**Poverty, Solidarity, and Poor-Led Social Movements** Monique Deveaux, 2021-08-17. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International license. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Poverty is not only about material deprivation but also about the subordination and disempowerment of poor populations. So why isn't the emancipation and empowerment of the poor a core goal of ethical arguments for poverty reduction? Deveaux argues in this book that philosophers fail to prioritize these ends and to recognize the moral and political agency of poor people because they still conceive of poverty narrowly and apolitically as mere needs scarcity. By comparison, poor activists and critical poverty researchers who see deprivation as structural exclusion and powerlessness advocate a poor-centered, poor-led approach to reducing poverty. Stuck in an older paradigm of poverty thinking, philosophers have failed to recognize the power and moral authority of poor communities and their movements for justice and social change. If normative ethicists seek to contribute to proposals for just and durable poverty reduction, they will need to look to the insights and aims of poor, poor-led social movements. From rural landless workers in Brazil to urban shack dwellers in South Africa to unemployed workers impoverished by neoliberal economic policies in Argentina, poor-led organizations and movements advance a more political understanding of poverty and of what is needed to eradicate it. Deveaux shows how these groups develop the political consciousness and collective capabilities of poor communities and help to create the basis for solidarity among poor populations. Defending the idea of a political responsibility for solidarity, she shows how non-poor outsiders, individuals, institutions, and states can help to advance a transformative anti-poverty agenda by supporting the efforts of these movements.

**Social Movements** David S. Meyer, Nancy Whittier, Belinda Robnett, 2002. Why do social movements take the forms they do? How do activists' efforts and beliefs interact with the cultural and political contexts in which they work? This book considers the intersections of opportunities and identities, structures and cultures in social movements.

**Participation, Marginalization and Welfare Services** Aila-Leena Matthies, Lars Uggerhøj, 2016-05-13. Current debates around participation and marginalization dominate the agenda of many European political forums. There is an increasing concern about the stability of social cohesion and a growing number of particular groups of people who are regarded as

being at risk of being socially excluded or marginalized This volume goes beyond the surface of public discussions to look at the central role played by welfare services in European societies in either strengthening or hindering participatory citizenship and democracy In current discussions welfare services understood in a broad sense are centrally positioned there are high expectations that welfare services can hinder marginalization and enable participation Yet marginalization is in most cases rooted in the deeper structures of society with economy participation and involvement dependent on political or highly personal factors which are beyond the scope of welfare services This groundbreaking volume posits that participation and marginalization are twin concepts expressing opposing sides of one and the same processes faced by individuals and communities It will be essential reading for social workers sociologists and policy makers throughout Europe      *Social Stratification and Social Movements* Sabrina Zajak, Sebastian Haunss, 2019-11-22 This volume addresses the contested relationship between social stratification and social movements in three different ways First the authors address the relationship between social stratification and the emergence of protest mobilization Second the texts look at social stratification and social positions to explain variations in political orientations as well as differing aims and interests of protestors Finally the volume focuses on the socio structural composition of protestors *Social Stratification and Social Movements* takes up recent attempts to reconnect research on these two fields Instead of calling for a return of a class perspective or abandoning the classical social movement research agenda it introduces a multi dimensional perspective on stratification and social movements and broadens the view by extending the empirical analysis beyond Europe      *Grassroots Associations* David Horton Smith, 2000-05-11 This volume explores the world of grassroots organizations and outlines their history while differentiating them from the more familiar paid staff nonprofit organizations David Horton Smith a leading scholar on the nonprofit and voluntary sector examines the available empirical research on the topic and analyzes the theoretical concepts that have come to define such associations He affords the reader a complete detailed description of the nature and characteristics of grassroots organizations their formation structure leadership life cycle effectiveness and their integral role in postmodern societies      **Membership Based Organizations of the Poor** Martha Chen, Renana Jhabvala, Ravi Kanbur, Carol Richards, 2007-05-07 This highly topical volume with contributions from leading experts in the field explores a variety of questions about membership based organizations of the poor Analyzing their success and failure and the internal and external factors that play a part it uses studies from both developed and developing countries Put together by a group of prestigious editors the contributors address a range of questions including What structures and activities characterize MBOPs What is meant by success and what factors account for success What are the internal governance structure and leadership and external policy environment factors that account for success Are these factors replicable across countries or even within countries What are the constraints to successful MBOPs expanding or to new ones being formed What sort of policy environment enables the success of MBOPs and the formation of successful MBOPs What

types of institutional reforms are needed to ensure the representation of the poor through their own MBOs This is an insightful work that will be invaluable for students and researchers studying or working in the areas of international and development economics and development studies      Nonprofit Organizations and Civil Society in the United States Kelly LeRoux, Mary K. Feeney, 2014-11-13 LeRoux and Feeney's Nonprofit Organizations and Civil Society in the United States makes a departure from existing nonprofit texts on the market rather than focus on management it focuses on nonprofit organizations and their contributions to the social political and economic dimensions of society The book also covers the nexus between nonprofits and civil society This text offers a theory oriented undergraduate introduction to the nonprofit field and an examination of the multifaceted roles these organizations play in American society      **Coalitions & Political Movements** Thomas R. Rochon, David S. Meyer, 1997 Twelve contributions apply recent theory on movements to the nuclear freeze movement of the 1980s Subject areas include the development of the freeze movement its social and political impact and the question of whether the movement simply disintegrated or was transformed into other forms of activism Annotation copyrighted by Book News Inc Portland OR      Clearinghouse Review , 1980      Political Women Alana Jeydel, 2004-08-02 Under what conditions are political elites responsive to social movements and when do social movements gain access to political elites This book explores this question with regard to the women's movement in the US asking under what conditions are Congress and the presidency responsive to the women's movement and when will the women's movement gain access to Congress and the presidency The book systematically compares the relation between political leaders and each of the three waves of the women's movement 1848 1889 1890 1928 and 1960 1985 in light of the political dynamics that each wave faced The author utilizes perspectives and methods from the fields of Political Science Sociology and History to illustrate the ways in which changing political dynamics impacted the battle for both women's suffrage and the Equal Rights Amendment A significant addition to the study of women's history and American studies Political Women illustrates the important roles that political leaders played in the battle for women's suffrage and the ERA and demonstrates the political savvy among women suffrage activists who recognized the institutional barriers present in the US political system and fought to overcome them      **Community and Organization in the New Left, 1962-1968** Wini Breines, 1989 Did New Left activists have an opportunity to start a revolution that they simply could not bring off Was their rejection of conventional forms of political organization a fatal flaw or were the apparent weaknesses of the movement the lack of central authority the distrust of politics actually hidden strengths Wini Breines traces the evolution of the New Left movement through the Free Speech Movement Students for a Democratic Society SDS and SDS's community organization projects For Breines the movement's goal of participatory decision making even when it was not achieved made up for its failure to take practical and direct action By the late 1960s antiwar activism contributed to the decline of the New Left as the movement was flooded with new participants who did not share the founding generation's political experiences or values Originally published in 1982

Wini Breines's classic work now includes a new preface in which she reassesses and for the most part affirms her initial views of the movement. She argues that the movement remains effective in the midst of radical changes in activist movements. Breines also summarizes and evaluates the new and growing scholarship on the 1960s. Her provocative analysis of the New Left remains important today. Rich People's Movements Isaac William Martin, 2015-02 Why do protesters sometimes take to the streets to demand lower taxes on the rich? In this urgently relevant study, sociologist Isaac William Martin examines how these protesters used tactics that they learned in movements of the poor and powerless and sometimes won big. The Power of Tiananmen Dingxin Zhao, 2008-12-05 In the spring of 1989, over 100,000 students in Beijing initiated the largest student revolt in human history. Television screens across the world filled with searing images from Tiananmen Square of protesters thronging the streets, massive hunger strikes, tanks set ablaze, and survivors tending to the dead and wounded after a swift and brutal government crackdown. Dingxin Zhao's award-winning *The Power of Tiananmen* is the definitive treatment of these historic events. Along with grassroots tales and interviews with the young men and women who launched the demonstrations, Zhao carries out a penetrating analysis of the many parallel changes in China's state-society relations during the 1980s. Such changes prepared an alienated academy, gave rise to ecology-based student mobilization, restricted government policy choices, and shaped student emotions and public opinion, all of which Zhao argues account for the tragic events in Tiananmen. *Handbook of Classical Sociological Theory* Seth Abrutyn, Omar Lizardo, 2021-11-01 This is the first handbook focussing on classical social theory. It offers extensive discussions of debates, arguments, and discussions in classical theory and how they have informed contemporary sociological theory. The book pushes against the conventional classical theory pedagogy which often focused on single theorists and their contributions and looks at isolating themes, capturing the essence of the interest of classical theorists that seem to have relevance to modern research questions and theoretical traditions. This book presents new approaches to thinking about theory in relationship to sociological methods. Studies in Empowerment Robert E. Hess, 2014-04-04 This adaptable book offers diverse applications of the empowerment model to the promotion of mental health and the prevention of mental illness. Topics span the developmental trends of empowerment as an individual achievement, a community experience, and a professional aim in relation to social intervention strategies and tactics.
