The concern today about suburban sprawl is not new In the decades after World War II the spread of tract house construction changed the nature of millions of acres of land and a variety of Americans began to protest against the environmental costs of suburban development By the mid 1960s indeed many of the critics were attempting to institutionalize an urban land ethic *The Bulldozer in the Countryside* was the first scholarly work to analyze the successes and failures of the varied efforts to address the environmental consequences of suburban growth from 1945 to 1970 For scholars and students of American history the book offers a compelling insight into two of the great stories of modern times the mass migration to the suburbs and the rise of the environmental movement The book also offers a valuable historical perspective for participants in contemporary debates about the alternatives to sprawl **Contested Lands** Robert J. Mason,1992 The nation s first and only national reserve the Pinelands of New Jersey is located in the middle of the densely populated urban corridor between New York City and Philadelphia Possessing vast quantities of pure groundwater distinct flora and fauna and a fascinating history of human occupancy and resource exploitation the Pine Barrens is managed by a 15 member commission appointed at the federal state and local level In his discussion of the implementation of the Pinelands Commission s regional plan Robert Mason explores the changing politics of place and the associated conflicts of interest that have emerged The Pinelands program is widely viewed as a land use and regional planning experiment of national significance While the commission is sustained by legislative and gubernatorial support and an absence of well organized public opposition it still has had to accommodate community and rural entrepreneurial interests In order to convey some sense of the social political and economic texture of the Pinelands Mason examines three communities Woodland Township Hamilton Township and Manchester Township The Pinelands experience offers a unique model for the management of valued

places across the nation and provides valuable lessons about the human problems that confront ecologically driven planning schemes with human settlement patterns political subdivisions and economic systems Author note Robert J Mason is Assistant Professor of Geography and Urban Studies at Temple University *Housing and Planning References* United States.
