Saving The Daylight Why We Put The Clocks Forward:

Saving The Daylight David S. Prerau, 2014-03-06 Benjamin Franklin conceived it Sir Arthur Conan Doyle endorsed it Winston Churchill campaigned for it Kaiser Wilhelm first employed it Woodrow Wilson and Franklin Roosevelt went to war with it Every spring the clocks go forward and every autumn they go back Saving the Daylight explores for the first time the contentious and often entertaining story of this deceptively simple attempt to regulate the sunlight hours Throughout its surprisingly controversial history Daylight Saving Time has been claimed to have influenced a wide variety of areas including agricultural practices the reporting of sports scores street crime voter turnout and many other sometimes unexpected aspects of daily life The book brings together the historical political and technical aspects of the fascinating story behind the movement for DST with many light and offbeat anecdotes

British Literature and Culture in Second World Wartime Beryl Pong, 2020-05-14 British Literature and Culture in Second World Wartime excavates British late modernism's relationship to war in terms of chronophobia a joint fear of the past and future As a wartime between but distinct from those of the First World War and the Cold War Second World wartime involves an anxiety that is both repetition and imaginary both a dread of past violence unleashed anew and that of a future violence still ungraspable Identifying a constellation of temporalities and affects under three tropes time capsules time zones and ruins this volume contends that Second World wartime is a pivotal moment when wartime surpassed the boundaries of a specific state of emergency becoming first routine and then open ended It offers a synoptic wide ranging look at writers on the home front including Henry Green Elizabeth Bowen Virginia Woolf and Rose Macaulay through a variety of genres such as life writing the novel and the short story It also considers an array of cultural and archival material from photographers such as Cecil Beaton filmmakers such as Charles Crichton and artists such as John Minton It shows how figures harnessed or exploited their media's temporal properties to formally register the distinctiveness of this wartime through a complex feedback between anticipation and retrospection oftentimes fashioning the war as a memory even while it was taking place While offering a strong foundation for new readers of the mid century the book's overall theoretical focus on chronophobia will be an important intervention for those already working in the field

About Time: A History of Civilization in Twelve Clocks David Rooney, 2021-08-17 A captivating surprising history of timekeeping and how it has shaped our world For thousands of years people of all cultures have made and used clocks from the city sundials of ancient Rome to the medieval water clocks of imperial China hourglasses fomenting revolution in the Middle Ages the Stock Exchange clock of Amsterdam in 1611 Enlightenment observatories in India and the high precision clocks circling the Earth on a fleet of GPS satellites that have been launched since 1978 Clocks have helped us navigate the world and build empires and have even taken us to the brink of destruction Elites have used them to wield power make money govern citizens and control lives and sometimes the people have used them to fight back Through the stories of twelve clocks About Time brings pivotal moments from the past vividly to life Historian and lifelong clock

enthusiast David Rooney takes us from the unveiling of al Jazari's castle clock in 1206 in present day Turkey to the Cape of Good Hope observatory at the southern tip of Africa where nineteenth century British government astronomers moved the gears of empire with a time ball and a gun to the burial of a plutonium clock now sealed beneath a public park in Osaka where it will keep time for 5 000 years Rooney shows through these artifacts how time has been imagined politicized and weaponized over the centuries and how it might bring peace Ultimately he writes the technical history of horology is only the start of the story A history of clocks is a history of civilization

Inspiring Sustainable Behaviour Oliver Payne, 2013-05-07 What is the answer to inspiring sustainable behaviour It starts with a question or nineteen With this simple and inspiring guide you ll learn how to ask for persistent pervasive and near costless change by uncovering our hidden quirks judgmental biases and apparent irrationalities The only change you ll need to make is how you ask Businesses larger or small will soon have to cut costs and cut carbon irrespective of the products they sell or the services they perform National government has structural policy and legislative needs and local government has implementation and documentation needs Indeed the new UK government coalition's approach to transport is simply cut costs and cut carbon Set against this there is an increasing sense that popular culture and popular science are congregating around a desire to understand who we are and how we behave The recent rise of behavioural economics is a testament to this as well as the relevance of environmental psychology Allied to this is a sense that big business is forging ahead with plans to account for and mitigate carbon emissions without the marketing and communications departments being able to help or communicate this effectively either through their own efforts or those of their communication agencies The 19 Different Ways to Ask for Change offer a solution to all these needs by pulling them together and showing that

changing how we ask is near costless but its effects could be near priceless This book shows that simplification isn't always the solution an action can be the most successful question and a default answer can be the most important It explores why short term memory tasks change our behaviour how singing roads regulate speed and that commitment gaps change outcomes how our worry profile is the same as an Argentinean farmer's why knowledge of what kills you is irrelevant but asking about behaviour that kills is deadly and what a chimpanzee's tea party tells us about the effect of ownership on decision making This timely book will be of great value to scholars and practitioners whose work relates to reducing carbon emissions with a particular emphasis on environmental psychology behavioural economics project design and psychology It offers practical solutions for policy makers and professionals in marketing and communications departments **Puck**, 1917

particular communities resistance to standard time and later daylight saving time Keeping Watch also examines the cut and paste manipulation of real time in motion pictures The cumulative impact of these technological changes O Malley argues was momentous creating a harsher ethic of punctuality and an unprecedented degree of labor regimentation Book jacket
