Pornography Psychedelics and Technology Essays on the Limits to Freedom focuses on the crucial connections between technological growth and the more salient features of social malaise in the latter part of the twentieth century Professor Mishan is one of the few economists absorbed by the larger social questions and does not believe that the growth in state intervention and the decline of social liberty are simply the result of intellectual confusion and bureaucratic momentum He sees them as unavoidable consequences of scientific and technical progress While agreeing with many of his fellow economists in acknowledging the virtues of a competitive market economy Professor Mishan is acutely aware of its limitations Following the growth of self styled liberation movements seen as manifestations of a move towards a world of greater individual emancipation and fulfilment the author nevertheless groups such movements together with the rising indices of violence suicide family breakdown and hooliganism which have become indicative of a growing disorientation and social disintegration These developments and the hazards they entail however are bound up with the rapid scientific and technological progress of the post war world Pornography, Psychedelics, and Technology E. Mehrtens, 1996-08-31 Applying the concept of historical waves originally propounded by Alvin Toffler in The Third Wave Herman Maynard and Susan Mehrtens look toward the next century and foresee a fourth wave an era of integration and responsibility far beyond Toffler's revolutionary description of third wave postindustrial society Whether we attain this stage of global well being however will depend on how well our business institutions adapt and change The Fourth Wave examines the ways business has changed in the second and third waves and must continue to change in the fourth The changes concern the basics how an institution is organized how it

defines wealth how it relates to surrounding communities how it responds to environmental needs and how it takes part in the political process Maynard and Mehrtens foresee a radically different future in which business principles concern for the environment personal integrity and spiritual values are integrated The authors also demonstrate the need for a new kind of leadership managers and CEOs who embrace an attitude of global stewardship who define their assets as ideas information creativity and vision and who strive for seamless boundaries between work and private lives for all employees **The**
