Marcon, 2015-07-16 From the early seventeenth to the mid nineteenth century Japan saw the creation development and apparent disappearance of the field of natural history or honzogaku Federico Marcon traces the changing views of the natural environment that accompanied its development by surveying the ideas and practices deployed by honzogaku practitioners and by vividly reconstructing the social forces that affected them These include a burgeoning publishing industry increased circulation of ideas and books the spread of literacy processes of institutionalization in schools and academies systems of patronage and networks of cultural circles all of which helped to shape the study of nature In this

pioneering social history of knowledge in Japan Marcon shows how scholars developed a sophisticated discipline that was analogous to European natural history but formed independently He also argues that when contacts with Western scholars traders and diplomats intensified in the nineteenth century the previously dominant paradigm of honzogaku slowly succumbed to modern Western natural science not by suppression and substitution as was previously thought but by creative adaptation and transformation *Zoo and Aquarium History* Vernon N.
