The Population of the United States Donald J. Bogue, 1959 *The Population of the United States* Donald Joseph Bogue, 1985 Reader's Guide to American History Peter J. Parish, 2013-06-17 There are so many books on so many aspects of the history of the United States offering such a wide variety of interpretations that students teachers scholars and librarians often need help and advice on how to find what they want The Reader's Guide to American History is designed to meet that need by adopting a new and constructive approach to the appreciation of this rich historiography Each of the 600 entries on topics in political social and economic history describes and evaluates some 6 to 12 books on the topic providing guidance to the reader on everything from broad surveys and interpretive works to specialized monographs The entries are devoted to events and individuals as well as broader themes and are written by a team of well over 200 contributors all scholars of American history Repositioning North American Migration History Marc S. Rodriguez, 2004 An in depth look at trends in North American internal migration This volume gathers established and new scholars working on North American immigration transmigration internal migration and citizenship whose work analyzes the development of migrant and state level institutions as well as migrant networks With contemporary migration research most often focused on the development of transnational communities and the ways international migrants maintain relationships with their sending region that sustain the circular flow of people ideas and traditions across national boundaries it is useful to compare these to similar patterns evident within the terrain of internal migration To date however international and internal migration studies have unfolded in relative isolation from one another with each operating within these distinct fields of expertise rather than across them Although there has been some important linking there has not been a recent major consideration of human migration that works across and within the various borders of the North American continent Thus the volume presents a variety of chapters that seek to consider human migration in comparative perspective across the internal international divide Marc S Rodriguez is Assistant Professor of History at Princeton University Donna R Gabbaccia is the Mellon Professor of History at the University of Pittsburgh James R Grossman is the Vice President of Research and Education at the Newberry Library Chicago Contributors Josef Barton Wallace Best Donna Gabbaccia James Gregory Tobias Higbie Mae Ngai Walter Nugent Annelise Orleck Kunal Parker Kimberly Phillips Bruno Ramirez Marc Rodriguez *Repositioning North American Migration History* is a volume in *Studies in Comparative History* sponsored by Princeton University's Shelby Cullom Davis Center for Historical Studies **The Cambridge Economic History of the United States** Stanley L. Engerman, Robert E. Gallman, 1996 Volume III surveys the economic history of the United States and Canada during the twentieth century *America Becoming* National Research Council, Commission on Behavioral and Social Sciences and Education, 2001-02-23 The 20th Century has been marked by enormous change in terms of how we define race In large part we have thrown out the antiquated notions of the 1800s giving way to a more realistic sociocultural view of the world The United States is perhaps

more than any other industrialized country distinguished by the size and diversity of its racial and ethnic minority populations Current trends promise that these features will endure Fifty years from now there will most likely be no single majority group in the United States How will we fare as a nation when race based issues such as immigration job opportunities and affirmative action are already so contentious today In America Becoming leading scholars and commentators explore past and current trends among African Americans Hispanics Asian Americans and Native Americans in the context of a white majority This volume presents the most up to date findings and analysis on racial and social dynamics with recommendations for ongoing research It examines compelling issues in the field of race relations including Race and ethnicity in criminal justice Demographic and social trends for Hispanics Asian Americans and Native Americans Trends in minority owned businesses Wealth welfare and racial stratification Residential segregation and the meaning of neighborhood Disparities in educational test scores among races and ethnicities Health and development for minority children adolescents and adults Race and ethnicity in the labor market including the role of minorities in America s military Immigration and the dynamics of race and ethnicity The changing meaning of race Changing racial attitudes This collection of papers compiled and edited by distinguished leaders in the behavioral and social sciences represents the most current literature in the field Volume 1 covers demographic trends immigration racial attitudes and the geography of opportunity Volume 2 deals with the criminal justice system the labor market welfare and health trends Both books will be of great interest to educators scholars researchers students social scientists and policymakers
