number of case studies of critical historical events such as imperial China and the Chinese Workers Movement this volume sets out to explore topics such as the history of Sino foreign relations as well as the history of workers movements and youth movements This book will be a valuable reference for scholars and students of Chinese history      **The Art of Modern**

China Haico Ebbers,2019-04-05 This book provides a comprehensive and balanced view of the main transformations that are happening in the Chinese economy today This view has developed from more than 200 interviews and numerous surveys based on primary data in addition to mainstream literature by academia and consultancy companies The general view of China is often either black or white Global markets are generally guided by euphoria or fear Academia are optimistic or pessimistic about China s longer term growth potential People believe or distrust Chinese data These black and white pictures are in many cases easy to communicate and even proved by anecdotic evidence but are not correct Modern China is not the result of tradeoffs but ambiguities market driven AND government driven central government AND local government control increasing brand loyalty AND extreme price sensitivity fall of consumption as percentage of GDP AND strong increase in consumption export as an important driver behind longer term development AND yet hardly visible as a determinant of today s economic growth The aim of this book is to help readers understand the often conflicting nature of China not only from an economic point of view but also from political and social point of view In this sense it tries to give the reader an eclectic picture of China the country of contradictions That is a difficult task because of the linkages between reforms and the fact that there are many preconceived ideas of China its development and choices It is interesting to note that the further from China people are the more negative their views towards China This book will make clear that this pessimism is overdone In the longer term the author is quite positive about China s transformations believing that the rise of China is here to stay and that this is the major factor of change of this century      **Contemporary Studies on Modern Chinese History**

**The Making of Modern Chinese Medicine, 1850-1960** Bridie Andrews, 2014-04-01 Medical care in nineteenth century China was spectacularly pluralistic herbalists shamans bone setters midwives priests and a few medical missionaries from the West all competed for patients This book examines the dichotomy between Western and Chinese medicine showing how it has been greatly exaggerated As missionaries went to

lengths to make their medicine more acceptable to Chinese patients modernizers of Chinese medicine worked to become more scientific by eradicating superstition and creating modern institutions Andrews challenges the supposed superiority of Western medicine in China while showing how traditional Chinese medicine was deliberately created in the image of a modern scientific practice

*Japan faces the World, 1925-1952* Mary L. Hanneman, 2013-11-14 By 1925 the process of Japan's transition to a modern industrialised westernised state was pretty much complete Not only had the imperial tradition been restored with the Meiji Restoration in 1868 but some forms of democratic parliamentary institutions had been set up However during the years that followed the so called imperial democracy came under pressure as the Japanese sought to impose tight control over not only their own people but their neighbours as well This impressive survey looks at developments at home Japan's aggressive foreign policy particularly in China during the 1930s and 1940s and her role in the Second World War Finally the post war reconstruction orchestrated by the Americans is examined The cut off point is 1952 the date when Allied Occupation formally came to an end and Japan once again became independent
