Parker,2010-06-23 *Global Interactions in the Early Modern Age* is an interdisciplinary introduction to cross cultural encounters in the early modern age 1400 1800 and their influences on the development of world societies In the aftermath of Mongol expansion across Eurasia the unprecedented rise of imperial states in the early modern period set in motion interactions between people from around the world These included new commercial networks large scale migration streams global biological exchanges and transfers of knowledge across oceans and continents These in turn wove together the major regions of the world In an age of extensive cultural political military and economic contact a host of individuals companies tribes states and empires were in competition

Yet they also cooperated with one another leading ultimately to the integration of global space      Stateless Commerce  
Barak Richman, 2017-06-19 In *Stateless Commerce* Barak Richman uses the colorful case study of the diamond industry to explore how ethnic trading networks operate and why they persist in the twenty first century How for example does the 47th Street diamond district in midtown Manhattan surrounded by skyscrapers and sophisticated financial institutions continue to thrive as an ethnic marketplace that operates like a traditional bazaar Conventional models of economic and technological progress suggest that such primitive commercial networks would be displaced by new trading paradigms yet in the heart of New York City the old world persists Richman's explanation is deceptively simple Far from being an anachronism 47th Street's ethnic enclave is an adaptive response to the unique pressures of the diamond industry Ethnic trading networks survive because they better fulfill many functions usually performed by state institutions While the modern world rests heavily on lawyers courts and state coercion ethnic merchants regularly sell goods and services by relying solely on familiarity trust and community enforcement what economists call relational exchange These commercial networks insulate themselves from the outside world because the outside world cannot provide those assurances Extending the framework of transactional cost and organizational economics *Stateless Commerce* draws on rare insider interviews to explain why personal exchange succeeds even as most global trade succumbs to the forces of modernization and what it reveals about the limitations of the modern state in governing the economy      The Limits of Empire: European Imperial Formations in Early Modern World History  
William Reger, 2016-03-03 This volume published in honor of historian Geoffrey Parker explores the working of European empires in a global perspective focusing on one of the most important themes of Parker's work the limits of empire which is to say the centrifugal forces sacral dynastic military diplomatic geographical informational that plagued imperial formations in the early modern period 1500 1800 During this time of wrenching technological demographic climatic and economic change empires had to struggle with new religious movements incipient nationalisms new sea routes new military technologies and an evolving state system with complex new rules of diplomacy Engaging with a host of current debates the chapters in this book break away from conventional historical conceptions of empire as an essentially western phenomenon with clear demarcation lines between the colonizer and the colonized These are replaced here by much more fluid and subtle conceptions that highlight complex interplays between coalitions of rulers and ruled In so doing the volume builds upon recent work that increasingly suggests that empires simply could not exist without the consent of their imperial subjects or at least significant groups of them This was as true for the British Raj as it was for imperial China or Russia Whilst the thirteen chapters in this book focus on a number of geographic regions and adopt different approaches each shares a focus on and interest in the working of empires and the ways that imperial formations dealt with or failed to deal with the challenges that beset them Taken together they reflect a new phase in the evolving historiography of empire They also reflect the scholarly contributions of the dedicatee Geoffrey Parker whose life and work are discussed in the introductory chapters and we re
