Modeling How One Parent Started Her Children:

Handbook of Parenting: Being and becoming a parent Marc H. Bornstein, 2002 Completely revised and expanded from four to five volumes this new edition of the Handbook of Parenting appears at a time that is momentous in the history of parenting Parenting and the family are today in a greater state of flux question and redefinition than perhaps ever before We are witnessing the emergence of striking permutations on the theme of parenting blended families lesbian and gay parents and teen versus fifties first time moms and dads One cannot but be awed on the biological front by technology that now not only renders postmenopausal women capable of childbearing but also presents us with the possibility of designing babies Similarly on the sociological front single parenthood is a modern day fact of life adult child dependency is on the rise and parents are ever less certain of their own roles even in the face of rising environmental and institutional demands that they take increasing responsibility for their offspring The Handbook of Parenting concerns itself with different types of parents mothers and fathers single adolescent and adoptive parents basic characteristics of parenting behaviors knowledge beliefs and expectations about parenting forces that shape parenting evolution genetics biology employment social class culture environment and history problems faced by parents handicap marital difficulties drug addiction and practical concerns of parenting how to promote children's health foster social adjustment and cognitive competence and interact with school legal and public officials Contributors to the Handbook of Parenting have worked in different ways toward understanding all these diverse aspects of parenting and all look to the most recent research and thinking in the field to shed light on many topics every parent wonders about Each chapter addresses a different but central topic in parenting each is rooted in current thinking and theory as well as classical and modern research in that topic each has been written to be read and absorbed in a single sitting In addition each chapter follows a standard organization including an introduction to the chapter as a whole followed by historical considerations of the topic a discussion of central issues and theory a review of classical and modern research forecasts of future directions of theory and research and a set of conclusions Of course contributors own convictions and research are considered but contributions to this new edition present all major points of view and central lines of inquiry and interpret them broadly The Handbook of Parenting is intended to be both comprehensive and state of the art As the expanded scope of this second edition amply shows parenting is naturally and closely allied with many other fields

Models and Mirrors Don Handelman, 1998 Ritual is one of the most discussed cultural practices yet its treatment in anthropological terms has been seriously limited characterized by a host of narrow conceptual distinctions One major reason for this situation has been the prevalence of positivist anthropologies that have viewed and summarized ritual occasions first and foremost in terms of their declared and assumed functions By contrast this book which has become a classic investigates them as epistemological phenomena in their own right Comparing public events a domain which includes ritual and related occasions the author argues that any public event must first be comprehended through the logic of its design It is the logic of

organization of an occasion which establishes in large measure what that occasion is able to do in relation to the world within which it is created and practiced

The Parent-Child Dance Ronald A. Kotkin, Aubrey H. Fine, 2015-06-16 A unique manual to raising a child for parents everywhere using the metaphor of dance to provide expert comforting advice Having children and raising a family should be the greatest joy in one's life but it is a role that requires tremendous responsibility and patience As parents our job is to provide a strong foundation for our children so that they can eventually grow up to become self-sufficient adults However just like everything in life all children are different some requiring more support than others and to varying degrees over time Parenting is like a dance between parent and child The more seamless the movements the more graceful the interaction When a parent takes the lead or decides to share over time with practice the dance can be smooth and effortless Nevertheless when the child is unintentionally allowed to take the lead the parent-child dance may appear more rocky and unstable This often occurs when the parent is unclear and at odds with their role The ensuing battle for the lead may cause disharmony in the relationship and the dance Parenting is a lifelong commitment that takes patience thoughtfulness and skill The Parent-Child Dance is designed to explain the concept of the dance and act as a catalyst for encouraging parents to begin their journey in making positive changes in their child's life Parents will recognize the scenarios and gain insight through humorous examples and step by step strategies to avoid disharmony
