## **Saving The World Solo:**

**Saving the World Solo** Pamela Sackett, 2004 What do you get when you mix a childhood forged in the boozy hazed post war partying of the 50s replete with Lenny Bruce recitations at age eight with an adulthood as a college hopping educational film actress boy guru disciple L A song writer night club comedienne and prison school teaching artist You get a feeling centric language obsessed Cleveland refugee who has an epiphany and decides to save the world with a humble offering of delusions of grandeur flashbacks and forward thinking wit and wisdom formidable foibles unrelenting challenge to the resigned intransigence of the status quo run on sentences wild stories mostly true *Mission: Save A World* Geoff Schultz, 2020-11-23

When a planet of intelligent beings is discovered on the verge of self destruction as each island nation fears the others are plotting its downfall a distant space faring culture sends a group of specialists Their mission is to understand the planet s cultures enough to determine whether they are worth saving and if they are to prevent their self destruction However they have to do it in such a way that none of the planet s inhabitants know they are being observed much less potentially being manipulated Some of the mission members want to sweep in on the natives with missionary fervor to enlighten them to the glories of their obviously superior culture while other mission members want to understand the planet s inhabitants and what they might offer to enhance the diversity of intelligent beings in the galaxy More than just following the guidelines issued to the mission the Mission Director finds that he has to balance the differing viewpoints and encourage the experts and rookies as well as the traditionalists and the innovators to somehow all work together in order to come up with a solution which will work for the inhabitants of the planet they are studying While the specialists continue their work the Mission Director takes a side trip to visit a planet where he had previously been assigned and the rookie pilot who accompanies him has several surprises which encourages him and in some ways forces him to think outside of his training as well as to set aside his missionary zeal to acquire honor for himself The Mission Director has his own surprises when he lands to meet with the on planet agents and ends up in an unexpected first contact situation After the Mission Director returns to the planet of island nations with the rookie pilot and is updated on the current status he encourages the mission members to consider any ideas of how they can help the inhabitants to avoid self destruction Or maybe the mission should find a way to help them self destruct in a way that can t be blamed on the mission That suggestion shocks some of the mission members but it encourages them to think outside of the status quo or previously tried solutions As one idea after another doesn t pan out or outright fails two of the scientists from different disciplines try to combine some of their research and are surprised when it shows some promise Before they can test the possible solution on the inhabitants they have to have a better understanding of how the individual inhabitants think which requires a totally different approach Unexpectedly that is provided when it s revealed that the rookie pilot has an unexpected talent which the mission is able to make use of with surprising success Following some very limited testing it s decided to offer the solution as a new product to the inhabitants on a voluntary basis without

revealing the source of the product The majority of the inhabitants who try the new product find that it improves their lives but there are some people who have a negative reaction at least in their opinion After an extended time of watching the inhabitants get close to mutual self destruction then slightly back off the mission members now have to sit and wait to see whether the new product will encourage the inhabitants to move away from or towards self destruction *Going Solo* Jason Milligan,1992

**Youthquake** Ezra Levant, 1996. From the Foreword: For the past two decades, Canadian politicians of all stripes have told us that it's time to stop mortgaging our future. They've talked about the unfairness of saddling future generations with a massive public debt, and they've talked about the need to correct the deep flaws inherent in our welfare state entitlements. While many of Levant's peers have a general sense of the fiscal disaster which they are set to inherit, few have a deep understanding of the fiscal and political causes and consequences of it. *Youthquake* probes those questions with humour and passion, making it a compelling introduction to issues that are too often the preserve of policy specialists. Simply put, those who want to know the bottom line won't have to pour through actuarial tables or academic jargon to learn that a Canadian born in the 1970s will end up paying 200,000 more in taxes than he receives in services, or that the CPP premiums are set to triple over the next 20 years.

You shall definitely see the difference.
