Informational Decentralization: Complexity, Efficiency, and Stability John O. Ledyard,2012-12-06 In this volume are papers

written by students and co authors of Stanley Reiter The collection reflects to some extent the range of his interests and intellectual curiosity He has published papers in statistics management science international trade and welfare economics

He co authored early papers in economic history and is reported to be largely responsible for giving the field its name of Cliometrics He helped initiate nurture and establish the area of economics now known as mechanism design which studies

information decentralization incentives computational complexity and the dynamics of decentralized interactions The quality craft depth and innovative nature of his work has always been at an exceptionally high level Stan has had a strong and

important direct effect on many students at Purdue University and Northwestern University He created and taught a course which all of his students have both dreaded and respected Using the Socratic method in remarkably effective ways to teach

theory skills he has guided prodded and encouraged us to levels we did not think we were capable of Some of his students are represented in this volume But even those whose careers took directions other than mathematical economics still

consider that training to be an important component of their success Stan s students include department chairmen business executives Deans a Secretary of the Air Force and a College President His guidance has been necessary and fundamental to
