Bulletin of Bibliography and Magazine Subject-index, 1912 *A Woman's Place Is at the Top* Hannah Kimberley, 2017-08-01 Annie Smith Peck is one of the most accomplished women of the twentieth century that you have never heard of Peck was a scholar educator writer lecturer mountain climber suffragist and political activist She was a feminist and an independent thinker who refused to let gender stereotypes stand in her way Peck gained fame in 1895 when she first climbed the Matterhorn at the age of forty five not for her daring alpine feat but because she climbed wearing pants Fifteen years later she was the first climber ever to conquer Mount Huascar n 21 831 feet in Peru In 1911 just before her sixtieth birthday she entered a race with Hiram Bingham the model for Indiana Jones to climb Mount Coropuna A Woman s Place Is at the Top The Biography of Annie Smith Peck is the first full length work about this incredible woman who single handedly carved her place on the map of mountain climbing and international relations Peck marched in suffrage parades and became a political speaker and writer before women had the right to vote She was a propagandist an expert on North South American relations and an author and lecturer contracted to speak as an authority on multinational industry and commerce before anyone had ever thought to appoint a woman as a diplomat With unprecedented access to Peck s original letters artifacts and ephemera Hannah Kimberley brings Peck s entire life to the page for the first time giving Peck her rightful place in history

Bulletin of Bibliography and Dramatic Index, 1912 *The Silent Rhetoric of the Body* Matthew Craske, 2007 Matthew Craske looks closely at tomb sculptures in their social context He discusses a large number of monuments by many different sculptors all with a knowledge of the person commemorated and the circumstances behind the commission

Enlightenment Portraits Michel Vovelle, 1997-08-18 A subtle and complex study of the Enlightenment this book allows us to reflect on how nineteenth and twentieth century scholars have constructed our views on eighteenth century people

American Empire Neil Smith, 2003-03-19 An American Empire constructed over the last century long ago overtook European colonialism and it has been widely assumed that the new globalism it espoused took us beyond geography Neil Smith debunks that assumption offering an incisive argument that American globalism had a distinct geography and was pieced together as part of a powerful geographical vision The power of geography did not die with the twilight of European colonialism but it did change fundamentally That the inauguration of the American Century brought a loss of public geographical sensibility in the United States was itself a political symptom of the emerging empire This book provides a vital geographical historical context for understanding the power and limits of contemporary globalization which can now be seen as representing the third of three distinct historical moments of U S global ambition The story unfolds through a decisive account of the career of Isaiah Bowman 1878 1950 the most famous American geographer of the twentieth century For nearly four decades Bowman operated around the vortex of state power working to bring an American order to the global landscape An explorer on the famous Machu Picchu expedition of 1911 who came to be known first as Woodrow Wilson s

geographer and later as Franklin D Roosevelt's Bowman was present at the creation of U S liberal foreign policy A quarter century later Bowman was at the center of Roosevelt's State Department concerned with the disposition of Germany and heightened U S access to European colonies he was described by Dean Acheson as a key architect of the United Nations In that period he was a leader in American science served as president of Johns Hopkins University and became an early and vociferous cold warrior A complicated contradictory and at times controversial figure who was very much in the public eye he appeared on the cover of Time magazine Bowman's career as a geographer in an era when the value of geography was deeply questioned provides a unique window into the contradictory uses of geographical knowledge in the construction of the American Empire Smith's historical excavation reveals in broad strokes yet with lively detail that today's American inspired globalization springs not from the 1980s but from two earlier moments in 1919 and 1945 both of which ended in failure By recharting the geography of this history Smith brings the politics and the limits of contemporary globalization sharply into focus
