Model Shipwright 124 Issue 124:

Labour Co-partnership, 1899 Model Shipwright 124 John Bowen, 2004-01-16 This quarterly journal since its launch in 1972 has been regarded as the world's leading ship modelling publication. The mixture of articles, reviews, news and comment from modelmakers world wide provides the best and most detailed information available anywhere and is enhanced with authentic plans, clear diagrams and many photographs. Although the miniature ships are the most important feature of the journal, with articles explaining how individual models were researched and constructed, the other aspects of model making have not been forgotten: dioramas, modelling techniques, tools and recent events are all covered. Each issue of the journal comes complete with a free large scale modeller's draught with accompanying modelling notes, illustrations and specifications for a featured vessel.

The Battlecruiser HMS HOOD Bruce Taylor, 2008-04-30 The battlecruiser HMS Hood is one of the great warships of history. Unmatched for beauty, unequalled for size, for twenty years the Hood was the glory ship of the Royal Navy, flying the flag across the world in the twilight years of the British Empire. Here, in words, photos and colour illustrations, is the story of her life, her work and her people, from keel laying on the Clyde in 1916 to destruction at the hands of the Bismarck in 1941. Among the eye-catching strengths of the book is a unique gallery of photos, including stills from a recently discovered piece of colour footage of the ship, plus a spectacular set of computer-generated images of both the exterior and interior by the world's leading exponent of the art, a man who worked with the film director James Cameron of Titanic fame. A wealth of new information on Hood's structure and operation makes it essential reading for the enthusiast, modeller and historian alike. Hugely successful from its first publication, this is the third printing of the ultimate book on the ultimate ship of the pre-war era.

Pepys's Navy J. D. Davies, 2008-11-20 This new reference book describes every aspect of the English navy in the second half of the seventeenth century, from the time when the Fleet Royal was taken into Parliamentary control after the defeat of Charles I until the accession of William and Mary in 1689, when the long period of war with the Dutch came to an end. This is a crucial era which witnessed the creation of a permanent naval service, in essence the birth of the Royal Navy. Every aspect of the navy is covered: naval administration, ship types and shipbuilding, naval recruitment and crews, seamanship and gunnery, shipboard life, dockyards and bases, the foreign navies of the period and the three major wars which were fought against the Dutch in the Channel and the North Sea. Samuel Pepys, whose thirty years of service did so much to replace the ad hoc processes of the past with systems for construction and administration, is one of the most significant players in the navy which was by 1690 ready for the 100 years of global struggle with the French. Owing much to his tireless work, this book is destined to become a major work for historians, naval enthusiasts and indeed anyone with an interest in this colourful era of the seventeenth century.

to maritime historians archaeologists model makers and nautical enthusiasts across the board Colin Martin The Nautical Archaeology Society A remarkable piece of work J D Davies Historian and Author Inspired by the recent discovery of mathematically calculated digital plans for a fourth rate ship by the Deptford master shipwright John Shish The Master Shipwright s Secrets is an illustrated history of Restoration shipbuilding focused on the Tyger one of the smaller but powerful two deck warships of the period It examines the proceedings of King Charles II in deciding the types of ship he wanted and his relationship with his master shipwrights This fascinating book reveals the many secrets of Charles II s shipwrights through an analysis of John Shish s plans for the Tyger revealing innovative practical calculations which differ significantly from the few contemporary treatises on the subject and the complicated process of constructing the moulds necessary to make the ship s frame All the other duties performed by the master shipwrights such as repairing ships controlling their men and keeping up with the latest inventions are also discussed in detail The Master Shipwright s Secrets is replete with beautiful and detailed illustrations of the construction of the Tyger and explores both its complicated history and its complex rebuilding complete with deck plans internal sections and large scale external shaded drawings The title also explores associated ships including another fourth rate ship the Mordaunt which was purchased into the Navy at the time and underwent a dimensional survey by John Shish A rare contemporary section drawing of another fourth rate English ship and constructional drawings of Shish s later fourth rate ship St Albans are also included

Constructing the Spanish Empire in Havana Evelyn Jennings,2020-12-16 Constructing the Spanish Empire in Havana examines the political economy surrounding the use of enslaved laborers in the capital of Spanish imperial Cuba from 1762 to 1835 In this first book length exploration of state slavery on the island Evelyn P Jennings demonstrates that the Spanish state s policies and practices in the ownership and employment of enslaved workers after 1762 served as a bridge from an economy based on imperial service to a rapidly expanding plantation economy in the nineteenth century The Spanish state had owned and exploited enslaved workers in Cuba since the early 1500s After the humiliating yearlong British occupation of Havana beginning in 1762 however the Spanish Crown redoubled its efforts to purchase and maintain thousands of royal slaves to prepare Havana for what officials believed would be the imminent renewal of war with England Jennings shows that the composition of workforces assigned to public projects depended on the availability of enslaved workers in various interconnected labor markets within Cuba within the Spanish empire and in the Atlantic world Moreover the site of enslavement the work required and the importance of that work according to imperial priorities influenced the treatment and relative autonomy of those laborers as well as the likelihood they would achieve freedom As plantation production for export purposes emerged as the most dynamic sector of Cuba s economy by 1810 the Atlantic networks used to obtain enslaved workers showed increasing strain British abolitionism exerted additional pressure on the slave trade To offset the loss of access to enslaved laborers colonial officials expanded the state s authority to sentence deserters vagrants and fugitives both enslaved and free to labor in public works such as civil

construction road building and the creation of Havana's defensive forts State efforts in this area demonstrate the deep roots of state enslavement and forced labor in nineteenth century Spanish colonialism and in capitalist development in the Atlantic world Constructing the Spanish Empire in Havana places the processes of building and sustaining the Spanish empire in the imperial hub of Havana in a comparative perspective with other sites of empire building in the Atlantic world Furthermore it considers the human costs of reproducing the Spanish empire in a major Caribbean port the state's role in shaping the institution of slavery and the experiences of enslaved and other coerced laborers both before and after the beginning of Cuba's sugar boom in the early nineteenth century
