The Soviet Army's High Commands in War and Peace, 1941-1992 Richard W. Harrison, 2022-07-28 The first full treatment of the unique phenomenon of High Commands in the Soviet Army during World War II and the Cold War The war on the Eastern Front during 1941-45 was an immense struggle running from the Barents Sea to the Caucasus Mountains The vast distances involved forced the Soviet political military leadership to resort to new organizational expedients in order to control operations along the extended front These were the high commands of the directions which were responsible for two or more fronts army groups and along maritime axes one or more fleets In all five high commands were created along the northwestern western southwestern and North Caucasus strategic directions during 1941-42 However the highly unfavorable strategic situation during the first year of the war as well as interference in day to day operations by Stalin severely limited the high commands effectiveness As a consequence the high commands were abolished in mid 1942 and replaced by the more flexible system of supreme command representatives at the front A High

Command of Soviet Forces in the Far East was established in 1945 and oversaw the Red Army's highly effective campaign against Japanese forces in Manchuria. The Far Eastern High Command was briefly resurrected in 1947 as a response to the tense situation along the Korean peninsula and the ongoing civil war in China but was abolished in 1953 soon after Stalin's death. Growing tensions with China brought about the recreation of the Far Eastern High Command in 1979 followed a few years later by the appearance of new high commands in Europe and South Asia. However, these new high commands did not long survive the collapse of the Soviet Union in 1991 and were abolished a year later. The book relies almost exclusively on Soviet and post-communist archival and other sources and is the first unclassified treatment of this subject in any country East or West.

This second edition has been thoroughly revised and updated. It is the first one-volume strategic history textbook on the market. It covers all the major wars of the past two centuries. It is up to date and comprehensive, including a new section on the American Civil War, a new chapter on geography and strategy, and completely rewritten chapters on Iraq and Afghanistan in the 2000s and on irregular warfare. War, Peace and the Military Franz Kernic, 2023-03-17

This book is a comprehensive analysis of the various social science approaches to explaining and interpreting war, peace, and the military. Its central aim is to trace and reconstruct those basic assumptions, constructed and thought processes undertaken by modern social sciences in their research and conceptualization of military violence and the use of force. In addition to such reconstruction, the aim is also to enquire into the preconditions of such thought. This study therefore eschews the development of an explicit strategy in the sense of a research strategy but instead is much more concerned with thinking about its subject matter by means of rethinking and reflecting upon different theoretical approaches and problems. The investigation includes a critical reexamination of the tradition of military sociological research from the beginning of modern sociology to late twentieth-century theoretical approaches regarding the security-focused and/or war-driven aspects of modern society.
