market is equally central as shortage of labour compounds the already existing problem of shortage of capital This book surveys the labour markets of the Arab world state by state evaluating them by demand and supply analysis and analysing the different elements in trends of employment It forecasts the areas of stress in the next decade and suggests ways of minimising them The book based on much previously unpublished information and on extensive on the spot research in the respective Arab countries sets out the economic and social conditions which underly the impending crisis of development in the Arab region First published in 1980 **Congressional Presentation** United States. Mobilizing Human Resources in the Arab World (RLE Economy of Middle East) R. Paul Shaw, 2015-05-15 R Paul Shaw has travelled widely in the Arab world obtaining data and gathering impressions first hand from national and local planners In this book he identifies population and manpower problems that are likely to become more serious and more difficult to solve if they are neglected at this early stage of Arab development He focuses on five broad areas which are directly or indirectly related to mobilizing human resources and his book will be of special interest to all those who are concerned with such issues as population migration employment inequality the emancipation of women construction and agriculture Dr Shaw proposes policy directives which are sensitive to the problems as they are seen by the Arab governments themselves and sets out practical guidelines which can be used by Arab planners and policy makers An important feature of the book with respect to current literature on Arab development is that it moves away from a preoccupation with growth related investments to a concentration on development related population manpower and employment issues By bringing together such

comprehensive empirical and bibliographic information it will also be invaluable as a reference source for some twenty Arab countries First published in 1983
