Nongovernmental Organizations in Environmental Struggles Raymond L. Bryant, 2008-10-01 Why are nongovernmental organizations NGOs so successful in today's world How do they empower themselves This insightful book provides important new perspectives on the strategic thinking of NGOs the way they identify themselves and how they behave Raymond L Bryant develops a novel theoretical perspective around the concept of moral capital and assesses that concept through in depth case studies of NGOs in the Philippines The book's focus is on perceptions of NGOs as moral and altruistic and how such perceptions can translate into social power Bryant examines the ambiguous qualities of NGO strategizing the ways in which the quest for moral capital is bedeviled by the need to compromise with political and economic elites and the possibilities for NGOs to achieve political goals as moral leaders

The Ecology of War in China Micah S. Muscolino, 2015 This book explores the interplay between war and the environment in Henan Province a hotly contested frontline territory that endured massive environmental destruction and human disruption during the conflict between China and Japan that raged during World War II In a desperate attempt to block Japan's military advance Chinese Nationalist armies under Chiang Kai shek broke the Yellow River's dikes in Henan in June 1938 resulting in devastating floods that persisted until after the war's end Greater catastrophe struck Henan in 1942 1943 when famine took some two million lives and displaced millions more Focusing on these war induced disasters and their aftermath this book conceptualizes the ecology of war in terms of energy flows through and between militaries societies and environments Ultimately Micah Muscolino argues that efforts to procure and exploit nature's energy in various forms shaped the choices of generals the fates of communities and the trajectory of environmental change in North China

Human Ecology as Human Behavior John W. Bennett, 2017-07-05 Human interaction with the natural environment has a dual character By turning increasing

quantities of natural substances into physical resources human beings might be said to have freed themselves from the constraints of low technology survival pressures However the process has generated a new dependence on nature in the form of complex socionatural systems as Bennett calls them in which human society and behavior are so interlocked with the management of the environment that small changes in the systems can lead to disaster Bennett s essays cover a wide range from the philosophy of environmentalism to the ecology of economic development from the human impact on semi arid lands to the ecology of Japanese forest management This expanded paperback edition includes a new chapter on the role of anthropology in economic development Bennett s essays exhibit an underlying pessimism if human behavior toward the physical environment is the distinctive cause of environmental abuse then reform of current management practices offers only temporary relief that is conservationism like democracy must be continually reaffirmed Clearly presented and free of jargon Human Ecology as Human Behavior will be of interest to anthropologists economists and environmentalists

The Land That Could Be William A. Shutkin, 2001-08-24

Environmentalism and lawyer William Shutkin describes a new kind of environmental and social activism spreading across the nation one that joins the pursuit of environmental quality with that of civic health and sustainable local economies In this book environmentalist and lawyer William Shutkin describes a new kind of environmental and social activism spreading across the nation one that joins the pursuit of environmental quality with that of civic health and sustainable local economies In the face of challenges posed by often corrosive market forces and widespread social disaffection this civic environmentalism is creating nothing less than a new public discourse and dynamic social vision grounded in environmental action Shutkin points the way to vibrant sustainable communities through four inspiring examples of civic environmentalism

in action the redevelopment of contaminated urban land for agriculture in inner city Boston mass transit based development and waterfront restoration in Oakland protection of open space and conservation based development in rural Colorado and smart growth and sustainability strategies in suburban New Jersey The book s underlying message is that the nation s environmental health is a critical factor in its success as a vital democracy Social health democratic community and environmentalism Shutkin shows are one From the author s preface This book asserts that environmentalism is as much about protecting ordinary places as it is about preserving wilderness areas as much about promoting civic engagement as it is about pursuing environmental litigation and as much about implementing sound economic development strategies as it is about negotiating global climate change treaties Ultimately I believe environmentalism is nothing less than about our conception of ourselves as a social and political community what the bald eagle our national symbol really means

Cold War Ecology Arvid Nelson, 2008-10-01 East Germany its economy and its society were in decline long before the country s political collapse in the late 1980s The clues were there in the natural landscape Arvid Nelson argues in this groundbreaking book but policy analysts were blind to them Had they noted the record of the leadership s values and goals manifest in the landscape they wouldn t have hailed East Germany as a Marxist Leninist success story Nelson sets East German history within the context of the landscape history of two centuries to underscore how forest and ecosystem change offered a reliable barometer to the health and stability of the political system that governed them Cold War Ecology records how East German leaders indifference to human rights and their disregard for the landscape affected the rural economy forests and population This lesson from history suggests new ways of thinking about the health of ecosystems and landscapes Nelson shows and he proposes assessing the stability of modern political systems based on the environment s system qualities rather than on political leaders goals and beliefs

Coalitions across the Class Divide Fred Rose, 2018-10-18 Too often struggles for jobs and economic justice have been divided from social goals such as peace or protecting the environment How do we create an economy where both the process and product of work serve life sustaining goals Coalitions across the Class Divide argues that the seeds of this new society are being sown by those who learn to bridge working and middle class movements and cultures A new generation of activists is seizing a historic opportunity to organize coalitions across the labor peace environmental and other movements that have previously worked in isolation or at odds Fred Rose brings the challenges and potential of coalition organizing to life through an in depth look at cases of conflict and cooperation From the timber wars in the Pacific Northwest to military conversion coalitions emerging with the end of the Cold War these cases teach practical lessons about the processes and pitfalls of organizing across movements and classes

Environmentalism and Economic Justice Laura Pulido, 1996-02 Ecological causes are championed not only by lobbyists or hikers While mainstream environmentalism is

usually characterized by well financed highly structured organizations operating on a national scale campaigns for environmental justice are often fought by poor or minority communities Environmentalism and Economic Justice is one of the first books devoted to Chicano environmental issues and is a study of U S environmentalism in transition as seen through the contributions of people of color It elucidates the various forces driving and shaping two important examples of environmental organizing the 1965 71 pesticide campaign of the United Farm Workers and a grazing conflict between a Hispano cooperative and mainstream environmentalists in northern New Mexico The UFW example is one of workers highly marginalized by racism whose struggle as much for identity as for a union contract resulted in boycotts of produce at the national level The case of the grazing cooperative Ganados del Valle which sought access to land set aside for elk hunting represents a subaltern group fighting the elitism of natural resource policy in an effort to pursue a pastoral lifestyle In both instances Pulido details the ways in which racism and economic subordination create subaltern communities and shows how these groups use available resources to mobilize and improve their social economic and environmental conditions Environmentalism and Economic Justice reveals that the environmental struggles of Chicano communities do not fit the mold of mainstream environmentalism as they combine economic identity and quality of life issues Examination of the forces that create and shape these grassroots movements clearly demonstrates that environmentalism needs to be sensitive to local issues economically empowering and respectful of ethnic and cultural diversity

Knowledge and Special Libraries

Suzanne Connolly,James Matarazzo,2009-11-03 First Published in 1998 Formerly a library was viewed as a place for information storage and information was viewed as simply bits of data Furthermore many wielded information as a tool of power in that those who had more information had more authority It is becoming increasingly clear that shared collective knowledge of an organization is of far greater value than that of each individual s privately held data In view of the librarian s changing profession it has also become clear that they are now being charged with the mission to explore and implement new and innovative methods to encourage sharing and to better manage information The articles selected for this compendium are well thought out and organized and are drawn from the fields of information and library science and business management Since most special libraries are corporate libraries the selections are taken from these different disciplines to provide perspectives from both a business standpoint and an information management one The selections contain many different predictions about libraries and librarians of the future They focus on new roles and highlight the importance of the profession With the rapid growth of technology end users are being inundated with choices They need expert advice from experienced practitioners Currently much of the literature focuses solely on the management of libraries as opposed to environment in which libraries operate The purpose of this reader is to correct that

Environmental Policy in the 1990s Norman J. Vig,Michael E. Kraft,1994 **Environmental Problem Solving** Alan Miller,2013-12-01 Human influences create both environmental problems and barriers to effective policy aimed at addressing those problems In effect environmental managers manage people as much as they manage the environment Therefore they must gain an understanding of the psychological and sociopolitical dimensions of environmental problems that they are attempting to resolve In Environmental Problem Solving Alan Miller reappraises conventional analyses of environmental problems using lessons from the psychosocial disciplines He combines the disciplines of ecology political sociology and psychology to produce a more adaptive approach to problem solving that is specifically geared toward the environmetal field Numerous case studies demonstrate the practical application of theory in a way that is useful to technical and scientific professionals as well as to policy makers and planners Alan Miller is Professor of Psychology at the University of New Brunswick

Handbook of Social Movements across Latin America Paul Almeida,Allen Cordero Ulate,2015-07-14 This handbook covers social movement activities in Latin American countries that have had profound consequences on the political culture of the region It examines the developments of the past twenty years such as a renewed upswing in popular mobilization the ending of violent conflicts and military governments new struggles and a relatively more democratic climate It shows that from southern Chiapas to Argentina social movements in the 1990s and especially in the 2000s have reached new heights of popular participation There is a lack of research on the politics of this region in the contemporary era of globalization this volume partially fills the void and offers a rich resource to students scholars and the general public in terms of understanding the politics of mass mobilization in the early twenty first century The contributors each address social movement activity in their own nation and together they present a multidisciplinary perspective on the topic Each chapter uses a case study design to bring out the most prominent attributes of the particular social struggle s for instance the main protagonists in the campaigns the grievances of the population and the outcomes of the struggles This Handbook is divided into seven substantive themes providing overall coherence to a broad range of social conflicts across countries issues and social groups These themes include 1 theory of Latin American social movements 2 neoliberalism 3 indigenous struggles 4 women s movements 5
