career assessments of High Tech practitioners such as Norman Foster Richard Rogers and Renzo Piano Gannon devotes significant attention to Banham's late work including fresh archival materials related to *Making Architecture The Paradoxes of High Tech* the manuscript he left unfinished at his death in 1988 For the first time readers will have access to Banham's previously unpublished draft introduction to that book [The New Moderns](#) Charles Jencks,1990 Dialogues with neo modernists Peter Eisenman Philip Johnson Richard Meier Fumihiko Maki pictorial surveys of Frank Gehry Rem Koolhaas Norman Foster Richard Rogers I M Pei **Encyclopedia of Twentieth Century Architecture** R. Jencks,1978 *The Baroque in Architectural Culture, 1880-1980* Andrew Leach,John Macarthur,2016-03-09 In his landmark volume *Space Time and Architecture* Sigfried Giedion paired images of two iconic spirals Tatlin's Monument to the Third International and Borromini's dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread As Giedion put it writing of Sant

Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there And yet he merely groped towards that which could be completely effected in modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture

Elisabeth Beazley, 2024-05-24 Originally published in 1962 this book traces the main influences behind modern design in domestic architecture It does so against the context of the effect each new dwelling has on its environment and the effect its design has on those in the surrounding and often older historic housing stock Diverse influences such as the bye law street and Le Corbusier's Ville Radieuse are discussed while the ideas bearing on the individual private house range from those of the early nineteenth century villa builders to Frank Lloyd Wright's prairie houses and the work of Mies van der Rohe The book closes with a detailed discussion of the problems and possibilities of domestic design in house building in the late 20th Century
