Population Politics Virginia Abernethy, Garrett Hardin, 2018-05-11 International efforts to regulate fertility rates so that populations do not grow beyond the earth's capacity have included technical assistance and capital improved health care conditions to lower the risk of infant mortality increased opportunities to develop literacy the democratization of governments and several decades of liberal immigration and refugee policies favoring third world nations The persistence of high fertility despite international efforts confounds demographers Population Politics brilliantly dissects the paradigm responsible for the counterproductive efforts of nations and international agencies Abernethy a renowned anthropologist shows why policies hamper the shift to lower fertility Ireland Indonesia Cuba China Turkey and Egypt are but a few of the countries Abernethy examines showing how economic sociocultural and agricultural factors that have caused population growth can be harnessed to stabilize population size Population Politics is a provocative examination of the influence of aid and liberal immigration policies on world population growth and often

counterproductive to the role of the United States as an industrial power This volume s uniquely interdisciplinary perspective will enlighten the lay reader as well as demographers and epidemiologists conservationists reproduction and family specialists agricultural economists and public health personnel Virginia D Abernethy is professor emeritus of psychiatry anthropology at Vanderbilt Medical School and was for 11 years the editor of the scholarly journal Population and Environment Garrett Hardin is emeritus professor of human ecology in the Department of Biological Sciences and the University of California Santa Barbara

Population Politics and Development L. Richey,2008-01-21 This book uses political and socio anthropological theory to examine the relationship between power interest and agency within population and family planning discourse across Africa with particular emphasis on case studies from Tanzania

The Vanishing American Dream Virginia Deane Abernethy,2017-09-08 The United States has gone off track allowing domestic and foreign aid policies to be co opted by a government abetted by mass media that serves special interests rather than the greater national good Americans tendencies to trust play fair and help have been abused and require replacement by a realistic outlook The Vanishing American Dream posits solutions to get America back on the right track Abernethy sees population growth driven by mass immigration as a major cause of economic and cultural changes that have been detrimental to most Americans The environment has been degraded by over crowding and increasing demands on natural resources Work is cheapened by explosive growth in the labour force creating a buyer s market One salary or wage no longer supports a family and educates children Women working outside the home is a necessity not a choice for most American families Furthermore feminism aimed originally at balanced gender roles has been turned viciously against males of all ages and ultimately against females through degrading their traditional and valuable contributions Abernethy proposes that Americans need time to regroup untroubled by a continuing influx of foreign peoples The family small business and responsive local government are centres around which a solvent and confident citizenry can prosper again

Introduction to Sustainability Nolberto Munier,2006-01-05 Sustainability relates with Economics Society and Environment However one common fact that links them all is the generation of waste This chapter is divided into two The first part analyses the current generation of waste as well as its treatment The second intends to establish policies for the future treatment of waste or better yet for ceasing the generation of waste This first part begins by raising some capital questions What is waste Which are the components of waste Where is waste generated and How is waste treated The second part will deal with Why is waste produced and What is society doing to correct this problem

2 2 First part Current generation and treatment of waste

2 2 1 What is waste The dictionary defines waste as something useless unwanted or defective and the word by product as something produced in an industrial or biological process in addition to the principal product From the point of view of sustainability the word waste does not have that meaning as though it may be unwanted it is not something useless and is certainly not defective Even if in a manufacturing process a product or part of it does not conform to the manufacturer s quality specs it does not thereby

become waste but is rather scrap material that is usually brought back to its original state and then processed again

The Drama of the Commons National Research Council, Division of Behavioral and Social Sciences and Education, Committee on the Human Dimensions of Global Change, 2002-03-15 The tragedy of the commons is a central concept in human ecology and the study of the environment It has had tremendous value for stimulating research but it only describes the reality of human environment interactions in special situations Research over the past thirty years has helped clarify how human motivations rules governing access to resources the structure of social organizations and the resource systems themselves interact to determine whether or not the many dramas of the commons end happily In this book leaders in the field review the evidence from several disciplines and many lines of research and present a state of the art assessment They summarize lessons learned and identify the major challenges facing any system of governance for resource management They also highlight the major challenges for the next decade making knowledge development more systematic understanding institutions dynamically considering a broader range of resources such as global and technological commons and taking into account the effects of social and historical context This book will be a valuable and accessible introduction to the field for students and a resource for advanced researchers *Charging a Fee to Enter the United States at a Land Border Port* United States. Congress. House. Committee on Government Operations. Information, Justice, Transportation, and Agriculture Subcommittee, 1994 , People and Forests Clark C. Gibson, Margaret A. McKean, Elinor Ostrom, 2000 *People and Forests* explores the complex interactions between local communities and their forests focusing on the rules by which communities govern and manage their forest resources **From Earth to Oblivion: The Passing of Humankind** Ross E. Goodrich, PhD, 2015-09-21 Missed Conceptions Karen Stollznow, 2023 Blending personal narrative historical research and pop culture Karen Stollznow s *Missed Conceptions* gives voice to an experience that has been taboo for too long but is all too common For the one in six couples who face fertility challenges when they attempt to get pregnant this book is a welcome and hopeful companion The Metaphysics of Science Craig Dilworth, 2007-10-04 The roots of this work lie in my earlier book *Scientific Progress* which first appeared in 1981 One of its topics the distinction between scientific laws and theories is there treated with reference to the same distinction as drawn by N R Campbell in his *Physics The Elements* Shortly after completing *Scientific Progress* I read Rom Harr s *The Principles of Scientific Thinking* in which the concept of theory is even more clearly delineated than in Campbell being directly connected to the notion of a model as it was in my book In subsequent considerations regarding science Harr s work thus came my main source of inspiration with regard to theories while Campbell s remained my main source with respect to empirical laws Around the same time I also read William Whewell s *Philosophy of the Inductive Sciences* In this work Whewell depicts principles as playing a central role in the formation of science and conceives of them in much the same way as Kant conceives of fundamental synthetic a priori judgements The idea that science should have principles as a basic element immediately made sense to me and from that time I have thought

of science in terms of laws theories and principles

Capacity Building in National Environmental Policy Helmut Weidner, Martin Jänicke, 2013-03-09 This book is the second collection of systematic case studies describing national environmental policies in 17 countries in terms of capacity building see Appendix The OECD defines environmental capacity building as a society's ability to identify and solve environmental problems While various institutions including UNEP FAO World Bank and OECD have hitherto used the terms environmental capacity and capacity building almost exclusively with reference to developing countries we have extended the concepts to industrialized countries as well The first collection edited by Martin Jänicke Helge Joergens both Free University Berlin and Helmut Weidner Social Science Research Center Berlin was published in 1997 under the title National Environmental Policies A Comparative Study of Capacity Building Berlin etc Springer Verlag It included 13 studies of countries As in the first volume chapter I presents the conceptual framework underlying the national case studies It is a slightly shorter version of the corresponding chapter in volume I The design of all case studies in the two volumes is largely congruent with this conceptual framework Although the various sections of the studies do not always have identical titles and subtitles the central elements of the capacity building approach have been applied in all cases

Science Magazine's State of the Planet 2006-2007 Donald Kennedy, the Editors of Science, 2006-06-15 How often in today's environmental debates have you read that the science is in dispute even when there is overwhelming consensus among scientists Too often the voice of science is diminished or diluted for the sake of politics and the public is misled Now the most authoritative voice in U S science Science magazine brings you current scientific knowledge on today's most pressing environmental challenges from population growth to climate change to biodiversity loss Science Magazine's State of the Planet 2006 2007 is a unique contribution that brings together leading environmental scientists and researchers to give readers a comprehensive yet accessible overview of current issues Included are explanatory essays from Science magazine editor in chief Donald Kennedy that tie together the issues and explore the relationships among them Each of the book's 18 chapters is written by the world's leading experts such as Joel Cohen on population Peter Gleick on water Daniel Pauly on fisheries Thomas Karl on climate change science Paul Portney on energy and development Elinor Ostrom and Thomas Dietz on commons management Interspersed throughout are Science news pieces that highlight particular issues and cases relevant to the main scientific findings An added feature is the inclusion of definitions of key terms and concepts that help students and nonspecialists understand the issues Published biennially State of the Planet is a clear accessible guide for readers of all levels from students to professionals

Faith, Family, and Filipino American Community Life Stephen M. Cherry, 2014-01-03 Stephen M Cherry draws upon a rich set of ethnographic and survey data collected over a six year period to explore the roles that Catholicism and family play in shaping Filipino American community life From the planning and construction of community centers to volunteering at health fairs or protesting against abortion this book illustrates the powerful ways these forces structure and animate not only how first generation Filipino

Americans think and feel about their community but how they are compelled to engage it over issues deemed important to the sanctity of the family Revealing more than intimate accounts of Filipino American lives Cherry offers a glimpse of the often hidden but vital relationship between religion and community in the lives of new immigrants and allows speculation on the broader impact of Filipino immigration on the nation The Filipino American community is the second largest immigrant community in the United States and the Philippines is the second largest source of Catholic immigration to this country This ground breaking study outlines how first generation Filipino Americans have the potential to reshape American Catholicism and are already having an impact on American civic life through the engagement of their faith **Prosperity, Poverty or Extinction?** Allen Cookson, 2012-12-11 In an unprecedented way this book relates fundamental physical and ecological principles to economics so that the detachment of current economic practices from physical reality becomes obvious Sustainable alternative models are proposed Almost all the material is derived from the work of great minds of past and present Forgotten and ignored ideas are resurrected Its a book for intelligent educated lay people students and academics That his forecasting is more successful than many prominent economists and that respected figures are turning to views long held by him gives the author confidence that his contribution is of value **Families in Context** Gene H. Starbuck, Karen Saucier Lundy, 2015-11-17 The most thoroughly updated edition yet this book offers students perspectives of changes in marriage and family over time including the impact of the Great Recession and of new media technologies A hallmark of Families in Context remains the well researched data driven quality of the text Beyond presenting thoroughly updated statistics and literature each chapter examines new trends and assesses their implications for students lives The underlying presentation remains balanced theoretically grounded and accessible to a wide variety of classes allowing students of all ages and family backgrounds to draw their own conclusions about controversial topics Features of the new edition include coverage of the Affordable Care Act new social media and families the latest trends in poverty education social mobility gender identities and healthcare updated In the News features and author created PowerPoint slides *The Riddles of Human Society* Conrad L. Kanagy, Donald B. Kraybill, 1999-01-27 Why are all U S Presidents white men Why does technology enchant us Why do some people commit suicide Why are sports so important to Americans How will the Internet change society Why do people do good This very teachable and short new introductory text explores these and other riddles to stir students sociological curiosity and promote active learning as the sure path toward mastering the fundamentals of the discipline Once again Pine Forge Press has done us Intro teachers a great service with The Riddles of Human Society The authors have produced a remarkable text designing it from the point of view of how students actually acquire sociological tools and imagination when reflecting on their social world It is written as a conversation with readers yet is organized with learning tools like chapter summaries discussion questions and an in text glossary It considers a broad range of topics from micro to macro levels thus uniquely blending the best of a shorter textbook and a monograph It will serve very well as a main
