Making Industrial Pittsburgh Modern Edward K. Muller,Joel A. Tarr,2019-10-22 Pittsburgh s explosive industrial and population growth between the mid nineteenth century and the Great Depression required constant attention to city building Private profit oriented firms often with government involvement provided necessary transportation energy resources and suitable industrial and residential sites Meeting these requirements in the region s challenging hilly topographical and riverine environment resulted in the dramatic reshaping of the natural landscape At the same time the Pittsburgh region s free market private enterprise emphasis created socio economic imbalances and badly polluted the air water and land Industrial stagnation temporarily interrupted by wars and then followed deindustrialization inspired the

formation of powerful public private partnerships to address the region's mounting infrastructural economic and social problems. The sixteen essays in *Making Industrial Pittsburgh Modern* examine important aspects of the modernizing efforts to make Pittsburgh and Southwestern Pennsylvania a successful metropolitan region. The city building experiences continue to influence the region's economic transformation, spatial structure and life experience. Catalogue of Books in the Mercantile Library, of the City of New York. A Population History of North America Michael R. Haines, Richard H. Steckel, 2000-08-15

Professors Haines and Steckel bring together leading scholars to present an expansive population history of North America from pre-Columbian times to the present. Covering the populations of Canada, the United States, Mexico and the Caribbean including two essays on the Amerindian population, this volume takes advantage of considerable recent progress in demographic history to offer timely knowledgeable information in a non-technical format. A statistical appendix summarizes basic demographic measures over time for the United States, Canada and Mexico.

The Forgotten Borough Kenneth M. Gold, 2023-04-04 What sets Staten Island apart from the rest of New York City The island's identity has in part been defined in opposition to the city its physical and cultural differences and the perception of neglect by city government It has long been whiter wealthier less populated and more politically conservative And despite many attempts over the years Staten Island is not connected by the subway to any of the other four boroughs Kenneth M Gold argues that the lack of a subway connection has deeply shaped Staten Island's history and identity He chronicles decades of recurrent efforts to build a rail link using this history to explore the borough's fraught relationship with New York City as a whole The Forgotten Borough ranges from when Staten Island first contemplated joining the city in the 1890s to the opening of the Verrazzano Narrows Bridge in 1964 highlighting pivotal moments when the construction of a subway appeared possible The economics and engineering of tunnel construction the difficulty of uniting Staten Islanders around a single solution competition from the other boroughs and resistance from powerful corporations and public authorities all undermined a rapid transit connection Gold demonstrates that the failure to establish a rail link during this period caused Staten Island to diverge culturally demographically and politically from the other four boroughs Drawing on extensive archival research The Forgotten Borough shows how transportation infrastructure and politics shed new light on urban history

Magic Lands John M. Findlay, 1993-09-22 The American West conjures up images of pastoral tranquility and wide open spaces but by 1970 the Far West was the most urbanized section of the country Exploring four intriguing cityscapes Disneyland Stanford Industrial Park Sun City and the 1962 Seattle World's Fair John Findlay shows how each created a sense of cohesion and sustained people's belief in their superior urban environment This first book length study of the urban West after 1940 argues that Westerners deliberately tried to build cities that differed radically from their eastern counterparts In 1954 Walt Disney began building the world's first theme park using Hollywood's movie making techniques The creators of Stanford Industrial Park were more hesitant in their approach to a conceptually organized environment but by the mid 1960s the Park was the nation's prototypical research park and the intellectual downtown for the high technology region that became Silicon Valley In 1960 on the outskirts of Phoenix Del E Webb built Sun City the largest most influential retirement community in the United States Another innovative cityscape arose from the 1962 Seattle World's Fair and provided a futuristic somewhat fanciful vision of modern life These four became magic lands that provided an antidote to the apparent chaos of their respective urban milieus Exemplars of a new lifestyle they are landmarks on the changing cultural landscape of postwar America
