The National Household HIV Prevalence and Risk Survey of South African Children Heather Brookes, Olive Shisana, Linda M. Richter, 2004 The National Household HIV Prevalence and Risk Survey of South African Children forms part of the Nelson Mandela HSRC Study of HIV AIDS South African National HIV Prevalence Behavioural Risks and Mass Media Household Survey 2002 This report provides information on HIV prevalence orphanhood risk factors for HIV infection and knowledge of HIV AIDS among South African children A total of 3 988 children aged 2 to 18 years participated in the survey Caregivers of 2 138 children 2 to 11 years of age answered a questionnaire on the child's behalf A total of 740 children 12 to 14 years of age directly answered a separate questionnaire An additional 1 110 children and between 15 and 18 years of age answered a youth questionnaire Of the 3 988 children 3 294 82.6 per cent provided a saliva specimen for HIV testing The results show HIV prevalence among children 2 to 18 years of age to be 5.4 per cent Prevalence was nearly constant across age groups and did not vary significantly There were insufficient numbers to compare prevalence across race groups The prevalence was higher than expected Further studies are necessary to verify this finding

Public Health Aspects of HIV/AIDS in Low and Middle Income Countries David Celentano, Chris Beyrer, 2008-09-11 It has now been 25 years since the apocryphal report in the CDC Morbidity and Mortality Weekly Report dated June 5 1981 entitled *Pneumocystis Pneumonia* Los Angeles which announced what was to become HIV AIDS HIV has now affected virtually all countries that have looked for it and has had a devastating impact on the public health and medical care infrastructure around the world HIV AIDS has also disproportionately affected nations with the least capacity to confront it especially the developing world nations in Sub Saharan Africa South and Southeast Asia and the emerging republics of Eastern and Central Asia The pandemic unlike any other disease of our time has had profound impacts on the practice of public health itself bringing affected communities into decision making demanding North South partnerships and collaborations and changing the basic conduct of clinical and prevention trials research While much has been written in scholarly publications for medical epidemiologic and disease control specialists there is no comprehensive review of the public health impact and response to HIV AIDS in the developing world This edited volume seeks to systematically describe the emergence and form of the epidemics epidemiology the social community and political response and the various measures to confront and control the epidemic with varying levels of success Of particular importance are strategies that appear to have been useful in ameliorating the epidemic while contrasting the situation in a neighboring country or region where contrasting prevention or care initiatives have had a deleterious outcome Common to all responses has been the international multi sectoral response represented by the Global Fund for HIV AIDS Malaria and Tuberculosis the President's Emergency Plan for AIDS Relief and the Gates Foundation among others to promote HIV pharmacologic therapy in resource poor settings The chapter authors will explore the political challenges in meeting HIV AIDS prevention and care in concert with the public health realities in specific country and

regional context **The African AIDS Epidemic** John Iliffe, 2005-02-15 This history of the African AIDS epidemic is a much needed accessibly written historical account of the most serious epidemiological catastrophe of modern times The African AIDS Epidemic A History answers President Thabo Mbeki's provocative question as to why Africa has suffered this terrible epidemic While Mbeki attributed the causes to poverty and exploitation others have looked to distinctive sexual systems practiced in African cultures and communities John Iliffe stresses historical sequence He argues that Africa has had the worst epidemic because the disease was established in the general population before anyone knew the disease existed HIV evolved with extraordinary speed and complexity and because that evolution took place under the eyes of modern medical research scientists Iliffe has been able to write a history of the virus itself that is probably unique among accounts of human epidemic diseases In giving the African experience a historical shape Iliffe has written one of the most important books of our time The African experience of AIDS has taught the world much of what it knows about HIV AIDS and this fascinating book brings into focus many aspects of the epidemic in the longer context of massive demographic growth urbanization and social change in Africa during the latter half of the twentieth century The African AIDS Epidemic A History is a brilliant introduction to the many aspects of the epidemic and the distinctive character of the virus *HIV/AIDS, Poverty and Pastoral Care and*

Counselling Vhumani Magezi, 2007-12-01 This publication carefully describes the HIV AIDS pandemic and how it is understood in some African contexts which hampers prevention initiatives It also delineates the complex nature of the poverty and HIV AIDS interplay To address the situation a family systems practical ecclesiological theology and approach to HIV AIDS ministry and a pastoral counselling approach that derives from and is sensitive to the African context are proposed

Changing the Course of AIDS David Dickinson, 2011-01-15 Changing the Course of AIDS is an in depth evaluation of a new and exciting way to create the kind of much needed behavioral change that could affect the course of the global health crisis of HIV AIDS This case study from the South African HIV AIDS epidemic demonstrates that regular workers serving as peer educators can be as or even more effective agents of behavioral change than experts who lecture about the facts and so called appropriate health care behavior After spending six years researching the response of large South African companies to the epidemic that is decimating their workforce as well as South African communities David Dickinson describes the promise of this grassroots intervention workers educating one another in the workplace and community and the limitations of traditional top down strategies Dickinson's book takes us right into the South African workplace to show how effective and yet enormously complex peer education really is We see what it means when workers directly tackle the kinds of sexual gender religious ethnic and broader social and political taboos that make behavior change so difficult particularly when that behavior involves sex and sexuality Dickinson's findings show that people who are not officially health care experts or even health care workers can be skilled and effective educators In this book we see why peer education has so much to offer societies grappling with the HIV AIDS epidemic and why those interested in changing behaviors to ameliorate other health

problems like obesity alcoholism and substance abuse have so much to learn from the South African example *The Political Economy of AIDS in Africa* Nana K. Poku, 2017-07-05 Sub Saharan Africa is a region devastated by HIV AIDS The extent of the epidemic is only now becoming clear as increasing numbers of people with HIV are becoming ill In the absence of massively expanded prevention treatment and care efforts the AIDS death toll on the continent is set to escalate rapidly Despite progress being achieved in localized settings the alarming statistics reflect the continuing failure of advanced countries to mount a response that matches the scale and severity of the African HIV AIDS crisis Over and above the colossal personal suffering the dire social and economic consequences for fragile nation states are already being felt not only in health but in education industry agriculture transport human resources and economies in general Countries already crippled by drought poverty debt forced migration and civil war must now contend with massive deterioration in child survival rates and life expectancy the erosion of the economic family base massive and insupportable demands on health and public services chronic labour shortages and volatile national security Through a critical and detailed exploration of specific case studies this invaluable volume brings together an unparalleled array of international contributors to redefine the political and economic contours of this calamitous epidemic It examines the impact of the shortfalls in the Global Fund allocation the slow pace of administrative processing of aid and the weaknesses of institutional responses to the crisis from African countries and their partners in the global health community It is essential reading for all concerned with public health epidemiology HIV AIDS research globalization development Africa and indeed our shared future Features include Unique assessments of HIV AIDS and its impact on democracy and governance in African states Wide ranging regional and country studies by the foremost thinkers in their fields Multi disciplinary contributions from areas including Politics Sociology Public Health and Development Studies Compelling and convincing evidence thematic in approach Innovative and culturally specific insights for long term planning care and support **Sustainable Manufacturing?** Simon Roberts, 2006 Intended for academics and students in the fields of economic development sociology and economic geography both in South Africa and internationally This work is also useful for the Development Studies Development Economics African Studies and Geography departments in universities in Europe and North America **Men Behaving Differently** Graeme Reid, Liz Walker, 2005 Recent years have seen a growing world wide concern about men and boys Do boys have appropriate role models at home Are girls outperforming boys at school Is men s health under undue pressure **The Macroeconomics of HIV/AIDS** Mr. Markus Haacker, 2004-11-19 This paper analyzes the macroeconomics of HIV AIDS The paper highlights that the mortality and morbidity associated with AIDS make it unlike most other types of sickness and disease The paper describes the most common approaches used in accounting for growth in the context of an HIV AIDS epidemic The impact of HIV AIDS on education and the accumulation of human capital is discussed The paper also discusses the impact of HIV AIDS on the public sector and elaborates certain demographic events specific to the HIV AIDS pandemic Feminisms, HIV and AIDS V.

Tallis, 2012-07-30 Women are disproportionately affected by HIV and AIDS By focusing on the pandemic at its epicentre in Southern Africa this book explores the gendered power inequalities driving women's vulnerability to HIV and provides suggestions of how to individually and collectively address women's oppression
