## **Model Shipwright 128:**

Model Shipwright 128 John Bowen, Jr., 2005-02 This quarterly journal since its launch in 1972 has been regarded as the world's leading ship modelling publication. The mixture of articles, reviews, news and comment from modelmakers world wide provides the best and most detailed information available anywhere and is enhanced with authentic plans, clear diagrams and many photographs. Although the miniature ships are the most important feature of the journal, with articles explaining how individual models were researched and constructed, the other aspects of model making have not been forgotten: dioramas, modelling techniques, tools and recent events are all covered. Each issue of the journal comes complete with a free large scale modeller's draught with accompanying modelling notes, illustrations and specifications for a featured vessel. *The Master Shipwright's Secrets* Richard Endsor, 2020-03-05 AWARDED THE ANDERSON MEDAL 2020 This splendid book will appeal to maritime historians, archaeologists, model makers and nautical enthusiasts across the board. Colin Martin, The Nautical Archaeology Society. A remarkable piece of work. J. D. Davies, Historian and Author. Inspired by the recent discovery of mathematically calculated digital plans for a fourth rate ship by the Deptford master shipwright John Shish, *The Master Shipwright's Secrets* is an illustrated history of Restoration shipbuilding focused on the Tyger, one of the smaller but powerful two deck warships of the period. It examines the proceedings of King Charles II in deciding the types of ship he wanted and his relationship with his master shipwrights. This fascinating book reveals the many secrets of Charles II's shipwrights through an analysis of John Shish's plans for the Tyger, revealing innovative practical calculations which differ significantly from the few contemporary treatises on the subject and the complicated process of constructing the moulds necessary to make the ship's frame. All the other duties performed by the master shipwrights such as repairing ships, controlling their men and keeping up with the latest inventions are also discussed in detail. *The Master Shipwright's Secrets* is replete with beautiful and detailed illustrations of the construction of the Tyger and explores both its complicated history and its complex rebuilding, complete with deck plans, internal sections and large scale external shaded drawings. The title also explores associated ships including another fourth rate ship, the Mordaunt, which was purchased into the Navy at the time and underwent a dimensional survey by John Shish. A rare contemporary section drawing of another fourth rate English ship and constructional drawings of Shish's later fourth rate ship, St Albans, are also included. *Catalogue of the Naval Models in the South Kensington Museum* South Kensington Museum, 1865 *Boston Directory*, 1855 **The Boston Directory**, 1873

**Directory of the City of Boston**, 1862 *British Books in Print*, 1986 **The Mariner's Mirror** Leonard George Carr, Laughton, Roger Charles Anderson, William Gordon Perrin, 1923 *The Ship of the Line* Brian Lavery, 2015-01-14 The National Maritime Museum in Greenwich houses the largest collection of scale ship models in the world, many of which are official contemporary artefacts made by the craftsmen of the navy or the shipbuilders themselves and ranging from the mid seventeenth century to the present day. As such they represent a three dimensional archive of unique importance and

authority Treated as historical evidence they offer more detail than even the best plans and demonstrate exactly what the ships looked like in a way that even the finest marine painter could not achieve The Ship of the Line is the second of a new series that takes selections of the best models to tell the story of specific ship types in this case the evolution of the ship of the line the capital ship of its day and the epitome of British seapower during its heyday from 1650 1850 This period too coincided with the golden age of ship modelling Each volume depicts a wide range of models all shown in full colour including many close up and detail views These are captioned in depth but many are also annotated to focus attention on interesting or unusual features and the book weaves the pictures into an authoritative text producing a unique form of technical history The series is of particular interest to ship modellers but all those with an enthusiasm for the ship design and development in the sailing era will be attracted to the in depth analysis of these beautifully presented books

**British Warships in the Age of Sail, 1603-1714** Rif Winfield, 2010-03-10 The 1st volume in this comprehensive reference series details the design and employment of British warships in the 17th and early 18th centuries During the seventeenth century Britain transformed from a minor state into a global economic power with the largest navy in the world The character of this navy was forged by a bloody civil war three fiercely disputed conflicts with the Dutch and the first of many wars with the French In the process British naval ships evolved from the galleons that had defeated the Spanish Armada to prestige vessels like HMS Sovereign of the Seas and the lightly built frigates of the Commonwealth era This detailed and authoritative reference volume outlines the history of every ship built purchased or captured that saw naval service during this era Like its companion volumes the book is organized by Rate classification and class The technical and building data of each ship is followed by a concise summary of its career With its unique depth of information this is a work of the utmost importance to every naval historian and general reader interested in the navy of the sailing era

**Mycenaean Greece and the Aegean World** Margaretha Kramer-Hajos, 2016-08-15 In this book Kramer Hajos examines the Euboean Gulf region in Central Greece to explain its flourishing during the post palatial period Providing a social and political history of the region in the Late Bronze Age she focuses on the interactions between this provincial coastal area and the core areas where the Mycenaean palaces were located Drawing on network and agency theory two current and highly effective methodologies in prehistoric Mediterranean archaeology Kramer Hajos argues that the Euboean Gulf region thrived when it was part of a decentralized coastal and maritime network and declined when it was incorporated in a highly centralized mainland looking network Her research and analysis contributes new insights to our understanding of the mechanics and complexity of the Bronze Age Aegean collapse
