School Choice In The Real World Robert Maranto, 2018-04-27 This book presents the first published accounts and evaluations of the first free market in education in the U.S. Arizona charter schools. The charter school is fast becoming one of the most significant attempts at public education reform in this country. Over 1100 charter schools operate in twenty-seven states with several hundred more to be added in the next two years. *School Choice in the Real World* looks at the charter school movement through a highly focused lens. It examines charter schools in Arizona which currently account for nearly one quarter of all charter schools. Using this state as a case study, the editors examine the experiences of actual charter school operators, social scientific analysis, policy discussions, and criticism, and forecasting for the future. School choice is the most talked-about reform of American public education yet; writings about choice remain highly speculative because no state has adopted a free market approach to education until now. Secret Origins of Modern Microeconomics Robert Burton Ekelund,Robert F. Hébert,1999-03-15 Using documents previously unavailable in English the authors present a cohesive and original picture of French economic thought that solidly documents the contributions of Dupuit and his colleagues Ekelund and Hebert build their argument by focusing on the development of economic theory in the peculiar milieu of postrevolutionary France in an attempt to identify the essence of the French contribution and the extent to which the French legacy benefited other economists of international acclaim They conclude that the kinds of issues in economic theory and policy that Dupuit and his colleagues found arresting and worthy of analysis in the nineteenth century are still pertinent today and will continue to interest economists into the twenty first century This seminal work will be of great importance to historians of economics and all economists interested in the foundations of modern microeconomics **Microeconomics: Theory and Applications, 4rd Edition 599** Dwivedi
