**Theories of Organization** Henry L. Tosi, 2009 Includes excerpts from seminal works and summaries of key theoretical models that form the basis of the field of organization theory *Institutions and Chinese Economic Development* Li Tan, 2021-11-10 China's rise as an economic power has posed some challenging questions: how did China achieve GDP growth that was even faster than the Four Asian Tigers? Is the Chinese model superior? Why hasn't the rapid economic growth led to democracy in the country as many observers expected? And can China sustain its rapid economic growth with its existing social system? *Institutions and Chinese Economic Development: A Comparative Historical Approach* explores these questions by studying the historical relationship between institutions and economic development in China, drawing comparisons with England, Japan, and other Asian economies as appropriate. The investigation focuses on several junctures in China's economic development: the starting point of the divergence between China and the West, the externally provoked industrial development in the late 19th century, and the contemporary Chinese Miracle. The analysis foregrounds the role played by Chinese institutions and examines their effects on both the country's failure to industrialize in the past and its economic achievements in recent time. The book also asks whether, without reform to the existing state institutions, China might still be subject to the historical dynastic cycles today despite its recent economic success. This work is of great interest to students and scholars of the Chinese economy, economic history, and institutional economics, as well as comparative history and Chinese studies more broadly. *Political Science* G. A. Jacobsen, M. H. Lipman, 1965 *Fundamentals of Sociology* Gisbert, P. S. J., 1973 The third expanded edition of this well-known text on sociology has detailed analyses of the economic system, industry, population, and food supply. Importance has been given to forces such as industrialisation and the Green Revolution that have helped to shape modern India. A comprehensive text useful to both teachers and students.

*Agricultural Economics Literature* United States. Bureau of Agricultural Economics. Library, 1938 *Books and Pamphlets, Including Serials and Contributions to Periodicals* Library of Congress. Copyright Office, 1949 *The Political Economy of Post-Capitalism* Richard Westra, 2024-08-02 Westra explores a nuanced literature on post-capitalism which claims that instead of constituting the end of history or ending in its supplanting by socialism, capitalism has transmuted into something else. Foci of this literature range from questions of financial system and technological change through evidence of shifting class contours, metastasizing a more predatory constellation. In exposing the dire consequences for humanity of capitalist unravelling, Westra remedies the lacunae of current writings which leave fundamental questions of what precisely capitalism is or was and the historical delimitations of capitalism unanswered. He not only critically analyzes the arguments over capitalism's passing under key rubrics of financialization, globalization, intangible assets, and social class, but grounds

determinations over the existence of capitalism in a novel synthetic definition of it drawn from Marx While capitalism has always been an exploitative asymmetric wealth distributive alienating class divisive crises ridden society Westra explains how current economic transmutations undermine what coherence capitalism had historically maintained This book written in a clear and compelling fashion is a clarion call for social change It will be of interest to academics and students across fields of economics political economy economic history political science and sociology as well as to progressive policymakers and social activists

*The Political Economy of Mountain Java* Robert W. Hefner, 1993-05-12 A rich and sensitive portrait of a changing peasantry this study is also a general inquiry into the nature of status class and community in the developing world Robert Hefner presents an analysis designed to bridge the gap between village studies and social history He describes the forces that have shaped upland politics and society from pre colonial times to the Green Revolution today

**The Philosophy of Economics** Subroto Roy, 2003-09-02 The first work to seriously and successfully bridge twentieth century economics and philosophy Subroto Roy draws these two disciplines together and examines the intellectual roots of economics

*Portrayals of Economic Exchange in the Book of Kings* Roger S. Nam, 2012-02-17 Drawing on the Polanyian categories of reciprocity redistribution and market trade this book examines the exchange narratives within 1 and 2 Kings in an effort to clarify the nature of the economic structures behind the biblical text

*Modern Organizations* Stewart Clegg, 1990-09-05 This wide ranging analysis both explores current approaches to organization studies and relates the

concepts of modernity and postmodernity to the realities of organizational structure and context In surveying alternative perspectives on organizations in terms of ideal types systems contingencies ecologies cultures markets and efficiency Clegg demonstrates that no single approach is adequate to deal with the real world variety of organizations that exist Drawing upon unusual and revealing examples the production of French bread Italian fashion and post Confucian Asian enterprises he argues that their success cannot be reduced to culture but must incorporate a fuller understanding of the ways in which organi

The Unthinkable Revolution in Iran Charles Kurzman, 2005-09-06 The shah of Iran Mohammad Reza Pahlavi would remain on the throne for the foreseeable future This was the firm conclusion of a top secret CIA analysis issued in October 1978 One hundred days later the shah despite his massive military fearsome security police and superpower support was overthrown by a popular and largely peaceful revolution But the CIA was not alone in its myopia as Charles Kurzman reveals in this penetrating work Iranians themselves except for a tiny minority considered a revolution inconceivable until it actually occurred Revisiting the circumstances surrounding the fall of the shah Kurzman offers rare insight into the nature and evolution of the Iranian revolution and into the ultimate unpredictability of protest movements in general As one Iranian recalls The future was up in the air Through interviews and eyewitness accounts declassified security documents and underground pamphlets Kurzman documents the overwhelming sense of confusion that gripped pre revolutionary Iran and that characterizes major protest movements His book provides a striking picture of the chaotic conditions under which Iranians acted participating in protest only when they expected others to do so too the process approaching critical mass in unforeseen and unforeseeable ways Only when large numbers of Iranians began to think the unthinkable in the words of the U S ambassador did revolutionary expectations become a self fulfilling prophecy A corrective to 20 20 hindsight this book reveals shortcomings of analyses that make the Iranian revolution or any major protest movement seem inevitable in retrospect
