Bade this volume summarises the debate about the causes of population changes labour and migration in Germany The authors show that the large influx of foreign workers during the last twenty five years is only the latest manifestation of a long term trend whose roots can be traced as far back as the early 19th century

Germany's Struggle for Modernity Jürgen Kocka, Volker Berghahn, 2025-04-01 In the historiography of modern

Germany the nineteenth century's innovations marks a period of seismic change From accelerating demographic growth to growing secularization and the rise of nationalism it was a century which laid the foundations for both a civil society and the dictatorships of the twentieth century In this comprehensive history of Germany from 1780 to 1918 Jürgen Kocka re-examines the transformative interactions that took place between society economy culture and politics Innovatively resituating these developments within a wider context of conflict and transformation in Europe this book illuminates new ways to understand the emergence of classical modernity within the nineteenth century **European Cities in the Modern Era, 1850-1914**

Friedrich Lenger, 2012-08-17 In *European Cities in the Modern Era 1850-1914* Friedrich Lenger analyses the demographic and economic preconditions of European urbanization compares the extent to which Europe's cities were characterized by heterogeneity with respect to the social national and religious composition of its population and asks in which way differences resulting from this heterogeneity were resolved either peacefully or violently Using this general perspective and extending the scope by including Eastern and Southern Europe the dominant view of Europe's prewar cities as islands of modernity is challenged and the ubiquity of urban violence established as a central analytical problem Moving

Europeans, Second Edition Leslie Page Moch, 2009-09-18 Praise for the first edition By far the best general book on its subject *Moving Europeans* will remain a standard reference for some time to come Charles Tilly Moch has reconceived the social history of Europe David Levine *Moving Europeans* tells the story of the vast movements of people throughout Europe and examines the links between human mobility and the fundamental changes that transformed European life This update of a classic text describes the Western European migration from the pre-industrial era to the year 2000 For this new edition Leslie Page Moch reconsiders the 20th century in light of fundamental changes in labor years of conflict and the new migrations following the end of colonial empires the fall of communism and globalization This new edition also features a greatly expanded and up to date bibliography Labour Migration from Turkey to Western Europe, 1960-1974 Ahmet

Akgündüz, 2008 Ground breaking in its comprehensiveness this book illuminates the migration of workers from Turkey to Western Europe with new perspectives previously overlooked in research It makes extensive use of primary as well as secondary sources in four languages and draws on both the historiography and the social sciences of migration

Comparative and Transnational History Heinz-Gerhard Haupt, Jürgen Kocka, 2012 Since the 1970s West German historiography has been one of the main arenas of international comparative history It has produced important empirical studies particularly in social history as well as methodological and theoretical reflections on comparative history During the last twenty years however this approach has felt pressure from two sources cultural historical approaches which stress microhistory and the construction of cultural transfer on the one hand global history and transnational approaches with emphasis on connected history on the other This volume introduces the reader to some of the major methodological debates and to recent empirical research of German historians who do comparative and transnational work **The Frontier of**

National Sovereignty Alan S. Milward, Frances M. B. Lynch, Federico Romero, Ruggero Ranieri, Vibeke Sørensen, 2017-07-05 Many theoretical explanations had been offered for the rise of the European Community but none had used historical analysis to draw out the deeper significance of the events that surrounded Maastricht. However, in this book first published in 1993, the authors explored the process of European integration and its future drawing on extensive empirical research into the national archives of the member states. The authors brought their findings together in this consistently argued book to provide a new and coherent theory of European integration which threw a fresh light on unexplored aspects of EC policy. The debate over the Treaty of Maastricht shows how ill understood are the issues involved and this book is intended to improve that understanding. It is essential reading to students of history, international relations and political science.

Migrations in the German Lands, 1500-2000 Jason Coy, Jared Poley, Alexander Schunka, 2016-09-01 Migration to and from German speaking lands has been a dynamic force in Central European history for centuries. Exemplifying some of the most exciting recent research on historical mobility, the essays collected here reconstruct the experiences of vagrants, laborers, religious exiles, refugees and other migrants during the last five hundred years of German history. With diverse contributions ranging from early modern martyrdom to post Cold War commemoration efforts, this volume identifies revealing commonalities shared by different eras while also placing the German case within the broader contexts of European and global migration.

Cities as Multiple Landscapes Christina Antenhofer, Günter Bischof, Robert L. Dupont, Ulrich Leitner, 2016-10-13 Cities are composed of a combination of urban and rural spaces, buildings and boundaries and human bodies engaged in political, social and cultural discourses. Together, these combine to create what the contributors to this volume call multiple landscapes. Developing a new theoretical conceptualization of cities, this book unites American and European approaches to comparative urban studies by investigating the concept of multiple landscapes in two sister cities, New Orleans and Innsbruck. As the essays reveal, both New Orleans and Innsbruck have long been centers of multicultural exchange, have strong senses of historical heritage and profit from the spectacular geographies in which they are situated. Geography, in particular, links both cities to environmental, technological and security challenges that must be considered in connection with aesthetic, cultural and ecological debates. Exploring the many connections between New Orleans and Innsbruck, the interdisciplinary essays in this book will change the way we think about cities both local and abroad.

A Social History of Germany, 1648-1914 Eda Sagarra, 2017-07-12 This volume is a pioneering effort to examine the social, demographic and economic changes that befell the Jewish communities of Central Europe after the dissolution of the Habsburg Empire. It consists of studies researched and written especially for this volume by historians, sociologists and economists, all specialists in modern Central European Jewish affairs. The era of national rivalry, economic crises and political confusion between the two World Wars has been preceded by a pre-World War I epoch of Jewish emancipation and assimilation. During that period, Jewish minorities had been harbored from violent anti-Semitism by the Empire and they

became torchbearers of industrialization and modernization This common destiny encouraged certain common characteristics in the three major components of the Empire Austria Hungary and the Czech territories despite the very different origins of the well over one million Jews in those three lands The disintegration of the Habsburg Empire created three small economically marginal national states inimical to each other and at liberty to create their own policies toward Jews in accord with the preferences of their respective ruling classes Active and openly discriminatory anti Semitic measures resulted in Austria and Hungary The only liberal heir country of the Empire was Czechoslovakia although simmering anti Semitism and below surface discrimination were widespread in Slovakia While one might have expected Jewish communities to return to their pre World War I tendencies to go their independent ways after the introduction of these policies social and economic patterns which had evolved in the Habsburg era persisted until the Anschluss in Austria German occupation in Czechoslovakia and World War II in Hungary Studies in this volume attest to continuing similarities among the three Jewish communities testifying to the depth of the Empire s long lasting impact on the behavior of Jews in Central Euro

The Anxious Triumph Donald Sassoon, 2019-06-27 A magnum opus an accessible and genuinely global history This is a book for today and tomorrow Financial Times Capitalist enterprise has existed in some form since ancient times but the globalization and dominance of capitalism as a system began in the 1860s when in different forms and supported by different political forces states all over the world developed their modern political frameworks the unifications of Italy and Germany the establishment of a republic in France the elimination of slavery in the American south the Meiji Restoration in Japan the emancipation of the serfs in Tsarist Russia This book magnificently explores how after the upheavals of industrialisation a truly global capitalism followed For the first time in the history of humanity there was a social system able to provide a high level of consumption for the majority of those who lived within its bounds Today capitalism dominates the world With wide ranging scholarship Donald Sassoon analyses the impact of capitalism on the histories of many different states and how it creates winners and losers by constantly innovating This chronic instability he writes is the foundation of its advance not a fault in the system or an incidental by product And it is this instability this constant churn which produces the anxious triumph of his title To control or alleviate such anxieties it was necessary to create a national community if necessary with colonial adventures to develop a welfare state to intervene in the market economy and to protect it from foreign competition Capitalists needed a state to discipline them to nurture them and to sacrifice a few to save the rest a state overseeing the war of all against all Vigorous argumentative surprising and constantly stimulating The Anxious Triumph gives a fresh perspective on all these questions and on its era It is a masterpiece by one of Britain s most engaging and wide ranging historians

sphere ethnic spaces family and religion in Canada that would persist through the twentieth century The Boundaries of Ethnicity uncovers some of the origins of Canadian multiculturalism and government attempts to manage this diversity

Guide to Policies for the Well-being of All in Pluralist Societies Council of Europe, 2010-01-01 This guide offers theoretical and practical tools for an innovative approach to a key political issue how along with our immigrant fellow citizens can we build a fair and plural society that ensures the well being of all By moving beyond rigid categories like foreigner immigrant and illegal and ambiguous concepts like identity diversity immigration control and integration this guide suggests that policy makers civil servants and citizens need to question their own vocabulary if they are to grasp the complexity and uniqueness of people's migration paths Perceiving migrants simply from the host country's point of view the security well being and life style of its nationals has limitations We cannot see people of foreign origin only as a threat or a resource to be exploited If we see them as stereotypes we are seeing only a mirror of European fears and contradictory aspirations This guide helps readers decode and address the structural problems of our society looking at the accusations made against migrants And The utilitarian view or the advantages that immigrants bring to host societies In publishing this guide The Council of Europe is seeking to initiate an in depth debate on the migration issue which is so high on the European political agenda
