Contemporary Perspectives on Social Learning in Early Childhood Education Olivia Saracho, Bernard Spodek, 2007-06-01 Social epistemology is a broad set of approaches to the study of knowledge and to gain information about the social dimensions This intellectual movement of wide cross disciplinary sources reconstructs the problems of epistemology when knowledge is considered to be intrinsically social In the first chapter Social Epistemology and Social Learning Olivia Saracho and Bernard Spodek discuss the social and historical contexts in which different forms of knowledge are formulated based on the perspective of social epistemology They also discuss the emergence of social epistemology which guides researchers to investigate social phenomena in laboratory and field settings Social factors external to the appropriate business of science have a major impact in the social studies researchers historical case studies Thus social studies researchers may be considered social epistemologists because a they focus on knowledge of social influences and b they infer epistemologically significant conclusions from their sociological or anthropological research In addition analyses indicate that studies of scientific paradigms are basically a struggle for political power rather than reflecting reliable epistemic merit Social studies researchers focus on knowledge of social influences on knowledge which is analogous to the knowledge of the social epistemologists They also use their sociological or anthropological research to infer epistemologically significant conclusions

**Contemporary Issues in Early Childhood Education in Germany** Wilfried Smidt, 2018-07-26 The importance of early childhood education has been emphasized by a large body of research that has demonstrated that children s cognitive and socio emotional development is significantly influenced by the quality of the education and care received from their families and in preschool Consequently it is important to investigate factors that pertain to the provision of a high quality education and high quality care for young children This book addresses several important issues that are currently under discussion with respect to this topic In particular the book focuses on three topics presently under debate the professionalization of pedagogues working in the field of early childhood education the quality of education and care provided by families and preschools and the promotion of children from socio economically disadvantaged families Providing an excellent overview of current research in Germany this book will be useful to readers who are interested in international perspectives on early childhood education and who want to gain insight into relevant topics discussed in other countries This book was originally published as a special issue of Early Child Development and Care

Contemporary Perspectives on Research on Bullying and Victimization in Early Childhood Education Olivia Saracho, 2016-09-01 While the research on bullying and peer victimization has increased considerably over the past 20 years a number of studies are emerging that document mixed results of bullying and prevention programs During the last decades several special issues devoted to research on bullying and victimization have been published in national and international scholarly journals Based on the increase of published articles on bullying and victimization in journals textbooks government reports and documents in professional organizations

it is timely for a special volume on research on bullying and victimization to appear in the series on Contemporary Perspectives in Early Childhood Education The purpose of this volume is to share a collection of research strands on bullying and victimization of young children It describes the historical roots and suggests anti bullying programs and strategies to decrease bullying and victimization The bullying and victimization volume can be a valuable tool to researchers who are conducting studies in that area It focuses on important historical and contemporary issues on bullying and victimization in early childhood education ages 0 to 8 to provide the information necessary to make judgments about these issues It also motivates and guides researchers to explore gaps on research on bullying and victimization

The SAGE Encyclopedia of Contemporary Early Childhood Education Donna Couchenour, J. Kent Chrisman, 2016-08-16 The general public often views early childhood education as either simply babysitting or as preparation for later learning Of course both viewpoints are simplistic Deep understanding of child development best educational practices based on development emergent curriculum cultural competence and applications of family systems are necessary for high quality early education Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research accurate practical applications of research historical foundations and key facts from the field of contemporary early childhood education Through approximately 425 entries this work includes all areas of child development physical cognitive language social emotional aesthetic as well as comprehensive review of best educational practices with young children effective preparation for early childhood professionals and policy making practices and addresses such questions as How is the field of early childhood education defined What are the roots of this field of study How is the history of early childhood education similar to yet different from the study of public education What are the major influences on understandings of best practices in early childhood education

**Research in Education** ,1974 *Resources in Education* ,1998 *Pacific Magazine* ,1929 **Discourse and Contemporary Social Change** Norman Fairclough, 2007 This book draws together a rich variety of perspectives on discourse as a facet of contemporary social change representing a number of different disciplines theoretical positions and methods The specific focus of the volume is on discourse as a moment of social change which can be seen to involve objects of research which comprise versions of some or all of the following research questions How and where did discourses narratives emerge and develop How and where did they achieve hegemonic status

How and where and how extensively have they been recontextualized How and where and to what extent have they been operationalized The dialectical approach indicated above implies that discourse analysis includes analysis of relations between language more broadly semiosis and its social context

*Teaching Mathematics Through Problem-Solving* Akihiko Takahashi, 2021-03-31 This engaging book offers an in depth introduction to teaching mathematics through problem solving providing lessons and techniques that can be used in classrooms for both primary and lower secondary grades Based on the innovative and successful Japanese approaches of Teaching Through Problem solving TTP and Collaborative Lesson Research CLR renowned mathematics education scholar Akihiko Takahashi demonstrates how these teaching methods can be successfully adapted in schools outside of Japan TTP encourages students to try and solve a problem independently rather than relying on the format of lectures and walkthroughs provided in classrooms across the world Teaching Mathematics Through Problem Solving gives educators the tools to restructure their lesson and curriculum design to make creative and adaptive problem solving the main way students learn new procedures Takahashi showcases TTP lessons for elementary and secondary classrooms showing how teachers can create their own TTP lessons and units using techniques adapted from Japanese educators through CLR Examples are discussed in relation to the Common Core State Standards though the methods and lessons offered can be used in any country Teaching Mathematics Through Problem Solving offers an innovative new approach to teaching mathematics written by a leading expert in Japanese mathematics education suitable for pre service and in service primary and secondary math educators
