Modern European Intellectual History Dominick LaCapra, Steven L. Kaplan, 1982 **Modern European intellectual History. Reappraisals and new perspectives.** Ed. by Dominick LaCapra and Steven L. Kaplan. (1. publ.) Steven L. Kaplan, Dominick LaCapra, 1982 **Modern European Intellectual History** William James Bouwsma, 1984 **Rethinking Modern European Intellectual History** Darrin M. McMahon, Samuel Moyn, 2014-03

Modern European intellectual history is thriving as never before It has recovered from an era in which other trends like social and cultural history threatened to marginalize it But in spite of enjoying a contemporary renaissance the field has lost touch with the tradition of debating why and how to study ideas and thus lacks both a well articulated set of purposes and a range of arguments for exactly what it means to pursue those purposes This volume revives that tradition Recalling past attempts to showcase the diversity and differentiation of modern European intellectual history this volume also documents how much has changed in recent decades Some authors are much readier to defend a history of ideas practiced over the long term once the defining sin of the field Others go so far as to insist on how ideas are always open to reappropriation and reevaluation beyond their original contexts suggesting that it is an error to reduce the ideas to those contexts Others still argue that under threat from trends like social history intellectual historians have forsaken any attempt to resolve for themselves how ideas are socially embodied The volume also registers old and new trends in history that have affected the study of ideas including the history of science the history of academic disciplines the history of psychology and self international and global history and women s and gender history **A Companion to Intellectual History** Richard Whatmore, Brian Young, 2015-11-06 A Companion to Intellectual History provides an in depth survey of the practice of intellectual history as a discipline Forty newly commissioned chapters showcase leading global research with broad coverage of every aspect of intellectual history as it is currently practiced Presents an in depth survey of recent research and practice of intellectual history Written in a clear and accessible manner designed for an international audience Surveys the various methodologies that have arisen and the main historiographical debates that concern intellectual historians Pays special attention to contemporary controversies providing readers with the most current overview of the field Demonstrates the ways in which intellectual historians have contributed to the history of science and medicine literary studies art history and the history of political thought Named Outstanding Academic Title of 2016 by Choice Magazine a publication of the American Library Association *Deconstructing History* Alun Munslow, 2006-04-18 In *Deconstructing History* Alun Munslow examines history in the postmodern age He provides an introduction to the debates and issues of postmodernist history He also surveys the latest research into the relationship between the past history and historical practice as well as forwarding his own challenging theories The book discusses issues of both empiricist and deconstruction positions and considers the arguments of major proponents of both stances and includes an examination of the character of historical evidence exploration of the

role of historians discussion of the failure of traditional historical methods chapters on Hayden White and Michel Foucault an evaluation of the importance of historical narrative an up to date comprehensive bibliography an extensive and helpful glossary of difficult key terms Deconstructing History maps the philosophical field outlines the controversies involved and assesses the merits of the deconstructionist position He argues that instead of beginning with the past history begin with its representation by historians

What is Intellectual History? Richard Whatmore, 2016-05-18 What is intellectual history Those who practice intellectual history have described themselves as eavesdroppers upon the conversations of the past explorers of alien ideological worlds and translators between historic societies and our own while their critics have often derided them as narrow minded studying the ideas of dead white men Some consider the discipline to be among the most important in the humanities and social sciences because it facilitates a better understanding of contemporary ideological programmes and facilitates their rational evaluation In this engaging and refreshing introduction to the field Richard Whatmore begins by examining the historical development of intellectual history before dissecting its various methodological debates He presents various alternative ways in which we should think about intellectual history as well as presenting his own very clear definition of the field Drawing on a wide range of historical examples Whatmore shows how ideas philosophical political religious scientific artistic originated in their historical context and how they were both shaped by and helped to shape the societies in which they originated He ends by casting a critical eye over the current state of intellectual history and a brief discussion of how it might develop in the future What is Intellectual History will become an essential textbook for scholars and students of intellectual history philosophy politics and the humanities

Rethinking Intellectual History Dominick LaCapra, 1983 Dominick LaCapra calls for a new view of intellectual history one that will revitalize the importance of reading and interpreting significant texts In ten essays he reformulates the problem of the relation between the great texts of the Western tradition and their contexts Seeking to refine context into a concept useful to historical research LaCapra urges intellectual historians to learn from lessons and developments in contemporary literary criticism and philosophy fields that have undertaken a radical reassessment of the reading of texts

Philosophy and Its History Jorge J. E. Gracia,1992-01-01 This book is a systematic and comprehensive treatment of issues involved in philosophical historiography It deals with such topics as the relation of philosophy to its history the role of value judgments in historical accounts the value of the history of philosophy for philosophy the nature and role of texts and their interpretation in the history of philosophy historiographical method and the stages of development of philosophical progress The book defends two main theses The first is that the history of philosophy must be done philosophically that is it must include philosophical judgments The second is that one way to bring a rapprochement between Anglo American and Continental philosophy is through the study of the history of philosophy and its historiography An extensive bibliography of pertinent materials and detailed indexes close the book Learning History in America Lloyd S. Kramer,Donald Reid,William L. Barney,1994-01-01 The essays in this book like all other texts have been written in a historical context that shapes both the themes and the prose styles of the authors A close reading of these texts would in fact lead to many overlapping contexts of politics social hierarchies modern communications and international relations but we want to focus briefly on two contextual influences that carry the most obvious connections to this book the wide ranging public debate about the proper curriculum for American schools and universities and the more specific debate among historians about new trends in historical scholarship Life in the Glory of Its Radiating Manifestations Anna-Teresa Tymieniecka,2013-06-29 Western thought is surging on the rebound from centuries of a merely background interest Life is presenting crucial challenges to the human mind in science technology culture and social existence challenges which reach the core of existence human destiny and the very meaningfulness the human significance of life itself The compartementalized sciences fall short of responding to this challenge and present day philosophy by and large renounced its vocation of carrying the torch of reason In this post modern darkness the Phenomenology of Life and of the Human Condition excavate and bring to light the Logos of Life in its entire harmonizing interplay In the present collection which continues the long and winding

Haunting History Ethan Kleinberg, 2017-08-22 This book

argues for a deconstructive approach to the practice and writing of history at a moment when available forms for writing and publishing history are undergoing radical transformation To do so it explores the legacy and impact of deconstruction on American historical work the current fetishization of lived experience materialism and the real new trends in philosophy of history and the persistence of ontological realism as the dominant mode of thought for conventional historians Arguing that this ontological realist mode of thinking is reinforced by current analog publishing practices Ethan Kleinberg advocates for a hauntological approach to history that follows the work of Jacques Derrida and embraces a past that is at once present and absent available and restricted rather than a fixed and static snapshot of a moment in time This polysemic understanding of the past as multiple and conflicting he maintains is what makes the deconstructive approach to the past particularly well suited to new digital forms of historical writing and presentation

History and Its Limits Dominick LaCapra, 2011-02-23 Dominick LaCapra's *History and Its Limits* articulates the relations among intellectual history cultural history and critical theory examining the recent rise of Practice Theory and probing the limitations of prevalent forms of humanism LaCapra focuses on the problem of understanding extreme cases specifically events and experiences involving violence and victimization He asks how historians treat and are simultaneously implicated in the traumatic processes they attempt to represent In addressing these questions he also investigates violence's impact on various types of writing and establishes a distinctive role for critical theory in the face of an insufficiently discriminating aesthetic of the sublime often unreflectively amalgamated with the uncanny In *History and Its Limits* LaCapra inquires into the related phenomenon of a turn to the postsecular even the messianic or the miraculous in recent theoretical discussions of extreme events by such prominent figures as Giorgio Agamben Eric L Santner and Slavoj Žižek In a related vein he discusses Martin Heidegger's evocative if not enchanting understanding of *The Origin of the Work of Art* LaCapra subjects to critical scrutiny the sometimes internally divided way in which violence has been valorized in sacrificial regenerative or redemptive terms by a series of important modern intellectuals on both the far right and the far left including Georges Sorel the early Walter Benjamin Georges Bataille Frantz Fanon and Ernst Jünger Violence and victimization are prominent in the relation between the human and the animal LaCapra questions prevalent anthropocentrism evident even in theorists of the posthuman and the long standing quest for a decisive criterion separating or dividing the human from the animal LaCapra regards this attempt to fix the difference as misguided and potentially dangerous because it renders insufficiently problematic the manner in which humans treat other animals and interact with the environment In raising the issue of desirable transformations in modernity *History and Its Limits* examines the legitimacy of normative limits necessary for life in common and explores the disconcerting role of transgressive initiatives beyond limits including limits blocking the recognition that humans are themselves animals

Reformulating Russia Kåre Johan Mjør, 2011-05-06 Georgii Fedotov's *Saints of Ancient Russia* Georgii Florovskii's *The Ways of Russian Theology* Nikolai Berdiaev's *The Russian Idea* and Vasiliï Zenkovskii's *History of Russian Philosophy* these
