economic evaluation and implementation of projects
