Population Change On Business Activity In Rural America Kenneth M Johnson, 2019-07-11 Dr Johnson moves beyond the existing literature on rural urban population shifts during the past forty years to examine the effects of those shifts on the business infrastructure that supplies goods and services to rural areas in the United States First establishing a historical demographic context to serve as a backdrop he provides a detailed longitudinal treatment on the linkage between population change and the rural commercial infrastructure as well as timely information on the impact of the recent rural population turnaround on business Some of his findings based on the latest data available refute earlier expectations that a decrease in population necessarily leads to a decline in the local business community *Rural and Small Town Population Change, 1970-80* Calvin Lunsford Beale, 1981

HIV, Resurgent Infections and Population Change in Africa Michel Caraël, Judith Glynn, 2008-08-12 Forty years ago the age old battle against infectious diseases as a major threat to human health was believed close to being won However by the late twentieth century the increase of emerging and reemerging infectious diseases was evident in both low and high income countries About 30 new infectious diseases have been identified in the last 20 years Among the new diseases and most importantly the Human Immunodeficiency Virus HIV epidemic with 40 million persons infected and 25 million deaths since its first description presents one of the most significant health societal and security challenges facing the global community The interaction of HIV AIDS with tuberculosis malaria and bacterial infections have increased HIV related morbidity and mortality and in turn the HIV pandemic has brought about devastating increases in tuberculosis Understanding the population impact and the dynamics of infection diseases in the most affected region is critical to efforts to reduce the morbidity and mortality of such infections and for decisions on where to use limited resources in the fight against infections This book aims to contribute to these efforts by offering a demographic and epidemiological perspective on emerging and reemerging infections in sub Saharan Africa
