Modernism when viewed through the spectacles of Marxian aesthetics emerges as a problematic artistic movement especially when placed within the context of social structures that define the cultural practices at any given point in time The much discussed debate within the Marxist canon regarding the dialectic relationship between society and art in the context of modernism had stalwarts of Marxist criticism deliberating this relationship between art and society From Europe modernism spread to other parts of the world including India where it captured the imagination of the writers of regional languages as well In Kerala with its staunch Marxian perspectives and its supporters including a faithful political network of leaders and followers modernism invited heated debates of a similar nature A debate was triggered off challenging the ideological frameworks of modernist aesthetics with a large part of the intelligentsia actively participating in it Kerala Kaumudi magazine published these arguments as a series leading to further discussions in the cultural and political discourses that shaped the sensibility of the times This book is an attempt to explore this relationship with these debates and discussions as referral points To substantiate the arguments four texts that emerged as iconic texts are studied O V Vijayan s *The Legends of Khasak* 1969 and *The Saga of Dharmapuri* 1985 and M Mukundan s *On the Banks of Mayyazhi* 1974 and God s *Mischief* 1989 **The Modern German Novel** H. 1970s today's Austrian Federal Ministry of Education Science and Research Bundesministerium für Bildung Wissenschaft und Forschung BMBWF supported the founding of the Center for Austrian Studies at the University of Minnesota in Minneapolis and the Austrian Chair at Stanford University in California. These foundations were the initial incentives for the worldwide spreading of similar institutions; currently nine Centers for Austrian and Central European Studies exist in seven countries on three continents. The funding of the Ministry enables to connect senior scholars with young scholars to help young PhD students to participate in and to benefit from the scientific connection of experienced researchers and to get in touch with the national scientific community by sniffing scientific air as the Austrians like to say. Furthermore, it aims to avoid prejudices and to spread a better understanding and knowledge about Austria and Central Europe by promoting scientific exchange. This volume contains the annual reports 2018/2019, 2019/2020 of the Center Directors and the papers of their PhD students which discuss various topics on mostly East Central European History from several perspectives and in different centuries.

Literature and Law, 2016-08-09. In recent years there has been a continuing and persistent world-wide interest in the interaction between the two disciplines of law and literature. Although there have been many collections of primary texts that combined these two areas, this volume presents literary analyses and criticism in an attempt to assess the varied relationships between law and justice between lawyers and clients and between readers' perceptions and authors' intent, hopefully suggesting why they have continually been yoked together. One similarity between the two is that lawyers like writers must catch their audience's attention by novelty of scene, distinctiveness of voice and ingenuity of design. Furthermore, legal advocates must recreate a concrete sense of reality, developing vivid and valid pictures of a specific time and place. In short, both lawyers and writers attempt to provide a basis for juries, readers to judge defendants' characters by their motivations and their actions and to decide whether a favorable ruling/assessment is justified. Collectively, the essays in this book are designed to deal with themes of guilt and innocence, right and wrong, morality and legality. The essays also suggest that the world as it is delineated by lawyers is indeed a text that like its literary counterparts sometimes blurs the distinction between fact and fiction as it attempts to define truth and to establish criteria for impartial justice. By exploring interdisciplinary contexts, readers will surely be made more aware, more sensitive to the roles that stories play in the legal profession and to the dilemmas faced by legal systems that often succeed in maintaining the rights and privileges of a dominant societal group at the expense of a less powerful one.

Technology in Modern German History Karsten Uhl, 2022-01-27 People often associate postwar Germany with technology and with its products of mass consumption such as luxury cars Even pop music most notably Kraftwerk literally power station with songs such as Autobahn Radioactivity or We are the Robots disseminates the stereotype of a close link between German culture and technology Technology in Modern German History explores various forms of technology in 200 years of German history and explains how technology has been fundamental to the shaping of modern Germany The book investigates the role technology played in transforming Germany's culture society and politics during the 19th and 20th centuries Key topics covered include the different stages of industrialization the growth of networked cities and the triumph of a teleological narrative of technology as progress Moreover it provides a critical revision of the history of high technology which reveals how high tech euphoria determined certain paths in history regardless of whether the respective technology proved to be successful In its second part the volume introduces new avenues in scholarship Karsten Uhl examines neglected areas such as rural technologies or the often overlooked importance of everyday technologies How did consumers or workers use new technologies How did they appropriate and modify them Lastly the book considers the final decades of the 20th century and asks if they provided a significant new quality of technological change To what degree and effects did computerization transform professional and private life in Germany In culture and politics reinforced by the German variety of environmentalism the idea of progress was challenged as the once prevailing vision of progress gave way to new apprehensions of uncertainty evident to this day Technology in Modern German History brings fascinating insight into a much neglected area of German history for students and scholars alike

Literature as World Literature Thomas Oliver Beebee, 2014-07-31 This new collection investigates German literature in its international dimensions While no single volume can deal comprehensively with such a vast topic the nine contributors cover a wide historical range with a variety of approaches and authors represented Together the essays begin to adumbrate the systematic nature of the relations between German national literature and world literature as these have developed through institutions cultural networks and individual authors In the last two decades discussions of world literature literature that resonates beyond its original linguistic and cultural contexts have come increasingly to the forefront of theoretical investigations of literature One reason for the explosion of world literature theory pedagogy and methodology is the difficulty of accomplishing either world literature criticism or world literary history The capaciousness as well as the polylingual and multicultural features of world literature present formidable obstacles to its study and call for a collaborative approach that conjoins a variety of expertise To that end this collection contributes to the critical study of world literature in its textual institutional and translatorial reality while at the same time highlighting a question that has hitherto received insufficient scholarly attention what is the relation between national and world literatures or more specifically in what senses do national literatures systematically participate in or resist world literature **Twentieth-Century and Contemporary American**

distinctively difficult even perhaps at times impossible Yet we can learn about understandings of violence in this period in novel ways by exploring images and constructions in German culture of faraway violence as shown in the recent volume *Violence Elsewhere 1 Imagining Distant Violence in Germany 1945 2001* As of September 11 2001 violence came to appear transnationally spectacularly mobile in new ways Consequently *Violence Elsewhere 2* explores ideas about violence elsewhere in German language culture since 2001 Here elsewhere can mean not only distant places it may also be violence perceived as foreign or in the past Simultaneously this work suggests that the idea of 9 11 as a watershed in thinking about violence is more complex than meets the eye Here nine essays consider classic literary forms like poetry and prose fiction from the short story to the intergenerational German family novel to Black feminist speculative fiction Contributors examine too philosophy performance and multimedia art political and other forms of public discourse and film Topics include amongst others the war on terror slow environmental violence the Armenian genocide portrayals of refugees and migrants legacies of colonial violence space travel and the persistent resonance of the German past Contributors Sof a Forchieri Susanne C Knittel Marie Kolkenbrock Priscilla Layne Joanne Leal Francesca Lewis Frauke Matthes Lizzie Stewart Nicola Thomas and Kathrin Wunderlich This book is available as Open Access under the Creative Commons license CC BY NC ND
