Kincheloe, 2005 The Critical Constructivism Primer introduces education students to the study of knowledge how it is inscribed by particular values and produced in problematic ways whose interests it serves and how it shapes the identities of those who consume it Critical constructivism is an epistemological position that examines the process by which knowledge is socially constructed Joe L Kincheloe takes readers through the basic concepts and alerts them to the dangers of objectivism reductionism and the pathological views of self and world that emerge if students and educators are unaware of the construction of knowledge by dominant power interests The book is essential reading for individuals who want to become researchers and educators *Standardized Testing Primer* Richard P. automated naval vessels It also showcases the diversity of approaches to queering international law that are emerging with some authors drawing attention to the violence of neo colonial international law and others engaging in more utopian and reparative thinking This collection of queer theoretical engagements with international law will be invaluable to scholars of international law and international relations with an interest in critical approaches to these areas as well as to researchers activists and practitioners working in cultural gender queer and or postcolonial studies
