**Knowledge Production in European Universities** Kwiek Marek, 2012-11-23 The book studies transformations of European universities in the context of globalization and Europeanization the questioning of the foundations of the Golden Age of the Keynesian welfare state public sector reforms

demographic changes the massification and diversification of higher education and the emergence of knowledge economies Such phenomena as academic entrepreneurialism and diversified channels of knowledge exchange in European universities are linked to transformations of the state and changes in public sector services The first contextual part of the book studies the changing state university relationships and the second empirically informed part draws from several recent large scale comparative European research projects Changing Models of Capitalism in Europe and the U.S. Richard Deeg, Gregory Jackson, 2016-04-14 The volume analyzes the long term trajectories of change in the capitalist models of the UK Germany Sweden France Italy Hungary Slovakia and the United States The case studies identify critical junctures and key periods of change in order to show how institutions are shaped by different sets of socio political compromises and public policy The case studies follow a common methodology comparing change and linkages across six core institutional domains thus facilitating a comparative understanding of the patterns and drivers of institutional change as well as how liberalisation impacts countries in similar and dissimilar ways The historical perspective of the cases highlights the transformative effects of relatively slow and incremental changes These case studies also make an innovative contribution to examining the linkages between four levels of institutions that regulate the economy the international macro national meso and micro The volume reveals both a common trend toward more liberal forms of capitalism but also variations on this overarching trajectory Markets themselves create their own dynamics which have varied effects on firms and other economic actors in historically diverse institutional contexts This book was originally published as a special issue of the Journal of European Public Policy

*The Politics of Work-Family Policy Reforms in Germany and Italy* Agnes Blome, 2016-11-25 One of the fundamental challenges facing modern welfare states is the question of work family reconciliation An increasing share of mothers work but many European welfare states do not adequately support the dual earner model especially in southern Europe After 2005 German policy makers transformed the nature of Germany's family policy regime through a number of legislative measures whilst Italy a country with many similarities witnessed little change Using a multi methods approach this book addresses the puzzle of why Germany was able to implement far reaching reforms in this policy area after a long impasse and Italy was not As such it delivers a broad systematic account of these reforms and sheds light on why similar reforms were not also adopted in other similar welfare states at the same time More generally it contributes to understanding the determinants of welfare policy change in modern European welfare states This text will be of key interest to scholars students and professionals working on topics linked to European politics welfare and work family policies comparative politics social policy and more broadly to political science and gender studies The Theory of Social Democracy Thomas Meyer, Lewis Hinchman, 2007-09-24 The ascendancy of neo liberalism in different parts of the world has put social democracy on the defensive Its adherents lack a clear rationale for their policies Yet a justification for social democracy is implicit in the United Nations Covenants on Human Rights ratified by most of the worlds countries The covenants commit all nations to guarantee

that their citizens shall enjoy the traditional formal rights but they likewise pledge governments to make those rights meaningful in the real world by providing social security and cultural recognition to every person This new book provides a systematic defence of social democracy for our contemporary global age The authors argue that the claims to legitimation implicit in democratic theory can be honored only by social democracy libertarian democracies are defective in failing to protect their citizens adequately against social economic and environmental risks that only collective action can obviate Ultimately social democracy provides both a fairer and more stable social order But can social democracy survive in a world characterized by pervasive processes of globalization This book asserts that globalization need not undermine social democracy if it is harnessed by international associations and leavened by principles of cultural respect toleration and enlightenment The structures of social democracy must in short be adapted to the exigencies of globalization as has already occurred in countries with the most successful social democratic practices      Basic Income, Unemployment and Compensatory Justice Loek Groot, 2012-11-06 Basic income is a regularly debated topic in various scholarly disciplines political philosophy political theory welfare economics labour market economics and social policy and in circles of policy makers administrators and activists Since the late 1970s unemployment is the primary problem for social economic policy in all welfare states In Basic Income Unemployment and Compensatory Justice it is argued that implementing a substantial basic income is the best policy response to deal with unemployment induced problems such as job insecurity social exclusion poverty and lack of compensatory justice on the labour market and to improve labour market flexibility boost low wage employment and part time work Basic Income Unemployment and Compensatory Justice with an introductory chapter by Philippe van Parijs discusses the attractiveness of a substantial basic income to deal with the problem of unemployment in combination with an ethical perspective of social justice Loek Groot is a senior lecturer at the Utrecht School of Economics

future of Social Europe and its main dynamics of change The European Social Model Adrift will appeal to scholars of sociology social policy and politics with interests in social cohesion the effects of financial crisis and the European social model *Alternative Political Economy Models of Transition* Marangos, *Alternative Political Economy Models of Transition* John Marangos, 2017-07-05 The collapse of centrally administered socialism in Russia and Eastern Europe resulted in what is commonly referred to as the transition problem the transformation from a centrally administered socialist economic system to one that is market based Economic science has been faced with the challenge of developing an appropriate body of analysis advice and direction to help other nations that may be undergoing this process In this volume John Marangos adopts a political economy approach that yields alternative models of transition The volume develops transition models from what Marangos defines as the primary elements of six variables 1 economic analysis 2 definitions of the Good Society 3 speed of transition 4 political structure 5 ideological structure and 6 initial conditions The models developed include the shock therapy model the neoclassical gradualist model of transition the post Keynesian model the pluralistic market the socialist model and the non pluralistic market socialist model After identifying the primary elements of each transition model Marangos considers the elements of each model with respect to the desirable reforms An essential element of the transition process is not only to identify the necessary reforms but also a sequence in which the reforms should be introduced For each transition model developed in this book a set of primary and secondary elements were provided in conjunction with a sequence of reforms Analyzing the transition problem from a political economy perspective Marangos shows that it is possible to have inconsistencies within each transition model and between transition models yet be able to identify the potential for implementation and maintenance of necessary reforms each model recommends This volume contributes to the understanding of the process of transition with the objective of identifying an optimal model of transition
