Gilead presents original research into classroom interactional practices by offering a thick description of a successful beginner level Modern Hebrew program at an Australian university The book charts and theorizes the cohort s teacher and students trajectory of using Hebrew as the main means of instructing and acquiring the language and highlights seven key features which contribute to students learning The book s research based findings and analysis of classroom dynamics contribute to theorizing the currently largely praxis based discipline of L2 Modern Hebrew instruction hence providing a stronger theoretical understanding of how and why students can be assisted in their language learning This original research provides a template for renewed L2 Hebrew research

### **Learning to Read across Languages and Writing Systems**

Ludo Verhoeven, Charles Perfetti, 2017-10-12 Around the world children embark on learning to read in their home language or writing system But does their specific language and how it is written make a difference to how they learn How is learning to read English similar to or different from learning in other languages Is reading alphabetic writing a different challenge from reading syllabic or logographic writing Learning to Read across Languages and Writing Systems examines these questions across seventeen languages representing the world s different major writing systems Each chapter highlights the key features of a specific language exploring research on learning to read spell and comprehend it and on implications for education The editors introduction describes the global spread of reading and provides a theoretical framework including operating principles for learning to read The editors final chapter draws conclusions about cross linguistic universal trends and the challenges posed by specific languages and writing systems

### *Syntactic Analysis and Description* David

Lockwood, 2005-12-07 This book is designed to teach undergraduate and beginning graduate students how to understand analyse and describe syntactic phenomena in different languages The book covers every aspect of syntax from the basics to more specialised topics such as clitics which have grammatical importance but cannot be used in isolation and negation in which a construction contradicts the meaning of a sentence The approach taken combines concepts from different theoretical schools which view syntax differently These include M A K Halliday s systemic functional linguistics the stratificational school advocated by Sydney Lamb and Kenneth L Pike s tagmemic model The emphasis of the book is on syntactic structures rather than linguistic meaning and the book stresses the difference between a well formed sentence and a meaningful one The final chapter brings these two aspects together to show the connections between syntax and semology Each chapter concludes with exercises from a diverse range of languages and a list of major technical terms The book also includes a glossary as an essential resource for students approaching this difficult subject for the first time

**Cross-Language Influences in Learning and Processing** Anat Prior, Tamar Degani, Zofia Wodniecka, 2022-06-01

Modern Hebrew Book Shula Gilboa, 2004 This is an introduction to reading writing and speaking Modern Hebrew It is

suitable for a complete beginner or for someone who has some rusty Hebrew The book covers all the language and situations needed for a trip to Israel whether on business or pleasure The course is very communication centred and the emphasis throughout is on speaking and being understood in practical everyday situations New grammar is presented through dialogues and there is plenty of opportunity to practise and check understanding throughout The Hebrew Script is introduced right from the start with transliteration for the early units to help with reading and pronunciation Culture notes accompany the text and there is a two way vocabulary listing at the end of the book This is a completely new book written by a leading teacher of Modern Hebrew as a Foreign Language There is a double CD to accompany the book which can be bought separately 0340 812877 or with the book in a pack 0340 812869

Language Development Across Childhood and Adolescence Ruth Aronson Berman, 2004-01-01 This volume brings together work by scholars with backgrounds in linguistics psycholinguistics developmental psychology education and language pathology As such the book adds psycholinguistic and crosslinguistic perspectives to the clinical and classroom approaches that have dominated the study of later language development Incorporating insights from prior language acquisition research it goes beyond preschool age to consider both isolated utterances and extended discourse conversational interactions and monologic text construction and both written and spoken language use from early school age across adolescence Data from French Hebrew Spanish and Swedish as well as English cover varied domains morphology and lexicon syntax and verb argument structure as well as peer interaction spelling processing of on line writing and reading poetry The epilogue suggests explanations for the findings documented Across the book the authors show how cognitive and social maturation combines with increased literacy in the path taken by schoolchildren and adolescents towards the flexible deployment of a growing repertoire of lexical elements in varied morpho syntactic constructions and different discourse contexts that constitutes the hallmark of maturely proficient language use

Language Processing and Acquisition in Languages of Semitic, Root-Based, Morphology Joseph Shimron, 2003-04-28 This book puts together contributions of linguists and psycholinguists whose main interest here is the representation of Semitic words in the mental lexicon of Semitic language speakers The central topic of the book confronts two views about the morphology of Semitic words The point of the argument is Should we see Semitic words morphology as root based or word based The proponents of the root based approach present empirical evidence demonstrating that Semitic language speakers are sensitive to the root and the template as the two basic elements bound morphemes of Semitic words Those supporting the word based approach present arguments to the effect that Semitic word formation is not based on the merging of roots and templates but that Semitic words are comprised of word stems and affixes like we find in Indo European languages The variety of evidence and arguments for each claim should force the interested readers to reconsider their views on Semitic morphology

*Tense and Aspect in Second Language Acquisition and Learner Corpus Research* Robert Fuchs,Valentin Werner,2020-06-30 The expression of temporal relations notably through tense and aspect is central in all processes of communication but commonly perceived and described as a major hurdle for non native speakers While this topic has already received considerable attention in the SLA literature it features less prominently in recent corpus based studies of learner language This volume intends to close this gap It shows which additional insights into the area of tense and aspect in learner language can be gained using corpus data addressing the following questions In which ways do corpus based studies complement work based on other methods How can a corpus based approach inform theories on the acquisition of tense and aspect specifically and of language acquisition in general Are results language specific or can universal principles be established How pervasive are effects of mode register within learner corpus data What role does native and non native input play Which methodological challenges come to the fore when using corpus data instead of elicited data How can the notion of target like performance be operationalized for corpus material Which implications do the findings from the learner corpora have for the teaching and learning of the target language Originally published as special issue of International Journal of Learner Corpus Research 4 2 2018

*Language* Barbara C. Lust, 2006-09-21 The remarkable way in which young children acquire language has long fascinated linguists and developmental psychologists alike Language is a skill that we have essentially mastered by the age of three and with incredible ease and speed despite the complexity of the task This accessible textbook introduces the field of child language acquisition exploring language development from birth Setting out the key theoretical debates it considers questions such as what characteristics of the human mind make it possible to acquire language how far acquisition is biologically programmed and how far it is influenced by our environment what makes second language learning in adulthood different from first language acquisition and whether the specific stages in language development are universal across languages Clear and comprehensive it is set to become a key text for all courses in child language acquisition within linguistics developmental psychology and cognitive science

**Intercultural Contact, Language Learning and Migration** Barbara Geraghty, Jean Conacher, 2014-09-25 At the heart of this volume lies an exploration of what actually happens to languages and their users when cultures come into contact What actions do supra national institutions nation states communities and individuals take in response to questions raised by the increasingly diverse forms of migration experienced in a globalized world The volume reveals the profound impact that decisions made at national and international level can have on the lives of the individual migrant language student or speech community Equally it evaluates the broader ramifications of actions taken by migrant communities and individual language learners around issues of language learning language maintenance and intercultural contact Reflecting Jan Blommaert's assertion that in a world shaped by globalization what is needed is a theory of language in society of changing language in a changing society this volume argues that researchers must increasingly seek diverse methodological approaches if they are to do justice to the diversity of experience and response they encounter

New Perspectives on the Development of Communicative and Related Competence in Foreign Language Education Izumi Walker, Daniel Kwang Guan Chan, Masanori Nagami, Claire Bourguignon, 2018-08-21 Nearly half a century has passed since Hymes proposed the concept of communicative competence to describe the knowledge and skills required for the appropriate use of language in a social context During these decades a number of scholars have applied and refined this concept In language education communicative competence has been identified as a major objective of learning This book will inform readers about communicative competence as a highly complex construct encompassing an array of sub competencies such as linguistic skills and proficiencies knowledge of socio cultural and socio pragmatic codes and the ability to engage in textual and conversational discourse Findings from research in related disciplines have pointed to the significance of factors that can contribute to the attainment of communicative competence Various teaching practices and relevant Information and Communication Technology ICT tools will be also introduced and discussed to achieve communicative competence as a complex ability It is a timely contribution to current research on key areas in the teaching learning and acquisition of second foreign languages

**The Semitic Languages** Robert

Hetzron, 1997 *The Semitic Languages* presents a unique comprehensive survey of individual languages or language clusters from their origins in antiquity to their present day forms. The Semitic family occupies a position of great historical and linguistic significance; the spoken and written languages of the Phoenicians, Hebrews, and Arabs spread throughout Asia and northern and central Africa. The Old Semitic civilizations in turn contributed significantly to European culture, and modern Hebrew, modern literary Arabic, Amharic, and Tigrinya have become their nations' official languages. The book is divided into three parts, and each chapter presents a self-contained article written by a recognized expert in the field. I. General Issues providing an introduction to the grammatical traditions, subgrouping, and writing systems of this language family. II. Old Semitic Languages. III. Modern Semitic Languages. Parts II and III contain structured chapters which enable the reader to access and compare information easily. These individual descriptions of each language or cluster include phonology, morphology, syntax, lexis, and dialects. Suggestions are made for the most useful sources of further reading, and the work is comprehensively indexed.

**Translation into the Second Language** Stuart Campbell, 2014-08-27. The dynamics of immigration, international commerce, and the postcolonial world make it inevitable that much translation is done into a second language, despite the prevailing wisdom that translators should only work into their mother tongue. This book is the first study to explore the phenomenon of translation into a second language in a way that will interest applied linguists, translators, and translation teachers, and ESOL teachers working with advanced level students. Rather than seeing translation into a second language as deficient output, this study adopts an interlanguage framework to consider L2 translation as the product of developing competence; learning to translate is seen as a special variety of second language acquisition. Through carefully worked case studies, separate components of translation competence are identified among them: the ability to create stylistically authentic texts in English, the ability to monitor and edit output, and the psychological attitudes that the translator brings to the task. While the case studies mainly deal with Arabic speakers undergoing translator training in Australia, the conclusions will have implications for translation into a second language, especially English, around the world. *Translation into the Second Language* is firmly grounded in empirical research, and in this regard it serves as a stimulus and a methodological guide for further research. It will be a valuable addition for advanced undergraduate and postgraduate students of applied linguistics, translation theory, bilingualism, and second language acquisition, as well as those involved in teaching or practicing translation at a professional level.
