Reports on NMR Spectroscopy, 1989-04-24 Commencing with Volume 21 the aim of this series is to produce a larger number of relatively short but timely and authoritative reviews These will concentrate in particular on areas of NMR where recent progress and developments are of special interest and will reflect the many NMR developments occurring in the primary scientific literature The present volume demonstrates the advances which can be made by the application of NMR techniques in many diverse areas of chemistry Of particular significance is the account of Graphics Aided NMR which will become an important development in the use of NMR spectroscopy Design Patterns for e-Science Henry Gardner, Gabriele Manduchi, 2007-05-03 This is a book about a code and about coding The code is a case study which has been used to teach courses in e Science at the Australian National University since 2001 Students learn advanced programming skills and techniques TM in the Java language Above all they learn to apply useful object oriented design patterns as they progressively refactor and enhance the software We think our case study EScope is as close to real life as you can get It is a smaller version of a networked graphical waveform browser which is used in the control rooms of fusion energy experiments around the world It is quintessential e Science in the sense of e Science being computer science and information technology in the service of science It is not specifically Grid enabled but we develop it in a way that will facilitate its deployment onto the Grid The standard version of EScope interfaces with a specialised database for waveforms and related data known as MDSplus On the accompanying CD we have provided you with software which will enable you to install MDSplus EScope and sample data les

onto Windows or Linux computers There is much additional software including many versions of the case study as it gets built up and progressively refactored using design patterns There will be a home web site for this book which will contain up to date information about the software and other aspects of the case study GPU Pro 4 Wolfgang Engel,2013-04-26 GPU Pro4 Advanced Rendering Techniques presents ready to use ideas and procedures that can help solve many of your day to day graphics programming challenges Focusing on interactive media and games the book covers up to date methods for producing real time graphics Section editors Wolfgang Engel Christopher Oat Carsten Dachsbacher Michal Vali

Communicate David Crowley,Nico MacDonald,2004-01-01 A unique look at how popular music and culture have influenced the evolution of British design *Automotive Lighting and Human Vision* Burkard Wördenweber,Jörg Wallaschek,Peter Boyce,Donald D. Hoffman,2007-03-13 It is possible to buy excellent books on human vision as well as about automotive lighting Unfortunately these books have little or no common content But in fact these fields do overlap Providing optimal conditions for human vision is what automotive lighting is all about Our motivation for writing this book arises from interdisciplinary studies of human vision and lighting Initially we intended the book to provide background information on human vision to engineers working in automotive lighting At the same time we planned to introduce basic concepts of automotive lighting to experts in human vision However because of the intricate connections between human vision and automotive lighting it turns out that the book provides new insights to anyone interested in either or both subjects The subject matter is complex and spans a number of disciplines from psychology to mechatronics Hence there are very few individuals who are experts in all fields Looking at the nature of human vision it is surprising to find out how much every one of us takes it for granted Rarely are we aware of how we use vision predominantly to verify our internal model of our surroundings Many accidents particularly at night stem from the fact that our internal model misrepresented a significant part of our surroundings Taking knowledge on human vision into account in the design of future automotive lighting systems reduces the risk of accidents at night
