The focus is mainly on recent centuries but as environmental history requires at times the work also takes the very long view of millennia. Several of the articles seek to bring a broad Pacific perspective to bear on their subjects while others use Pacific basin examples to try to establish broader theoretical points of interest to all who are drawn to the study of the interactions between nature and culture. The book includes a bibliography of Pacific basin environmental history and an introduction that aims to sketch the contours and possible future directions of the field. **Sharks of the World**

A clear eyed examination of how Australia should approach the complex security challenges at play in its maritime domain. Security starts at home. Australia has drawn closer to many of its Asia Pacific neighbours in recent years but when push comes to shove it continues to look well beyond the oceans and regions that surround it to the distant horizons of Europe and North America for its ultimate security guarantee. In *Girt by Sea* international relations experts Rebecca Strating and Joanne Wallis instead turn their gazes to Australia's near region focusing on the six maritime domains central to its national interests: the north seas, the Timor, Arafura and Coral Seas and the Torres Strait, the Western Pacific, the South China Sea, the South Pacific, the Indian Ocean and the Southern Ocean. In so doing they reimagine how Australia should understand its strategic challenges and find lasting security.
