Ritual, Ceremony and the Changing Monarchy in France, 1350-1789 Lawrence M. Bryant, 2024-08-01 This collection of articles explores changes in images of the French monarchy propagated in ceremonies that townspeople and officials created for their kings Bryant looks at royal entries as massive processional and street theaters in which members of the kingdom both discoursed with and exalted the king in a multiplicity of ritual forms symbolism and public art These ceremonies personalized the idea of the state as embodied in the king and they publicized rights and authority new historical or mythological themes innovative styles of monumental architecture and art and theories of ideal and shared government

Living with Religious Diversity in Early-Modern Europe Dagmar Freist, 2016-12-05 Current scholarship continues to emphasise both the importance and the sheer diversity of religious beliefs within early modern societies Furthermore it continues to show that despite the wishes of secular and religious leaders confessional uniformity was in many cases impossible to enforce As the essays in this collection make clear many people in Reformation Europe were forced to confront the reality of divided religious loyalties and this raised issues such as the means of accommodating religious minorities who refused to conform and the methods of living in communion with those of different faiths Drawing together a number of case studies from diverse parts of Europe Living with Religious Diversity in Early Modern Europe explores the processes involved when groups of differing confessions had to live in close proximity sometimes grudgingly but often with a benign pragmatism that stood in opposition to the will of their rulers By focussing on these themes the volume bridges the gap between our understanding of the confessional developments as they were conceived as normative visions and religious culture at the level of implementation The contributions thus measure the religious policies articulated by secular and ecclesiastical elites against the lived experience of people going about their daily business In doing this the collection shows how people perceived and experienced the religious upheavals of the confessional age and how they were able to assimilate these changes within the framework of their lives

Histories Marko Nenonen, Raisa Maria Toivo, 2013-10-02 This book gives an analytical review of the history of witch hunt historiography So far not much attention has been paid to how the European witch hunts have been studied and explained in some 150 years of academic research on the issue The history of the approaches and explanations in witch hunt research fundamentally contributes not only to our understanding of the bizarre phenomenon in European history but also contributes to understanding of cultural as well as academic trends which heavily direct any research even when scholars are not cognisant of their underlying premises How and why the picture of witch hunts has been changing in scholarly works and text books is as illuminating an issue as the proper explanations offered by the research works Contributors include Rune Blix Hagen Ronald Hutton Gunnar W Knutsen Marianna G Muravyeva Marko Nenonen Raisa Maria Toivo Charles Zika

Faith and Fanaticism Robert Hooworth-Smith, 2017-09-08 The Spanish Inquisition is often seen as the archetype of religious fervour and fanaticism and several of the papers here naturally focus on its activities Overall however this volume aims to look at the broader context of religious attitudes in Spain from the end of the 15th to the late 17th century In an examination of how the religious orders behaved the contributors demonstrate that concepts which may now appear excessive were perceived at that time Similarly poetry and other literary texts provide evidence for how Jews viewed Christians and Christians viewed Moors *Routledge Library Editions: The History of Social Welfare* Various, 2021-08-05 This set of 25 volumes originally published between 1805 and 1992 amalgamates original nineteenth century material and more recent research and analysis on the development of social welfare in Britain and Europe From Elizabethan poor relief through the Poor Laws of the nineteenth century to the establishment of the British National Health Service in the mid twentieth century this set provides a comprehensive overview of the germination and establishment of modern social welfare Although the set mainly focuses on social welfare in Britain it also contains some work on welfare in Europe This set will be of keen interest to those studying the history of social welfare social policy poverty and class *Religion and Magic in Western Culture* Daniel Dubuisson, 2016-04-08 In the history of Western culture theology and science a strict dichotomy exists between religion and magic religion as the intellectually and morally superior one magic as the primitive superstitious

demonic other The present work aims to break with this tradition and traces the origin of this dichotomy as well as its many purposes Whose powers does it serve Which interests and ideological stakes does it conceal Moreover the author proposes a new epistemological framework for the study of magisms as well as their rehumanisation and argues for a rehabilitation of their studies

Martin, 2001-01-19 This book examines drinking and attitudes to alcohol consumption in late medieval and early modern England France and Italy especially as they related to sexual and violent behavior and to gender relations According to widespread beliefs the consumption of alcohol led to increased sexual activity among both men and women and it also led to disorderly conduct among women and violent conduct among men Dr Lynn shows how alcohol was a fundamental part of the diets of most people including women resulting in daily drinking of large amounts of ale beer or wine This study offers an intimate insight into both the altered states induced by alcohol and by opposition into normal relations in family community and society

Warrior Pursuits Brian Sandberg, 2010-11-15 How did warrior nobles practices of violence shape provincial society and the royal state in early seventeenth century France Warrior nobles frequently armed themselves for civil war in southern France during the troubled early seventeenth century These bellicose nobles practices of violence shaped provincial society and the royal state in early modern France The southern French provinces of Guyenne and Languedoc suffered almost continual religious strife and civil conflict between 1598 and 1635 providing an excellent case for investigating the dynamics of early modern civil violence Warrior Pursuits constructs a cultural history of civil conflict analyzing in detail how provincial nobles engaged in revolt and civil warfare during this period Brian Sandberg s extensive archival research on noble families in these provinces reveals that violence continued to be a way of life for many French nobles challenging previous scholarship that depicts a progressive civilizing of noble culture Sandberg argues that southern French nobles engaged in warrior pursuits social and cultural practices of violence designed to raise personal military forces and to wage civil warfare in order to advance various political and religious goals Close relationships between the profession of arms the bonds of nobility and the culture of revolt allowed

nobles to regard their violent performances as heroic gestures and beautiful warrior acts Warrior nobles represented the key organizers of civil warfare in the early seventeenth century orchestrating all aspects of the conduct of civil warfare from recruitment to combat according to their own understandings of their warrior pursuits Building on the work of Arlette Jouanna and other historians of the nobility Sandberg provides new perspectives on noble culture state development and civil warfare in early modern France French historians and scholars of the Reformation and the European Wars of Religion will find Warrior Pursuits engaging and insightful

Faith on the Margins Charles H. Parker, 2009-07-01 In the wake of the 1572 revolt against Spain the new Dutch Republic outlawed Catholic worship and secularized all church property Calvinism prevailed as the public faith yet Catholicism experienced a resurgence in the first half of the seventeenth century with membership rivaling that of the Calvinist church In a wide ranging analysis of a marginalized yet vibrant religious minority Charles Parker examines this remarkable revival It had little to do with the traditional Dutch reputation for tolerance A keen sense of persecution combined with a vigorous program of reform shaped a movement that imparted meaning to Catholics in a Protestant republic A pastoral organization known as the Holland Mission emerged to establish a vigorous Catholic presence A chronic shortage of priests enabled laymen and women to exercise an exceptional degree of leadership in local congregations Increased interaction between clergy and laity reveals a picture that differs sharply from the standard account of the Counter Reformation s clerical dominance and imposition of church reform on a reluctant populace There were few places in early modern Europe where a proscribed religious minority was so successful in remaining a permanent fixture of society Faith on the Margins casts light on the relationship between religious minorities and hostile environments
