Models Boxes Get Crafty:

The Craft of Model-Based Testing Paul C. Jorgensen, 2017-05-08 In his latest work author Paul C Jorgensen takes his well honed craftsman s approach to mastering model based testing MBT To be expert at MBT a software tester has to understand it as a craft rather than an art This means a tester should have deep knowledge of the underlying subject and be well practiced in carrying out modeling and testing techniques Judgment is needed as well as an understanding of MBT the tools The first part of the book helps testers in developing that judgment It starts with an overview of MBT and follows with an in depth treatment of nine different testing models with a chapter dedicated to each model These chapters are tied together by a pair of examples a simple insurance premium calculation and an event driven system that describes a garage door controller The book shows how simpler models flowcharts decision tables and UML Activity charts express the important aspects of the insurance premium problem It also shows how transition based models finite state machines Petri nets and statecharts are necessary for the garage door controller but are overkill for the insurance premium problem Each chapter describes the extent to which a model can support MBT The second part of the book gives testers a greater understanding of MBT tools It examines six commercial MBT products presents the salient features of each product and demonstrates using the product on the insurance premium and the garage door controller problems These chapters each conclude with advice on implementing MBT in an organization The last chapter describes six Open Source tools to round out a tester s knowledge of MBT In addition the book supports the International Software Testing Qualifications Board s ISTQB MBT syllabus for certification

Stop Motion: Craft Skills for Model Animation Susannah Shaw, 2012-09-10 To make great animation you need to know how to control a whole world how to make a character how to make that character live and be happy or sad You need to create four walls around them a landscape the sun and moon a whole life for them You have to get inside that puppet and first make it live then make it perform Susannah Shaw provides the first truly practical introduction to the craft skills of model animation This is a vital book in the development of model animation which following the success of Aardman s first full length film *Chicken Run* is now at the forefront of modern animation Illustrated in full colour throughout you are shown step by step how to create successful model animation Starting with some basic exercises readers will learn about developing a story making models creating sets and props the mechanics of movement filming post production and how to set about finding that elusive first job in a modern studio
