Modern Buildings Great Buildings Of The:

Modern Buildings in Britain Owen Hatherley, 2022-04-07 The definitive illustrated guide to modern British architecture from one of the most acclaimed critics at work today Modernism is now a century old and its consequences are all around us built into our everyday lived environments Its place in Britain's history is fiercely contested and its role in our future is the subject of ongoing controversy but modernist buildings have undoubtedly changed our cities politics and identity forever In Modern Buildings in Britain Owen Hatherley applauds the ambition and explores the significance of this most divisive of architectures travelling from Aberystwyth to Aberdeen from St Ives to Shetland in search of our most important and distinctive modern buildings Drawing on hundreds of examples we learn how the concrete of Brutalism embodies post war civic principles how corporate values were expressed in the glass facades of the International Style and why Ecomodernist experimentation is often consigned to the geographic fringes As Hatherley considers the social political and cultural value of these structures a number of which are threatened by demolition two linked questions emerge what happens to a building after it has been lived in and what becomes of an idea when its time has passed With more than six hundred pages of trenchantly opinionated often witty analysis and with three hundred photographs in duotone and colour Modern Buildings in Britain is a landmark contribution to the history of British architecture

Great Buildings DK Publishing, 2012-08-20 Great Buildings is a fabulous photographic tour of more than 50 of the world's most magnificent buildings From monumental pyramids to the latest chrome and glass skyscrapers and sculptural looking museums the buildings are arranged chronologically providing an excellent introduction to the history of architecture

Turrets, Towers, and Temples: The Great Buildings of the World, as Seen and Described by Famous Writers Esther Singleton, 2020-09-28 A yard or two farther we pass the hostelry of the Black Eagle and glancing as we pass through the square door of marble deeply moulded in the outer wall we see the shadows of its pergola of vines resting on an ancient well with a pointed shield carved on its side and so presently emerge on the bridge and Campo San Mois whence to the entrance into St Mark's Place called the Bocca di Piazza mouth of the square the Venetian character is nearly destroyed first by the frightful facade of San Mois which we will pause at another time to examine and then by the modernizing of the shops as they near the piazza and the mingling with the lower Venetian populace of lounging groups of English and Austrians We will push fast through them into the shadow of the pillars at the end of the Bocca di Piazza and then we forget them all for between those pillars there opens a great light and in the midst of it as we advance slowly the vast tower of St Mark seems to lift itself visibly forth from the level

field of chequered stones and on each side the countless arches prolong themselves into ranged symmetry as if the rugged and irregular houses that pressed together above us in the dark alley had been struck back into sudden obedience and lovely order and all their rude casements and broken walls had been transformed into arches charged with goodly sculpture and fluted shafts of delicate stone And well may they fall back for beyond those troops of ordered arches there rises a vision out of the earth and all the great square seems to have opened from it in a kind of awe that we may see it far away a multitude of pillars and white domes clustered into a long low pyramid of coloured light a treasure heap it seems partly of gold and partly of opal and mother of pearl hollowed beneath into five great vaulted porches ceiled with fair mosaic and beset with sculpture of alabaster clear as amber and delicate as ivory sculpture fantastic and involved of palm leaves and lilies and grapes and pomegranates and birds clinging and fluttering among the branches all twined together into an endless network of buds and plumes and in the midst of it the solemn forms of angels sceptred and robed to the feet and leaning to each other across the gates their figures indistinct among the gleaming of the golden ground through the leaves beside them interrupted and dim like the morning light as it faded back among the branches of Eden when first its gates were angel guarded long ago And round the walls of the porches there are set pillars of variegated stones jasper and porphyry and deep green serpentine spotted with flakes of snow and marbles that half refuse and half yield to the sunshine Cleopatra like their bluest veins to kiss the shadow as it steals back from them revealing line after line of azure undulation as a receding tide leaves the waved sand their capitals rich with interwoven tracery rooted knots of herbage and drifting leaves of acanthus and vine and mystical signs all beginning and ending in the Cross and above them in the broad archivolts a continuous chain of language and of life angels and the signs of heaven and the labours of men each in its appointed season upon the earth and above these another range of glittering pinnacles mixed with white arches edged with scarlet flowers a confusion of delight amidst which the breasts of the Greek horses are seen blazing in their breadth of golden strength and the St Mark s Lion lifted on a blue field covered with stars until at last as if in ecstasy the crests of the arches break into a marble foam and toss themselves far into the blue sky in flashes and wreaths of sculptured spray as if the breakers on the Lido shore had been frost bound before they fell and the sea nymphs had inlaid them with coral and amethyst

The Architecture of Use Stephen Grabow,Kent

Spreckelmeyer,2014-10-03 By analyzing ten examples of buildings that embody the human experience at an extraordinary level this book clarifies the central importance of the role of function in architecture as a generative force in determining built form Using familiar twentieth century buildings as case studies the authors present these from a new perspective based on their functional design concepts Here Grabow and Spreckelmeyer expand the definition of human use to that of an art form by re evaluating these buildings from an aesthetic and ecological view of function Each building is described from the

point of view of a major functional concept or idea of human use which then spreads out and influences the spatial organization built form and structure In doing so each building is presented as an exemplar that reaches beyond the pragmatic concerns of a narrow program and demonstrates how functional concepts can inspire great design evoke archetypal human experience and help us to understand how architecture embodies the deeper purposes and meanings of everyday life

Modern Architecture and Design Bill Risebero,1983 British architect and planner Bill Risebero recreates 200 years of modern architecture and design against a backdrop of class dominance over rising industrialism The lively and opinionated text and more than 1 000 captioned drawings by the author provide a refreshing reinterpretation of architectural developments in the modern period

The Architecture of Rome Ulrich Fürst,1998 Architects and artists have always acknowledged over the centuries that Rome is rightly called the eternal city Rome is eternal above all because it was always young always in its prime Here the buildings that defined the West appeared over more than 2000 years here the history of European architecture was written The foundations were laid even in ancient Roman times when the first attempts were made to design interiors and thus make space open to experience as something physical And at that time the Roman architects also started to develop building types that are still valid today thus creating the cornerstone of later Western architecture In it Rome's primacy remained unbroken whether it was with old St Peter's as the first medieval basilica or new St Peter's as the building in which Bramante and Michelangelo developed the High Renaissance or with works by Bernini and Borromini whose rich and lucid spatial forms were to shape Baroque as far as Vienna Bohemia and Lower Franconia and also with Modern buildings of which there are many unexpected pearls to be found in Rome All this is comprehensible only if it is presented historically i.e. in chronological sequence and so the guide has not been arranged topographically as usual but chronologically This means that one is not led in random sequence from a Baroque building to an ancient or a modern one but the historical development is followed successively Every epoch is preceded by an introduction that identifies its key features This produces a continuous lavishly illustrated history of the architecture of Rome and thus at the same time of the whole of the West Practical handling is guaranteed by an alphabetical index and detailed maps whose information does not just immediately illustrate the historical picture but also makes it possible to choose a personal route through history

The Architecture of Persistence David Fannon,Michelle Laboy,Peter Wiederspahn,2021-08-24 The Architecture of Persistence argues that continued human use is the ultimate measure of sustainability in architecture and that expanding the discourse about adaptability to include continuity as well as change offers the architectural manifestation of resilience Why

do some buildings last for generations as beloved and useful places while others do not How can designers today create buildings that remain useful into the future While architects and theorists have offered a wide range of ideas about building for change this book focuses on persistent architecture the material spatial and cultural processes that give rise to long lived buildings Organized in three parts this book examines material longevity in the face of constant physical and cultural change connects the dimensions of human use and contemporary program and discusses how time informs the design process Featuring dozens of interviews with people who design and use buildings and a close analysis of over a hundred historic and contemporary projects the principles of persistent architecture introduced here address urgent challenges for contemporary practice while pointing towards a more sustainable built environment in the future *The Architecture of Persistence Designing for Future Use* offers practitioners students and scholars a set of principles and illustrative precedents exploring architecture's unique ability to connect an instructive past a useful present and an unknown future Journal of the Royal Institute of British Architects ,1928 **The American Architect and Building News** ,1893 **The American Spirit in Architecture** Talbot Hamlin,1926 **The Modern Urban Landscape (Routledge Revivals)** Edward Relph,2016-04-06

First published in 1987 this book provides a wide ranging account of how modern cities have come to look as they do differing radically from their predecessors in their scale style details and meanings It uses many illustrations and examples to explore the origins and development of specific landscape features More generally it traces the interconnected changes which have occurred in architecture and aesthetic fashions in planning in economic and social conditions and which together have created the landscape that now prevails in most of the cities of the world This book will be of interest to students of architecture urban studies and geography **Journal of the American Institute of Architects** American Institute of Architects,1923 The Building News and Engineering Journal ,1861 *Encyclopedia of Twentieth Century Architecture* R. Stephen Sennott,2004 A balance of sophistication and clarity in the writing authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world's most notable architecture The contents feature major architects firms and professional issues buildings styles and sites the architecture of cities and countries critics and historians construction materials and planning topics schools movements and stylistic and theoretical terms Entries include well selected bibliographies and illustrations Reference that rocks American Libraries May 2005 *History of the Seven Churches of Asia, ... with notices of the Churches of Tralles, Magnesia, Colosse, Hierapolis, Lyons and Vienne: designed to show the fulfilment of Scripture prophecy* Thomas Milner,1832 **Sacred Architecture in a Secular Age** Marie Clausén,2016-02-26

Having won more than one recent poll as Britain's best loved building the appeal of Durham Cathedral appears abiding which begs the question whether an iconic sacred building can retain meaning and affective pertinence for contemporary secular visitors Using the example of Durham Cathedral this book sets out to explore wherein the appeal of historic churches

lies today and considers questions of how and why their preservation into a post Christian era should be secured By including feedback from visitors to the cathedral and the author s own very personal account of the cathedral in the form of an ekphrasis this work seeks to privilege an interpretation of architecture that is based on the individual experience rather than on more conventional narratives of architecture history and cultural heritage policy Recognising the implication of our choice of narrative on the perceived value of historic churches is crucial when deliberating their future role This book puts forth a compelling case for historical sacred architecture suggesting that its loss through imperceptive conservation practices as much as through neglect or demolition would diminish us all secularists atheists and agnostics included
