Read the preface **Routledge Handbook of East Asian Popular Culture** Koichi Iwabuchi, Eva Tsai, Chris Berry, 2016-12-01 Since the 1990s there has been a dramatic increase in cultural flows and connections between the countries in the East Asian region Nowhere is this more apparent than when looking at popular culture where uneven but multilateral exchanges of Japanese Korean Taiwanese Hong Kong and Chinese products have led to the construction of an East Asian Popular Culture This is both influenced by and in turn influences the national cultures and generates transnational co production and reinvention As East Asian popular culture becomes a global force it is increasingly important for us to understand the characteristics of contemporary East Asian popular culture and in particular its transnational nature In this handbook the contributors theorize East Asian experiences and reconsider Western theories on cultural globalization to provide a cutting edge overview of this global phenomenon The Routledge Handbook of East Asian Popular Culture will be of great interest to students and scholars of a wide range of disciplines including Cultural Studies Media Studies Communication Studies Anthropology Sociology and Asian Studies in general *The Popular as Art?* Thomas Hecken, 2024-09-28 This book will reconstruct and analyze the logic and frameworks surrounding positive evaluations of popular art in articles and books predominantly published in the United States and western Europe It will also examine negative evaluations of the popular especially those that have successfully prevented the popular from being perceived as good art and still provide partially effective counterarguments today This book will examine both relevant judgments on individual works and groups of works as well as general judgments and assessments Architecture, Mentalities and Meaning Patrick Malone, 2017-06-14 In order to function architectural theory and practice must be shaped to suit current cultural economic and political forces Thus architecture embodies reductive logic that conditions the treatment of human and social processes which raises the question of how to define objectivity for architectural mentalities that must conform to a set of immediate conditions This book focuses on meaning and on the physical and mental processes that define life in built environments The potential to draw knowledge from aesthetics psychology political economy philosophy geography and sociology is offset by the fact that architectural logic is inevitably reductive cultural socio economic and political However despite the duty to conform it is argued that the treatment of human processes and the understanding of architectural mentalities can benefit from interdisciplinary linkages small freedoms and cracks in a system of imperatives that can yield the means of greater objectivity This is valuable reading for students and researchers interested in architectural theory as a working reality and in the relationships between architecture and other fields **A Cultural History of Color in the Modern Age** Anders Steinvall, Sarah Street, 2022-08-31 A Cultural History of Color in the Modern Age covers the period 1920 to the present a time of extraordinary developments in colour science philosophy art design and technologies The

expansion of products produced with synthetic dyes was accelerated by mass consumerism as artists designers architects writers theater and filmmakers made us a color conscious society This influenced what we wore how we chose to furnish and decorate our homes and how we responded to the vibrancy and chromatic eclecticism of contemporary visual cultures The volume brings together research on how philosophers scientists linguists and artists debated color s polyvalence its meaning to different cultures and how it could be measured manufactured manipulated and enjoyed Color shapes an individual s experience of the world and also how society gives particular spaces objects and moments meaning The 6 volume set of the Cultural History of Color examines how color has been created traded used and interpreted over the last 5000 years The themes covered in each volume are color philosophy and science color technology and trade power and identity religion and ritual body and clothing language and psychology literature and the performing arts art architecture and interiors and artefacts Anders Steinvall is Senior Lecturer in English Linguistics at Ume University Sweden Sarah Street is Professor of Film at the University of Bristol UK Volume 6 in the Cultural History of Color set General Editors Carole P Biggam and Kirsten Wolf
