Modern Movement:

The Modern Movement Chris Baldick, 2004 A major new survey of literature in England during the first half of the twentieth century Chris Baldick places modernist with non modernist writings high art with low entertainment The Modern Movement ranges broadly covering psychological novels war poems detective stories satires children s books and other literary forms evolving in response to the new anxieties and exhilarations of twentieth century life

Dancefilm Erin Brannigan, 2011-02-09 Dancefilm Choreography and the Moving Image examines the choreographic in cinema the way choreographic elements inform cinematic operations in dancefilm It traces the history of the form from some of its earliest manifestations in the silent film era through the historic avant garde musicals and music videos to contemporary experimental short dancefilms In so doing it also examines some of the most significant collaborations between dancers choreographers and filmmakers The book also sets out to examine and rethink the parameters of dancefilm and thereby re conceive the relations between dance and cinema Dancefilm is understood as a modality that challenges familiar models of cinematic motion through its relation to the body movement and time instigating new categories of filmic performance and creating spectatorial experiences that are grounded in the somatic Drawing on debates in both film theory in particular ideas of gesture the close up and affect and dance theory concepts such as radical phrasing the gestural anacrusis and somatic intelligence and bringing these two fields into dialogue the book argues that the combination of dance and film produces cine choreographic practices that are specific to the dancefilm form The book thus presents new models of cinematic movement that are both historically informed and thoroughly interdisciplinary

The Modernist Movement in the Roman Church Alec R. Vidler, 2014-07-17 Originally published in 1934 this book examines the Modernist movement in Roman Catholicism from its beginnings around 1890 until its conclusion around 1910 Vidler examines the pre Modernist condition of Catholicism in France Germany Italy and England and the outcome of the modernist movement both within and outside of the Catholic Church This book will be of value to anyone with an interest in this tumultuous time in the development of Catholic theology

Modern Architecture Alan Colquhoun, 2002 In this study of the international modern movement in architecture Alan Colquhoun explores the complex motivations behind its revolutionary new style and assesses its triumphs and failures

Paolo Portoghesi Silvia Micheli, Léa-Catherine Szacka, 2023-10-19 Through the work of the Italian architect theorist and historian Paolo Portoghesi 1931 2023 this book offers a new perspective on postmodern architecture showing the agency of other spheres of knowledge history politics and media in the making of postmodern architectural discourse It explores how Portoghesi s personal postmodern project was based on the triangulation of a renewed interest in historical architectural language unprecedented use of media and intertwined links between architecture and politics Organized in a sequence of critical chapters supported by the analysis of Portoghesi s most significant architectural projects including Casa Baldi 1959 The Mosque in Rome 1975 95 and his Strada Novissima exhibition 1980 and publications the book unfolds around the three

main themes of history politics and media Published as part of the Bloomsbury Studies in Modern Architecture series which brings to light the work of significant yet overlooked modernist architects the study features previously unpublished archival material interviews by the authors and articles from professional and mainstream press to present Portughesi in his multifaceted role of mediator politician historian and designer **London** Anthony Sutcliffe, Professor Anthony Sutcliffe, 2006-01-01 London is one of the world's greatest cities and its architecture is a unique heritage The Tower of London is an urban castle unique in Europe St Paul's is one of the world's greatest domed cathedrals and the squares and crescents of the West End inspired Haussmann's Paris In London it is the variety of the streets buildings and parks that strikes the visitor No king or government has ever set its mark here Private ownership has shaped the city and architects have served a wide variety of clients London's Classical era produced an elegant townscape between 1600 and 1830 but medieval Tudor and Victorian London were a potpourri of buildings large and small each making its own design statement In *London An Architectural History* Anthony Sutcliffe takes the reader through two thousand years of architecture from the sublime to the mundane With over 300 color illustrations the book is intended for the general reader and especially those visiting London for the first time *The Buildings Around Us* Thom Gorst, 2003-09-02 Buildings surround and affect us all In this clear and concise introduction to buildings Thom Gorst demystifies the culture of architecture and shows how an interest in our environment whatever our cultural position can be of great value to us **The Modern Movement in Art** Reginald Howard Wilenski, 1957 *Modern Architectural Theory* Harry Francis Mallgrave, 2009-07-13 *Modern Architectural Theory* is the first book to provide a comprehensive survey of architectural theory primarily in Europe and the United States during three centuries of development In this synthetic overview Harry Mallgrave examines architectural discourse within its social and political context He explores the philosophical and conceptual evolution of its ideas discusses the relation of theory to the practice of building and most importantly considers the words of the architects themselves as they contentiously shaped Western architecture He also examines the compelling currents of French rationalist and British empiricist thought radical reformation of the theory during the Enlightenment the intellectual ambitions and historicist debates of the nineteenth century and the distinctive varieties of modern theory in the twentieth century up to the profound social upheaval of the 1960s *Modern Architectural Theory* challenges many assumptions about architectural modernism and uncovers many new dimensions of the debates about modernism **Ludwig Hilberseimer** Scott Colman, 2023-07-27 The German American architect art critic and urban planner Ludwig Hilberseimer was central to avant garde art and architecture in the Weimar Republic an important Bauhaus teacher and long standing collaborator of leading modern architect Ludwig Mies van der Rohe Despite being internationally known for his work on Lafayette Park in Detroit Hilberseimer's legacy as a whole has been obscured in the history of modern architecture Whether this is due to the intense shadow cast by Mies or by his oeuvre being split between the differing languages and contexts of interwar Germany and postwar North America this book argues

that the time is now right for a critical reassessment of Hilberseimer's work and writings Published as part of the Bloomsbury Studies in Modern Architecture series which brings to light the work of significant yet overlooked modernist architects this study clarifies and situates Hilberseimer's ideas both as an architect and writer and examines their influence on modern and contemporary architecture and urbanism The first synthetic account of Hilberseimer in English it provides a contextual account of Hilberseimer's works which have until now been subject to fragmentary or highly specialized interpretations By demonstrating the influence of Hilberseimer's ideas on the architecture of Mies van der Rohe the book also lends Mies's work a newfound urban significance *Architecture and Participation* Peter Blundell Jones, Doina Petrescu, Jeremy

Till, 2013-07-04 Bringing together leading international practitioners and theorists in the field ranging from the 1960s pioneers of participation to some of the major contemporary figures in the field *Architecture and Participation* opens up the social and political aspects of our built environment and the way that the eventual users may shape it Divided into three sections looking at the politics histories and practices of participation the book gives both a broad theoretical background and more direct examples of participation in practice Respectively the book explores participation's broader context outlining key themes and including work from some seminal European figures and shows examples of how leading practitioners have put their ideas into action Illustrated throughout the authors present to students practitioners and policy makers an exploration of how a participative approach may lead to new spatial conditions as well as to new types of architectural practices and investigates the way that the user has been included in the design process **Atrium** Charles

Rice, 2023-10-17 How the rise of the large scale atrium space in the 1970s and 80s changed the way buildings could be designed constructed regulated and occupied In the 1970s a void opened at the heart of architecture In hotels offices public buildings and commercial centers the atrium emerged globally to challenge the modernist legacies of form and function altering the pattern and experience of cities While often appearing at vast scale and to striking effect the atrium also became omnipresent and mundane In this lively critique Charles Rice charts the atrium's appearance in the 1970s and its development through the 1980s as it accompanied profound shifts in the discipline and practice of architecture During this period architectural practice especially in the United States and United Kingdom was changing rapidly due in part to the manifold effects of deregulation All aspects of the way buildings were designed developed regulated built managed and occupied were being reshaped A practice guided by the progressive tenets of modernism was being turned into a professional service fully integrated within neoliberal social and economic imperatives As Rice shows the atrium gives this story a distinct spatial and material figure one that offers an inside view of architecture in transformation *Architecture* Martin van der Linden, 2021-03-12 The question of what architecture is answered in this book with one sentence Architecture is space created for human activities The basic need to find food and water places these activities within a larger spatial field Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth

Thus rather than adapting humans have always tried to change the context to their activities Humanity has looked at the context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against the context and that this process is deterministic

History of Scottish Architecture Miles Glendinning,2019-07-30 At last here is a single volume authoritative history of Scottish architecture This compact yet comprehensive account combines factual description of the vast and fertile range of visual forms and key architects in each period with a wide ranging analysis of their social ideological and historical context As Scotland has often been closely involved with new trends in western architecture this book highlights the interaction of Scottish developments with broader European and international movements From the beginnings of the Renaissance in the 15th century right up to the 1990s this much needed survey covers the entire post medieval story in one volume

Behind the Postmodern Facade Magali Sarfatti Larson,2024-07-26 Magali Larson s comprehensive study explores how architecture happens and what has become of the profession in the postmodern era Drawing from extensive interviews with pivotal architects from Philip Johnson who was among the first to introduce European modernism to America to Peter Eisenman identified with a new deconstructionist style she analyzes the complex tensions that exist between economic interest professional status and architectural product She investigates the symbolic awards and recognition accorded by prestigious journals and panels exposing the inner workings of a profession in a precarious social position Larson captures the struggles around status place and power as architects seek to redefine their very purpose in contemporary America The author s novel approach in synthesizing sociological research and theory proposes nothing less than a new cultural history of architecture This is a ground breaking contribution to the study of

culture and the sociology of knowledge as well as to architectural and urban history This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1993 with a paperback edition in 1995 John Dalton Elizabeth Musgrave,2023-08-10 This book addresses the work of architect John Dalton 1927 2007 an important voice in mid century modernism in Australia whose work despite his being exhibited and published internationally and also winning several awards for his designs is woefully little known Published as part of the Bloomsbury Studies in Modern Architecture series which brings to light the work of significant yet overlooked modernist architects the book draws on previously unpublished archival documents including Dalton's drawings and paintings transcripts of lectures letters and articles plans and photographic images of built works to characterize the architect not only as a very talented designer but also as a pioneer of environmentalist thinking in Australia The book reveals how Dalton's architectural preoccupations parallel a transition in mid century modern architecture globally from functional efficiency and material rationalism to a concern with being in dialogue with the environment confirming a wider environmental turn that involved the integration of environmental with cultural considerations through relational thinking and which preceded and transcends the discipline's fascination with theoretical paradigms such as Critical Regionalism John Dalton Subtropical Modernism and the Turn to Environment in Australian Architecture is thus not only an important contribution to the existing scholarship on 20th century modernism but also to the current renewed interest in environmental design across the globe

The Classical Orders of Architecture Robert Chitham,2007-03-14 This is the only publication that presents a modern interpretation of the Classical Orders The new edition of this successful title now includes the proportions in both metric and imperial measurements to make the orders more accessible and to provide a valuable reference for designers The inclusion of both 100 part and 96 part systems of proportion is underpinned by an essay on James Gibbs one of the 18th century authors of standardized proportioning systems and his influence in America Along with additional plates this book gives a clear introduction to those not familiar with the classical genre and is an easy to follow guide which assists architects interior designers and conservators with the quality of their design
