an organization Liz Mellon who writes to her CEO about gender equality in the workplace Chris Zook explaining how a change of mentality can lead to exponential growth and Linda Brimm who discusses managing global cosmopolitans and a modern workforce Dear CEO also features a foreword by Zhang Ruimin Chairman and CEO of Haier Group The Power Trap Nik Kinley, 2025-07-12 We have an entirely messed up relationship with power It is something that almost everyone wants that promises much and can help us achieve great things Yet power isn't something we openly talk about or understand and that's a problem While power is an essential part of every leadership role it is also a difficult and sometimes toxic partner that changes everyone who holds it And often in ways that make being a good leader much harder Approached carefully however the worst of power's negative effects can be avoided and balanced by its positives This book shows you how It reveals what power does to people and how it both affects them as leaders and the people they lead And it shows how in turn leaders can affect the positions of power they hold too Incorporating the latest neuroscience the book offers clear lessons for how to successfully manage power For leaders it provides practical advice on how to survive having power avoiding its worst effects For organisations and institutions it is about how to ensure that the people who have power are equipped and supported to thrive with it And for us all as people who choose and follow leaders it is about how we can identify those most at risk of falling to power's dark side Ultimately this book provides a plan for how we can have a healthier relationship with power so that as individuals we can be better leaders and as organisations and societies we can be better led The Blessings of Disaster Michel Bruneau, 2022-11-08 Are we doomed As individuals certainly eventually inevitably But as a species As a civilization Leading catastrophe engineer Michel Bruneau thinks perhaps not The Blessings of Disaster draws on knowledge from multiple disciplines to illustrate how our civilization's future successes and failures in dealing with societal threats be they pandemics climate change overpopulation monetary collapse and nuclear holocaust can be predicted by observing how we currently cope with and react to natural and technological disasters Maybe most importantly this entertaining and often counter intuitive book shows how we can think in better ways about disasters to strengthen and extend our existence as both individuals and as a species When it comes to rare extreme events such as earthquakes hurricanes floods tornados volcanic eruptions technological accidents terrorist attacks pandemics and even existential threats it is in our nature to set ourselves up for disasters because the gamble may be worth it But only maybe The Blessing of Disaster is the very real story of the relationship between humans and disasters and it's not a simple one Bringing together his decades long career spanning the globe as an earthquake and disaster engineer detailed catastrophe case studies from extreme events like Japan's Kobe earthquake and category 5 hurricanes in the American South along with thoughtful and practical solutions Bruneau provides a thorough examination of the structural challenges that face today's and tomorrow's world How we cope with today's threats is indicative of what the future holds Contrary to popular forecasts it is not all gloom and doom but some of it definitely is Shapeholders Mark R. Kennedy, 2017-05-09 Today all it takes is one organizational

misstep to sink a company's reputation Social media can be a strict ethical enforcer with the power to convince thousands to boycott products and services Executives are stuck on appeasing stakeholders shareholders employees and consumers but they ignore shapeholders regulators the media and social and political activists who have no stake in a company but will work hard to curb what they see as bad business practices And they do so at their own peril In Shapeholders Business Success in the Age of Activism former congressman Fortune 500 executive and university president Mark Kennedy argues that shapeholders as much as stakeholders have significant power to determine a company's risks and opportunities if not its survival Many international multi billion dollar corporations fail to anticipate activism and they flounder on first contact Kennedy zeroes in on the different languages that shapeholders and companies speak and their contrasting metrics for what constitutes acceptable business practice Executives he argues must be visionaries who find profitable and probable collaborations to diffuse political tensions Kennedy's decision matrix helps corporations align their business practices with shapeholder interests anticipate their demands and assess changing moral standards so that together they can plan a profitable route forward
