Modern Architecture And Design An Alternative History:

Modern Architecture and Design Bill Risebero,1983 British architect and planner Bill Risebero recreates 200 years of modern architecture and design against a backdrop of class dominance over rising industrialism The lively and opinionated text and more than 1 000 captioned drawings by the author provide a refreshing reinterpretation of architectural developments in the modern period **Modern Architecture and Design: an Alternative History** Bill Risebero,1983

Modern Architecture and Design Bill Risebero,1983 This brisk tour of buildings engineering projects and artifacts produced throughout the world is a sequel to the author s very successful first book The Story of Western Architecture It traces the history of modern architecture together with relevant developments in design and technology from the early 19th century to the present day Risebero relates changing architectural ideas to changing currents in Western thought to Marx to Nietzsche to Darwin and to the conflicting philosophies of post modernism He describes and illustrates many of the grandest and most monumental projects built over the past 200 years and his admiration for these works is infectious even as he makes it clear that many were ordered and paid for by the wrong people for the wrong reasons He also includes the more recent and informal architecture of protest such as Third World squatter settlements The book is wide ranging and consciously attempts to bring in some of the lost innovators of mechanical production as well as the names one would expect to find in a text that moves from the great Victorian engineers to Schinkel from Haussmann s Paris to English suburbia from Modernism to Catalonia to Frank Lloyd Wright from Art Deco to the London Underground from welfare state housing to the Sydney Opera House William Morris emerges as a key figure in the story as do the Russian Constructivists and of course the Bauhaus designers Bill Risebero has worked as both an architect and a planner He has designed urban housing developments prepared environmental and conservation studies of London and taught British and American architectural students Modern Architecture and Design Risebero,1985 **Modern Architecture and Design** ,1990 **Modern**

The Icon Project Leslie Sklair,2017 The Icon Project argues that the transnational capitalist class mobilizes two forms of iconic architecture unique icons recognized as works of art notably designed by global starchitects such as Frank Gehry and Zaha Hadid and typical icons copying elements of unique icons to promote the same ideological message the culture ideology of consumerism

Encyclopedia of Twentieth Century Architecture R. Stephen Sennott,2004 A balance of sophistication and clarity in the writing authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an

especially useful source on a century of the world's most notable architecture. The contents feature major architects, firms and professional issues, buildings, styles and sites, the architecture of cities and countries, critics and historians, construction materials and planning topics, schools, movements and stylistic and theoretical terms. Entries include well selected bibliographies and illustrations. Reference that rocks American Libraries May 2005 **Region** Simon Richards, Robert Schmidt III, Cagri Sanliturk, Falli Palaiologou, 2023-07-28 This book explores how the concept of region has evolved over time and shaped architectural culture and practice. It questions what the words region and regional mean for architecture, cities and landscapes past and present and speculates on the forms they might take in the future. Region is explored in many thematic guises: as a real geographical site of evolving socio-economic activity; as a mythical locus of enduring value; as a gatekeeper of indigenous crafts and vernacular techniques; as a site of architectural and artistic imagination; as a repository of contested, conflicted and mobile identities. The contributing chapters take these themes from the theoretical and literary page through to architectural and urban practice and from the scale of the domestic hearth through to the ocean archipelago and international law, enriching the long standing trope of viewing architectural regionalism purely as a matter of style. Curated into four key thematic areas: Theorised Regions, Contested Regions, Heritage Regions and Future Regions, the book incorporates the values, concerns and approaches of a truly diverse international community of scholars, curators and practitioners as well as the design work of international students tasked to explore what region means to them. **Modern Architecture and an International Sensibility** Naina Gupta, 2025-05-30 Modern Architecture and an International Sensibility: A Curious Cross Atlantic Constellation presents an alternative history of internationalism and modernism with a focus on the role of architecture and spatial practices. Beginning at the tail end of the peace movements, the turn of the twentieth century and ending with the Nuremberg trials, the book highlights the part played by individual agency, social reform and architecture in moulding a working everyday definition of what it meant to be international during this time. By viewing internationalism through the lens of the individual and the body, both as initiator and subject, it is repositioned as an integral part of everyday life rather than simply understood to be concerned with geopolitical relations between nations and their institutions. The book furthers a research methodology that is multidisciplinary and transnational. It will therefore be of interest to researchers and students of architecture and international history. **Pueblo Style and Regional Architecture (Routledge Revivals)** Nicholas C. Markovich, Wolfgang F. E. Preiser, Fred G. Sturm, 2015-06-03 Few architectural styles evoke so strong a sense of place as Pueblo architecture. This book brings together experts from architecture and art, archaeology and anthropology, philosophy and history, considering Pueblo style not simply architecturally but within its cultural, religious, economic and climate contexts as well. The product of successive layers of Pueblo Indian, Spanish and Anglo influences, contemporary Pueblo style is above all seen as a harmonious response to the magnificent landscape from which it emerged. Pueblo Style and Regional Architecture, first published in 1990, is a unique and thorough study of this enduring

regional style a sourcebook that will inform and inspire architects and designers as well as fascinate those interested in the anthropology culture art and history of the American Southwest

The Fractal Dimension of Architecture Michael J. Ostwald, Josephine Vaughan, 2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century's most respected and celebrated architects Including designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world's most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest

Architects and Engineers Roland May, 2022-10-24 In the first decades of the 20th century civil engineers were widely seen as a role model for future architects Their role within the contemporary architecture movements however was hardly discussed To this day even fundamental questions about collaborations rivalries or conflicts between the two sister disciplines still await answers This volume brings together contributions by international scholars on the cooperation between architects and civil engineers in various countries in the interwar period By offering both insights into national peculiarities and new reflections on the general nature character and significance of such joint efforts it opens exciting new perspectives on the modern building culture of Europe and beyond
