Catwatching Desmond Morris, 2011-10-19 This book the first in the popular Watching series explains everything from why cats purr to why we say it s raining cats and dogs 26 black and white photographs **Westermead** Scott Thomas, 2005 Readers are invited to follow the intrepid documentarians Purdy and Beech on their hunt for the fearsome Frost Mare and to learn the secret of the stranger whose life little Melly saved in *Four Bronze Sisters* **Motherland** Pamela Marin, 2007-11-01 Pamela Marin was fourteen when her mother died of breast cancer After keeping her illness a secret from her daughter Mildred Marin left her home in Evanston Illinois to spend her last months alone and without treatment in California When she died in 1973 her husband buried the family s memories with her clearing the house of her belongings avoiding any mention of her and never once taking his young daughter to her mother s grave Before Marin was out of her teens her father went bankrupt and moved in with his thirty years younger girlfriend Now in this luminous memoir written with rare grace and unflinching honesty Marin chronicles how she came to reject her father s dismissal of the past and ultimately to embark on a cross country search for traces of the mother she never really knew With family and home gone Marin got to work supporting herself first as a waitress in Chicago s northside bars then as a secretary and finally as a journalist landing a job as a staff writer at a newspaper in Southern California when she was twenty seven Two years later happily ensconced in a beach house with the man who would become her husband and the father of her children Marin began to dream about the mother who d been gone for more than half her life Those haunting dreams led to the quest at the heart of *Motherland* Fifteen years after Mildred Marin s death the author dropped out of her own life to research her mother s Using her reporter s skills Marin traveled to Tennessee where her mother was born and reared to Chicago where her mother worked as a commercial artist and met the man she would marry and back to California where Mildred Marin went to die Along the way Marin collected treasured artifacts as well as others memories of her mother She confronted her father about the silence that enshrouded his wife s illness and death causing a rift in their relationship that would last until he died a decade later *Motherland* is a journey shot through with love and pain It is a story of loss discovery and ultimately forgiveness By coming to terms with her mother s life Pamela Marin opened the way for the emotional intimacy she had craved as a child and finally found in her own motherhood **Milk Quality** Frank Harding, 1995-12-31 Milk and dairy products are a major part of the human diet in many countries It is not surprising therefore that considerable attention is paid to obtaining the best possible quality of milk by improving the yield compositional quality and hygienic quality and minimizing the level of contaminants at all stages of milk production This book provides easily understood background knowledge of milk quality problems It identifies the quality parameters of significance and explains what they are why they are important and how they are measured Practical help is given for the sampling and testing of milk Most important of all the value of good quality milk and how it can be produced and maintained are stressed This volume is essential reading for dairy scientists and technologists

Cat in the Pulpit Lois Sink,2003-02 **The Foundations of Ethology** K. Lorenz,2013-04-17 This book is a contribution to the history of ethology not a definitive history but the personal view of a major figure in that story It is all the more welcome because such a grand theme as ethology calls for a range of perspectives One reason is the overarching scope of the subject Two great questions about life that constitute much of biology are How does it work structure and function and How did it get that way evolution and ontogeny Ethology addresses the antecedent of it Of what are we trying to explain the mechanism and development Surely behavior in all its wealth of detail variation causation and control is the main achievement of animal evolution the essential consequence of animal structure and function the *raison d'être* of all the rest Ethology thus spans between and overlaps with the ever widening circles of ecology over the eons and the ever narrowing focus of physiology of the neurons Another reason why the history of ethology needs perspectives is the recency of its acceptance For such an obviously major aspect of animal biology it is curious how short a time less than three decades has seen the excitement of an active field and a substantial fraternity of workers the addition of professors and courses to departments and curricula in biology still far from universal and the normal complement of special journals symposia and sessions at congresses
