Poor Richards Politicks Benjamin Franklin His New American Order:

The Politics of History Arthur H. Shaffer, 2011-12-31 This is an analysis of the American Revolutionary generation's attempt to create a national history that would justify the Revolution and develop a sense of nationhood. Shaffer pursues a number of themes and establishes a connection between the historians' republican ideology, political concerns, and outlook and the precise ways in which they interpreted American history. He also includes an analysis of their background, education, profession, political persuasion, personal ambitions, and circumstances and attitudes toward the problem of union during the 1780s. The writings here offer unusual insights into the mind of the Revolutionary generation. The histories produced during the early national period represent the beginnings of a genre of writing new to America, one characterized by the subjugation of history to the service of nationalism. It is this element—nationalism—that gave this history its flavor, made possible its achievement, saddled it with difficulties, and although unintentionally produced a tone and emphasis different from that of the Enlightenment. The contribution of the Revolutionary generation of historians to the public identity represents an important aspect of the intellectual history of the early national period. With all their frequent vagueness and imprecision of formulation, almost incantatory repetitiousness, and patriotic sentimentality, the works of the first national generation of historians comprise a revealing effort to come to grips with the meaning of the Revolution and nationhood. This striving charted much of the course that American historiography was to travel thereafter.

American Models of Revolutionary Leadership Daniel Judah Elazar, Ellis Katz, 1992 This book is designed to be a contribution to the lessons the world can learn from the leadership in the American Revolutionary experience. The emphasis is on the transition from revolutionary to stable democratic leadership. The first part contains chapters by Garry Wills, Forest McDonald, and Barry Schwartz on *Power Gained by Surrender*, *Washington Cato and Honor*, and *George Washington and a Whig Conception of Leadership* respectively. The second section focuses on contrasting models and includes the selections *Samuel Adams and Saint Just: Contrasting Examples of Professional Revolutionaries* by Moshe Hazani, *Revolutionary Leadership and the Problem of Power* by Gary Schmitt, and *Albert Gallatin: Political Method in Leadership* by Rozann Rothman. The final section looks toward leadership in subsequent generations in sections *Lincoln's Political Humanitarianism*, *Moral Reform and the Covenant Tradition in American Political Culture* by David Greenstone, and *Where Have All the Leaders Gone: Ruling Elites and Revolution since World War II* by Steven Spiegel. Co-published with the Center for the Study of Federalism.

Levack,2022 Distrust of public institutions which reached critical proportions in Britain and the United States in the first two decades of the twenty first century was an important theme of public discourse in Britain and colonial America during the early modern period Demonstrating broad chronological and thematic

range the historian Brian P Levack explains that trust in public institutions is more tenuous and difficult to restore once it has been betrayed than trust in one's family friends and neighbors because the vast majority of the populace do not personally know the officials who run large national institutions. Institutional distrust shaped the political, legal, economic and religious history of England, Scotland and the British colonies in America. It provided a theoretical and rhetorical foundation for the two English revolutions of the seventeenth century and the American Revolution in the late eighteenth century. It also inspired reforms of criminal procedure, changes in the system of public credit and finance and challenges to the clergy who dominated the Church of England, the Church of Scotland and the churches in the American colonies. This study reveals striking parallels between the loss of trust in British and American institutions in the early modern period and the present day.
