Brinton, 1964     The Portable Age of Reason Reader Crane Brinton, 2003-01-01     **The Portable Age of Reason Reader**, 1956     **The Portable Enlightenment Reader** Various, 1995-12-01

The Age of Enlightenment of the 18th century also called the Age of Reason was so named for an intellectual movement that shook the foundations of Western civilization. In championing radical ideas such as individual liberty and an empirical appraisal of the universe through rational inquiry and natural experience, Enlightenment philosophers in Europe and America planted the seeds for modern liberalism, cultural humanism, science and technology, and laissez faire Capitalism. This volume brings together works from this era with more than 100 selections from a range of sources. It includes examples by Kant, Diderot, Voltaire, Newton, Rousseau, Locke, Franklin, Jefferson, Madison, and Paine that demonstrate the pervasive impact of Enlightenment views on philosophy and epistemology as well as on political, social, and economic institutions.

Secularism Mike King, 2007-11-29

Spirituality is a difficult subject in the modern world. Everywhere from popular media to the university, from the bookshelf to the dinner table, religions are derided or marginalised and public figures such as Richard Dawkins set upon anyone who admits to a belief in God. It seems that science and religion are fundamentally at odds and that a mutual respect is unacceptable to either in their parallel pursuit of truth. Yet the majority of Enlightenment authors engaged with both science and spirituality and did not lose their faith. Today we tend to see these authors as not having applied full scientific rigour to their religious beliefs, but are we correct in dismissing this aspect of their lives so easily?

In Secularism, Mike King examines the elements of religion, philosophy, and science which have contributed to an almost total disavowal of spirituality by contemporary western intellectuals. He engages with a wide range of thinkers including Pythagoras, Marx, Spinoza, Darwin, and Nietzsche and incorporates detailed studies of a variety of spiritual leaders, some of whom readers are unlikely to have considered in this way before, to uncover why the western world no longer has any interest in devotion or accords it any respect.

**The Enlightenment** Ronald S. Love, 2008-10-30

One of the few self-named historical movements, the Enlightenment in 18th century Europe was a powerful intellectual reaction to the dominance of absolutist monarchies and religious authorities. Building upon the discoveries of the Scientific Revolution, Enlightenment thinkers and philosophes set out to improve humanity through reason, knowledge, and experience of the natural world rather than religious doctrine or moral absolutes. Their emphasis on truth through observable phenomena set the standard of thought for the modern age, deeply influencing the areas of government, the modern state, science, technology, religious tolerance, and social structure. The Enlightenment's legacy is particularly visible in the United States, where its ideals inspired a revolution and served as the building blocks for the Declaration of Independence and the American Constitution. Narrative chapters, photos, biographical sketches, primary document excerpts, and an extensive bibliography expand the reader's understanding of the event, providing a current perspective on this key turning point in

Western ideology Comprehensive narrative chapters explore the historical background of the movement as well as its relationship to nature and natural philosophy religious belief and church institutions society and the state and the French Revolution Photos biographical sketches of key figures excerpts from important primary documents of the time and an extensive bibliography expand the reader's understanding of the movement that ushered in the modern era **Portable Age of Reason Reader**, 1956

Loudon, 2010-03-16 *The World We Want* compares the future world that Enlightenment intellectuals had hoped for with our own world at present In what respects do the two worlds differ and why are they so different To what extent is and isn't our world the world they wanted and to what extent do we today still want their world Unlike previous philosophical critiques and defenses of the Enlightenment the present study focuses extensively on the relevant historical and empirical record first by examining carefully what kind of future Enlightenment intellectuals actually hoped for second by tracking the different legacies of their central ideals over the past two centuries But in addition to documenting the significant gap that still exists between Enlightenment ideals and current realities the author also attempts to show why the ideals of the Enlightenment still elude us What does our own experience tell us about the appropriateness of these ideals Which Enlightenment ideals do not fit with human nature Why is meaningful support for these ideals particularly within the US so weak at present Which of the means that Enlightenment intellectuals advocated for realizing their ideals are inefficacious Which of their ideals have devolved into distorted versions of themselves when

attempts have been made to realize them How and why after more than two centuries have we still failed to realize the most significant Enlightenment ideals In short what is dead and what is living in these ideals *Being Human* J.
