World War II US assessment history 1973 were motivated by the emerging conflicts in the post World War II period between rapidly increasing softwood harvests and declining timber growth. These are called the Outlook Studies. The last six studies (1980, 1985, 1989, 1993, 2000, 2005) have been conducted to meet the requirements of the Forest and Rangeland Renewable Resources Planning Act (RPA) of 1974. These are called the RPA Timber Assessments.

6 The Challenge of Developing Models

2 SHAPING THE ASSESSMENT SYSTEM

This initial chapter describes the development and specific structure of the Assessment System. We consider past policy analysis needs and federal legislative requirements, antecedent modeling and projection approaches, characteristics of the US forest sector, and recent trends in public and private resource management. At the federal level and in some states and regions, the USA has a lengthy history of using resource and market models to explore policy issues and to examine the effects of alternative policy actions. Many of these studies have been undertaken on an irregular basis as issues emerged and resource conditions changed. The RPA legislation mandated a regular cycle of nationwide assessments by the Forest Service, examining trends and conditions in an array of resource uses and services: climate, minerals, range, recreation, timber, and water. The structure of the Assessment System reflects both the requirements of the RPA legislation and the unique characteristics of the US forest sector, which it is designed to simulate.

In the years since enactment of the RPA legislation, management directions and objectives on both public and private lands in the USA have continued to evolve. The structure of the Assessment System has been adapted to reflect these trends.

Global Biomass Burning Joel S. Levine, 1991. This comprehensive volume is the first to consider biomass burning as a global phenomenon and to assess its impact on the atmosphere, on climate, and on the biosphere itself.

Handbook of Research on Mathematics Teaching and Learning Douglas Grouws, 2006-11-01. Sponsored by the National Council of Teachers of Mathematics and written by leading experts in the field of mathematics education, the Handbook is specifically designed to make important vital scholarship accessible to mathematics education professors, graduate students, educational researchers, staff development directors, curriculum supervisors, and teachers. The Handbook provides a framework for understanding the evolution of the mathematics education research field against the backdrop of well-established conceptual, historical, theoretical, and methodological perspectives. It is an indispensable working tool for everyone interested in pursuing research in mathematics education, as the references for each of the Handbook's twenty-nine chapters are complete resources for both current and past work in that particular area.

Recycling Research Progress at the Forest Products Laboratory, 1995. This document summarizes accomplishments of USDA Forest Service researchers in the area of recycling. Specifically, it describes work in economic assessment, paper recycling, recycled housing, and industrial applications of recycled materials, other recycling applications, and technology transfer. The literature list includes the references cited in the text and additional publications regarding Forest Service recycling research.
