society and environment comprise the three main dimensions of sustainable development but too often they are considered separately This book by comparison examines the interaction of the three dimensions in the context of rural systems embracing a wide range of topics including globalisation and reregulation in sustainable food production conservation and sustainability the development of sustainable rural communities and sustainable rural urban interaction An international team of geographers drawn from the International Geographical Union's Commission on The Sustainability of Rural Systems summarises the basis of unsustainable rural development in these topics the remedial policies being pursued and their own evaluations of the policies Rather than deal just with generalisations their analyses are illustrated by detailed case studies drawn from a variety of rural systems in both developed and developing countries *Tourism in the Green Economy*

Maharaj Vijay Reddy, Keith Wilkes, 2015-06-05 The concept of the green economy has now entered mainstream policy debates and been endorsed by a range of United Nations and other organizations The Rio 20 UN conference specifically drew attention to the green economy approach in the context of sustainable development to move away from business as usual practices act to end poverty address environmental destruction and build a bridge to the sustainable future It is increasingly recognized that the tourism sector can make a major contribution to the green economy through more sustainable practices climate change mitigation and ecotourism The role of tourism sector will continue to be crucial in the post 2015 sustainable

development agenda too. However, there are ambiguities about how tourism and allied industries can maximize their contribution to human well-being and ensure environmental sustainability embracing issues of political economy, geography and business ethics. In this context, this book provides consensus about what the green economy entails, what role tourism can play in a green economy, early responses from many countries on going and emerging research initiatives that will enable tourism's transition to a green economy. The chapters address three key themes: understanding the Green Economy concept and the role of tourism responses and initiatives in greening tourism and emerging techniques and research implications. A wide range of case studies from around the world and in different contexts is included to demonstrate the extent of the challenge and range of opportunities for the tourism industry.

Sustainable Agriculture Reviews 58 Asif Iqbal, Mazhar Iqbal, Madeeha Alamzeb, Song Meizhen, Zhang Xiling, Muhammad Arif, Xiongming Du, Eric Lichtfouse, 2022-11-15. This book presents recently developed crop soil and management practices that can be used to improve phosphorous use efficiency in agriculture. Food security highly depends on the availability of plant nutrients such as phosphorus, yet rock phosphate reserves are expected to be exhausted in the next 50-100 years. Moreover, about 80% of the phosphorous fertilizers applied to soils become unavailable to plants due to phosphorous fixation in iron and aluminum oxides in acidic soils and with carbonates in alkaline soils. As a consequence, only 10-15% of applied phosphorous is up-taken by crops. Therefore, there is a need for advanced practices for improving phosphorus use efficiency.

The Torah and the Stoics on humankind and nature J.J. Boersema, 2021-09-06. The environmental problematique is intimately bound up with deep-seated human attitudes regarding our relationship with nature. Here in the West, those attitudes have been shaped to no small degree by the canonical texts of the Bible and the classical philosophers. In this book, the author re-examines some of these seminal texts, arguing that what we today know as Christian cosmology is in fact a grafting of classical Greek philosophy onto ancient Israelite thought, with certain valuable traditions being all but lost in the process. The dietary laws of Leviticus and Deuteronomy in particular still prove surprisingly relevant today. Often misread on this point, the creation narratives of Genesis can likewise serve as a rich point of departure for examining our attitudes towards the natural world. A reappraisal of these sources is necessary and feasible. There is no need for an appeal to cosmologies alien to our own culture, nor for recourse to New Age beliefs in all their variety.

Disaster and Development Andrew E. Collins, 2009-09-10. Development to a large extent determines the way in which hazards impact on people. Meanwhile, the occurrence of disasters alters the scope of development. Whilst a notion of the association of disaster and development is as old as development studies itself, recent decades have produced an intensifying demand for a fuller understanding. Evidence of disaster and development progressing together has attracted increased institutional attention. This includes recognition through global accords of a need for disaster reduction in achieving Millennium Development Goals and of sustainable development as central to disaster reduction. However, varied interpretations of this linkage and accessible options for future human well-being remain.

unconsolidated for most of humanity This engaging and accessible text illuminates the complexity of the relationship between disaster and development It opens with an assessment of the scope of contemporary disaster and development studies highlighting the rationale for looking at the two issues as part of the same topic The second and third chapters detail development perspectives of disaster and the influence of disaster on development The fourth chapter exemplifies how human health is both a cause and consequence of disaster and development and the following chapter illustrates some of the learning and planning processes in disaster and development oriented practice Early warning risk management mitigation response and recovery actions provide the focus for the fifth and sixth chapters The final chapter indicates some of the likely future contribution and challenges of combined disaster and development approaches With an emphasis on putting people at the centre of disaster and development the book avoids confronting readers with no hope representations instead highlighting disaster reduction opportunities This book is an essential introduction for students from multiple disciplines whose subject area may variously engage with contemporary crises and for many other people interested in finding about what is really meant by disaster reduction They include students and practitioners of development environment sociology economics public health anthropology and emergency planning amongst others It provides an entry point to a critical yet diverse topic backed up by student friendly features such as boxed case studies from the geographical areas of America to Africa and parts of Europe to parts of the East summaries discussion questions suggested further reading and web site information

Service and for his argument that resources should be used to provide the greatest good for the greatest number of people. But Pinchot was a more complicated figure than has generally been recognized and more than half a century after his death he continues to provoke controversy. Gifford Pinchot and the Making of Modern Environmentalism, the first new biography in more than three decades, offers a fresh interpretation of the life and work of the famed conservationist and Progressive politician. In addition to considering Gifford Pinchot's role in the environmental movement, historian Char Miller sets forth an engaging description and analysis of the man, his character, passions, and personality, and the larger world through which he moved. Char Miller begins by describing Pinchot's early years and the often overlooked influence of his family and their aspirations for him. He examines Gifford Pinchot's postgraduate education in France and his ensuing efforts in promoting the profession of forestry in the United States and in establishing and running the Forest Service. While Pinchot's twelve years as chief forester, 1898-1910, are the ones most historians and biographers focus on, Char Miller also offers an extensive examination of Pinchot's post-federal career as head of The National Conservation Association and as two-term governor of Pennsylvania. In addition, he looks at Pinchot's marriage to feminist Cornelia Bryce and discusses her role in Pinchot's political radicalization throughout the 1920s and 1930s. An epilogue explores Gifford Pinchot's final years and writings. Char Miller offers a provocative reconsideration of key events in Pinchot's life, including his relationship with friend and mentor John Muir and their famous disagreement over damming Hetch Hetchy Valley. The author brings together insights from cultural and social history and recently discovered primary sources to support a new interpretation of Pinchot, whose activism not only helped define environmental politics in early twentieth-century America but remains strikingly relevant today.
