Saving Belief Lynne Rudder Baker, 2017-03-14 This stimulating book critically examines a wide range of physicalistic conceptions of mind in the works of Jerry A Fodor Stephen P Stich Paul M Churchland Daniel C Dennett and others Part I argues that intentional concepts cannot be reduced to nonintentional and nonsemantic concepts Part II argues that intentional concepts are nevertheless indispensable to our cognitive enterprises and thus need no foundation in physicalism As a sustained challenge to the prevailing interpretation of cognitive science this timely book fills a large gap in the philosophical literature It is sure to spark controversy yet its clarity makes it attractive as a text in upper level undergraduate and graduate courses in philosophy of mind and cognitive science *Saving Belief* should be read by philosophers psychologists and others interested in the philosophy of language philosophy of mind and cognitive science Originally published in 1988 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Saving Belief Lynne R. Baker, 1987-01-01 This book is a comprehensive attack on several of the views that have been most influential in the philosophy of psychology during the last two decades Professor Baker argues that mentalistic notions should not be eliminated and need not be explained in terms of other notions in cognitive science The book is interesting and shows an honest concern for clear argumentation It deserves a wide readership Tyler Burge University of California at Los Angeles This book is a provocative and relentlessly argued treatment of a deep and important topic the fate of intentionality Baker's arguments oblige those who wish to defend the current conception of cognitive science to rethink the discipline She has put the ball squarely in the physicalists court Despite the technical character of the topic the book is wonderfully readable John Heil Visiting Fellow University of California Berkeley This stimulating book critically examines a wide range of physicalistic conceptions of mind in the works of Jerry A Fodor Stephen P Stich Paul M Churchland Daniel C Dennett and others Part I argues that intentional concepts cannot be reduced to nonintentional and nonsemantic concepts Part II argues that intentional concepts are nevertheless indispensable to our cognitive enterprises and thus need no foundation in physicalism As a sustained challenge to the prevailing interpretation of cognitive science this timely book fills a large gap in the philosophical literature It is sure to spark controversy yet its clarity makes it attractive as a text in upper level undergraduate and graduate courses in philosophy of mind and cognitive science *Saving Belief* should be read by philosophers psychologists and others interested in the philosophy of language philosophy of mind and cognitive science

The Evolutionary Argument against Naturalism Jim Slagle, 2021-06-17 Contemporary discussions in metaphysics epistemology and philosophy of mind are dominated by the presupposition of naturalism Arguing

against this established convention Jim Slagle offers a thorough defence of Alvin Plantinga's Evolutionary Argument against Naturalism EAAN and in doing so reveals how it shows that evolution and naturalism are incompatible Charting the development of Plantinga's argument Slagle asserts that the probability of our cognitive faculties reliably producing true beliefs is low if ontological naturalism is true and therefore all other beliefs produced by these faculties including naturalism itself are self defeating He critiques other well known epistemological approaches including those of Descartes and Quine and deftly counters the many objections against the EAAN to conclude that metaphysical naturalism should be rejected on the grounds of self defeat By situating Plantinga's argument within a wider context and showing that science and evolution cannot entail naturalism Slagle renders this most common metaphysical view irrational As such the book advocates an important reconsideration of contemporary thought at the intersection of philosophy science and religion

Explaining Attitudes Lynne Rudder Baker, 1995-01-27 Explaining Attitudes develops an account of propositional attitudes practical realism

The Externalist Challenge Richard Schantz, 2011-08-18 The debate between internalism and externalism has become a focal point of attention both in epistemology and in the philosophy of mind and language Externalism challenges basic traditional internalist conceptions of the nature of knowledge justification thought and language What is at stake is the very form that theories in epistemology and the philosophy of mind ought to take This volume is a collection of original contributions of leading international authors reflecting on the present state of the art concerning the exciting controversies between internalism and externalism

Contemporary Materialism Paul K. Moser, J. D. Trout, 2002-11-01 Contemporary Materialism brings together the best recent work on materialism from many of our leading contemporary philosophers This is the first comprehensive reader on the subject The majority of philosophers and scientists today hold the view that all phenomena are physical as a result materialism or physicalism is now the dominant ontology in a wide range of fields Surprisingly no single book until now has collected the key investigations into materialism to reflect the impact it has had on current thinking in metaphysics philosophy of mind and the theory of value The classic papers in this collection chart contemporary problems positions and themes in materialism At the invitation of the editors many of the papers have been specially up dated for this collection follow on pieces written by the contributors enable them to appraise the original paper and assess developments since the work was first published The book's selections are largely non technical and accessible to advanced undergraduates The editors have provided a useful general introduction outlining and contextualising this central system of thought as well as a topical bibliography Contemporary Materialism will be vital reading for anyone concerned to discover the ideas underlying contemporary philosophy David Armstrong University of Sydney Jerry Fodor Rutgers University New Jersey Tim Crane University College London D H Mellor University of Cambridge J J C

Mind, Matter, and Nature James D. Madden, 2013-06-01 Written for students Mind Matter and Nature presumes no prior philosophical training on the part of the reader The book nevertheless holds the arguments discussed to rigorous standards and is conversant with recent

literature thus making it useful as well to more advanced students and professionals interested in a resource on Thomistic hylomorphism in the philosophy of mind *The Epistemological Skyhook* Jim Slagle,2016-05-20 Throughout philosophical history there has been a recurring argument to the effect that determinism naturalism or both are self referentially incoherent By accepting determinism or naturalism one allegedly acquires a reason to reject determinism or naturalism The Epistemological Skyhook brings together for the first time the principal expressions of this argument focusing primarily on the last 150 years This book addresses the versions of this argument as presented by Arthur Lovejoy A E Taylor Kurt G del C S Lewis Norman Malcolm Karl Popper J R Lucas William Hasker Thomas Nagel Alvin Plantinga and others along with the objections presented by their many detractors It concludes by presenting a new version of the argument that synthesizes the best aspects of the others while also rendering the argument immune to some of the most significant objections made to it

The Logic of the History of Ideas Mark Bevir,2002-06-20 Human cultures generate meanings and the history of ideas broadly conceived is the study of these meanings An adequate theory of culture must therefore rest on a suitable philosophical enquiry into the nature of the history of ideas Mark Bevir s book explores the forms of reasoning appropriate to the history of ideas enhancing our understanding by grappling with central questions such as What is a meaning What constitutes objective knowledge of the past What are beliefs and traditions How can we explain why people held the beliefs they did The book ranges widely over issues and theorists associated with post analytic philosophy post modernism hermeneutics literary theory political thought and social theory **Free Will and Epistemology** Robert Lockie,2018-01-11

In the first in depth study of the transcendental argument for decades Free Will and Epistemology defends a modern version of the famous transcendental argument for free will that we could not be justified in undermining a strong notion of free will as a strong notion of free will is required for any such process of undermining to be itself epistemically justified By arguing for a conception of internalism that goes back to the early days of the internalist externalist debates it draws on work by Richard Foley William Alston and Alvin Plantinga to explain the importance of epistemic deontology and its role in the transcendental argument It expands on the principle that ought implies can and presents a strong case for a form of self determination With references to cases in the neuroscientific and cognitive psychological literature Free Will and Epistemology provides an original contribution to work on epistemic justification and the free will debate *Coming to Our Senses* Michael Devitt,1996 Professor Devitt takes up one of the most important difficulties that must be faced by philosophical semantics namely the threat posed by holism The Concept of Unbelief Albert Mitchell Ph.D,2013-08-08 The Concept of Unbelief is examined according to the ethical teachings of Immanuel Kant Kants notion of the idea of God as a moral postulate is used as a foil to the agnostic position to further clarify Kants concept of unbelief This stance by Kant is contrasted with the concept of unbelief in Johann Fichtes Attempt at a Critique of All Revelation *The Architecture of Blame and Praise* David Shoemaker,2024-09-17 Many philosophers assume that to be a responsible agent is to be an apt

target of responses like blame and praise But what do these responses consist of precisely And do they really belong together simply negative and positive symmetrical counterparts of each other While there has been a lot of philosophical work on the nature of blame over the past 15 years yielding multiple conflicting theories there has been little on the nature of praise Indeed those few who have investigated praise including both philosophers and psychologists have concluded that it is quite different in some respects than blame and that the two in fact may not be symmetrical counterparts at all In this book David Shoemaker offers the first detailed deep dive into the complicated nature of blame and praise teasing out their many varieties while defending a general symmetry between them The book provides a thorough normative grounding for the many types and modes of blame and praise albeit one that never appeals to desert or the metaphysics of free will The volume draws from moral philosophy moral psychology the philosophy and psychology of humor the psychology of personality disorders and experimental economics The many original contributions in the book include the presentation and defense of a new functionalist theory of the entire interpersonal blame and praise system the revelation of a heretofore unrecognized kind of blame a discussion of how the capacities and impairments of narcissists tell an important story about the symmetrical structure of the blame praise system an investigation into the blame praise emotions and their aptness conditions an exploration into the key differences between other blame and self blame and an argument drawn from economic games for why desert is unnecessary to render apt the ways in which blame sometimes sanctions

Truth Without Truths David Liggins, 2024-09-14 In the context of debates about truth nihilism is the view that nothing is true This is a very striking and at first implausible thesis which is perhaps why it is seldom discussed Truth without Truths applies nihilism to the philosophical debates on truth and paradox and explores how a nihilist approach to truth is a serious contender David Liggins demonstrates that a strong case for nihilism about truth is available The main grounds for taking nihilism on truth seriously are the solutions it provides to a wide range of paradoxes involving truth and its epistemological superiority to theories that posit truths The discussion considers a wider range of paradoxes than usual including the truth teller paradox and other paradoxes of underdetermination Liggins shows how the debate over truth and paradox can be advanced by drawing on metaphysical debates about realism and anti realism Truth without Truths is also a challenge to deflationism Deflationists provide an austere metaphysically lightweight account of truth But there is one posit that all contemporary deflationists make they posit truths By showing that we can well do without truths Liggins argues that deflationism is actually too lavish a position Liggins s preferred form of alethic nihilism includes a Ramseyan analysis of the concept of truth which uses quantification into sentence position conceived of as non objectual and non substitutional This book is part of a wider movement exploring the implications of admitting forms of non objectual non substitutional quantification sometimes called higher order metaphysics

Immortal Souls Edward Feser, 2024-09-04 *Immortal Souls* provides as ambitious and complete a defense of Aristotelian Thomistic philosophical anthropology as is currently in print Among the many topics covered are the

reality and unity of the self the immateriality of the intellect the freedom of the will the immortality of the soul the critique of artificial intelligence and the refutation of both Cartesian and materialist conceptions of human nature Along the way the main rival positions in contemporary philosophy and science are thoroughly engaged with and rebutted Reviews Edward Feser s book is a Summa of the nature of the human person it is therefore both a rather long but brilliant monograph and a valuable work for consultation Each of the human faculties discussed is treated comprehensively with a broad range of theories considered for and against and although Feser s conclusions are firmly Thomistic one can derive great benefit from his discussions even if one is not a convinced hylomorphist Every philosopher of mind would benefit from having this book within easy reach Howard Robinson Professor Emeritus of Philosophy Central European University Feser defends the Aristotelian and Thomistic system effectively bringing it into dialogue with recent debates and drawing on some of the best of both analytic Kripke Searle BonJour Fodor and phenomenological Heidegger Merleau Ponty Dreyfus philosophy He deftly rebuts objections to Thomism both ancient and modern Anyone working today on personal identity the unity of the self the semantics of cognition free will or qualia will need to engage with the analysis and arguments presented here Robert C Koons Professor of Philosophy University of Texas at Austin

The Normative Web Terence Cuneo,2007-09-06 Many philosophers hold antirealist views about morality according to which moral facts or truths do not exist Does this imply that other types of normative facts such as epistemic facts do not exist The Normative Web develops a positive answer to this question By means of an analogy between moral and epistemic facts Terence Cuneo presents a compelling defence of robust realism in ethics In so doing he engages with a range of antirealist positions in epistemology such as error theories expressivist views and reductionist views of epistemic reasons

The Nature and Limits of Human Understanding Anthony Sanford,Philip Nicholas Johnson-Laird,2003-05-01 This book is an exploration of human understanding from the perspectives of psychology philosophy biology and theology The six contributors are among the most internationally eminent in their fields Though scholarly the writing is non technical No background in psychology philosophy or theology is presumed No other interdisciplinary work has undertaken to explore the nature of human understanding This book is unique and highly significant for anyone interested in or concerned about the human condition

Philosophy Of Mind Paul Gilbert,Kathleen Lennon,2005-08-04 A welcome introduction to one of the most intellectually demanding areas of the undergraduate philosophy curriculum The authors provide a clear framework within which students can fit contemporary developments in the Anglo American tradition which provide the core themes of philosophy of mind and which connect to their other work in epistemology and philosophy of language

Folk Psychology Re-Assessed D. Hutto,Matthew M. Ratcliffe,2007-09-06 1 1 FOLK PSYCHOLOGY THEORY OF MIND AND SIMULATION The tasks we face in our day to day social lives are quite heterogeneous but many of them make a common demand upon us They require us to understand and interact with other people and in most social encounters we exhibit a special sensitivity to our fellow human beings that is quite different from

the way we respond to inanimate objects and most other species of organism Social life is dependent to a considerable degree on our ability to understand what is distinctive about human behaviour and to successfully apply that understanding in all manner of situations What is central to our ability to interpret one another A great deal of work in philosophy of mind cognitive science anthropology developmental psychology and a host of other disciplines assumes that at root interpersonal interpretation is accomplished through the employment of a commonsense or folk psychology meaning an everyday rather than scientific appreciation of mindedness Although there is considerable debate over which cognitive processes support our folk psychological abilities and how those abilities develop during childhood there is a remarkable degree of consensus concerning what folk psychology consists of Almost all discussions of the topic begin by stating or presupposing that it is the ability to attribute intentional states principally beliefs and desires to other people and perhaps also to oneself in order to predict and explain behaviour

Connectionism and the Philosophy of Mind T. Horgan, J. Tienson, 2012-12-06 This series will include monographs and collections of studies devoted to the investigation and exploration of knowledge information and data processing systems of all kinds no matter whether human other animal or machine Its scope is intended to span the full range of interests from classical problems in the philosophy of mind and philosophical psychology through issues in cognitive psychology and sociobiology concerning the mental capabilities of other species to ideas related to artificial intelligence and to computer science While primary emphasis will be placed upon theoretical conceptual and epistemological aspects of these problems and domains empirical experimental and methodological studies will also appear from time to time One of the most if not the most exciting developments within cognitive science has been the emergence of connectionism as an alternative to the computational conception of the mind that tends to dominate the discipline In this volume John Tienson and Terence Horgan have brought together a fine collection of stimulating studies on connectionism and its significance As the Introduction explains the most pressing questions concern whether or not connectionism can provide a new conception of the nature of mentality By focusing on the similarities and differences between connectionism and other approaches to cognitive science the chapters of this book supply valuable resources that advance our understanding of these difficult issues J H F
