People, Population Change and Policies Charlotte Höhn,Dragana Avramov,Irena E. Kotowska,2008-03-08 This two volume work explores social cohesion and the demographic challenges of low birth rates and population aging Authors approach the topic from the perspective of citizens and policymakers analyzing attitudes from 14 European countries on demographic trends and expectations towards private networks and public policies Volume 2 focuses on family and family change value of children fertility intentions and views on work family balance

The Future of Motherhood in Western Societies Gijs Beets,Joop Schippers,Egbert R. te Velde,2010-12-06 Most people value to have children still highly But what is the optimal moment to have the first The decision on having children or not and if yes on the timing of the first is one of the most difficult ones to make also because it more or less coincides with various other heavy decisions on shaping the life course like on union formation labour market career housing accommodation etc People realise that having children will fundamentally change their life and in order to fit this unknown and irreversible adventure perfectly into their life course postponement of the first birth is an easy way out as long as doubts continue and partners try to make up their mind Modern methods of birth control are of course a very effective help in that period What is the best moment to have the first child And to what moment is postponement justified There are no easy answers to these questions Best solutions vary per person as they depend on personal circumstances and considerations the partner may have conflicting ideas housing accommodation job income free time activities Existing parental leave and child care arrangements are weighted as well Unfortunately the biological clock ticks further And also unfortunately assisted reproductive technology IVF etc is unable to guarantee a successful outcome Several couples end up without children involuntarily and that may lead to sorrow and grief This interdisciplinary book overviews the process of postponement and its backgrounds in modern Western societies holistically both at the personal and the societal level

Contributions come from reproductive evolutionary biological and neurological sciences as well as from demography economy sociology and psychology It holds not only at women but also at men becoming first time fathers The discussion boils down to a new policy approach for motherhood and emancipation on how to shape work and family life It is argued that a public window where one can compose a cafeteria like set of supportive arrangements according to personal preferences could lead to a break in the rising age at first motherhood Birth Statistics ,2005 **International Handbook on Gender and Demographic Processes** Nancy E. Riley,Jan Brunson,2018-05-02 This handbook presents a comprehensive and up to date overview of gender in demography addressing the many different influences of gender that arise from or influence demographic processes It collects in one volume the key issues and perspectives in this area whereby demography is broadly defined The purpose in casting a wide net is to cover the range of work being done within demography but at the same time to open up our perspectives to neighboring fields to encourage better conversations around these issues The chapters in this handbook carefully document definition and measurement issues and take up parts of the demographic picture and focus on how gender plays a role in outcomes In other cases gender often plays a cross cutting role in social processes rather than having a single or easily distinguishable role it often combines with other social institutions and even other statuses and inequalities to affect outcomes Thus a key factor in this volume is how gender interacts with race ethnicity class nationality and sexuality in any demographic setting While each section contains chapters that are broad overviews of the current state of knowledge and behavior the handbook also includes chapters that focus on specific cultures or events in order to examine how gender operates in a particular circumstance *The Stationery Office Annual Catalogue 2004* Stationery Office,2005-08 No public library discount on this title The Stationery Office Annual Catalogue Stationery Office (Great Britain),2004 Digest of Education Statistics ,2009 Contains information on a variety of subjects within the field of education statistics including the number of schools and colleges enrollments teachers graduates educational attainment finances Federal funds for education libraries international education and research and development *Digest of Education Statistics 2006* Thomas D. much scholarly debate on the politically disruptive capabilities of Islam and the threats to global security posed by or to Muslim states and societies but within this dialogue there has been little recognition of the role of population policies in security issues Katrina Riddell's study focuses specifically on Islam and the securitization of population policies and sustainability Opening with a discussion of contemporary population discourses and their historical foundations the book examines how population growth has become an international security issue The author takes the examples of Pakistan and Iran to provide a nuanced understanding of Muslim states interaction with global debates on sustainability She also explores how Muslim and non Muslim states societies and agents perceive issues of population growth and control Providing an innovative approach to the pursuit of global sustainability and security this book presents useful material to scholars whose research focuses on Islam and the future **Health Statistics Quarterly** ,2005 **The Condition of Education** ,2006
